CIO President Philip Murray has instructed all CIO unions Sliding Scale to "make any pledges or commitments which promise supnot to "make any pledges or commitments which promise support to any party or any candidate" in advance of the coming meeting of the 11-man CIO Political Action Committee in Bonus Asked Washington.

Any such pledges, he said, would be contrary to the ac- By UPWA taken at the recent Roston CIO comments to the action taken at the recent Boston CIO convention which pledged "full and unstinting support to the strengthening of the CIO Other Unions in CIO Political Action Committee and to the carrying out of its Initiate Wage Programs program."

Murray didn't mention Wallace, but everyone understood the purpose of his instructions was to prevent any further endorsements of the Wallace movement.

His arguments about the binding character of the Boston CIO convention are phony from beginning to end. That convention never discussed the question of supporting or endorsing any new party because the CIO bureaucrats did not want any such discussion. It took no position on the question, one way or the other.

Furthermore, if the question of PAC policy for 1948 has not yet been decided, by what authority did the PAC leaders issue a statement saying its policy is against a third party shortly after Wallace threw his hat into the ring? If the provides automatic wage rises as policy has not been decided, why did Murray let his support- prices go up. He recalled that durers in the New York and Illinois State ClO Councils come ing the war the packinghouse workout against the Wallace candidacy, and why did he let them split the American Labor Party down the middle over this creases we received since that time issue?

Murray had better quit trying to kid the public, which knows that he is ready to split existing labor political organizations like the ALP if they won't go along with support of strikebreaker Truman. And he had better quit trying to kid mand in its wage negotiations. Helhimself if he thinks he can now force the will of 11 men on stein and other UPWA leaders failthe 6 million members of the CIO.

Wallace has in effect told the work- UPWA leaders intend to seriously ers that it is a waste of time to try to reform the Democratic Party — and he has been one of the authorities on that question. He has also told them that the theory of the "lesser unions which have announced their evil" is the bunk and that they should fight against all the intentions of demanding more evils — words which they have long wanted to hear.

Now that the voters have a choice other than Trus or a Republican, the situation is considerably changed. Should locals to raise demands for " a subthe workers continue to support the Democrats — as Murray, stantial wage increase." Green and Reuther propose — even though this political company-union policy has produced nothing but the Taft-Hartley unions, the FTA officers have not Act, high prices, discrimination and militarization? Or should yet announced the specific amount they back the Wallace movement — as the Stalinists advise — of wage increases they are seeking. even though his party is not based on the union movement, Also like the other CIO leaders, outor controlled by it, or responsible to it? Or should they — as side of packinghouse, they propose the Socialist Workers Party and many union militants recommend - form their own independent Labor Party, controlled by the unions and running its own candidates in 1948?

Murray and his fellow bureaucrats have no right to pretend that they speak for the CIO ranks when they have never for the inclusion of a sliding scale consulted them on these questions, either directly or indirectly. cost-of-living bonus in the new The question of labor political policy for 1948 is too big and too important — to be left in the hands of 11 men.

The processes of great changes must be measured by scales which are commensurate with them. I do not know if the Socialist society will resemble the biblical Paradise. I doubt it. But in the Soviet Union there is no Socialism as yet. The situation that prevails there is one of transition full of contradictions, burdened with the heavy inheritance of the past, and in addition is under the hostile pressure of the capitalist states. The October Revolution has shown only the first stages of its realization. Edison's first lamp was very bad. We must learn how to discern the -Leon Trotsky, Copenhagen Speech, 1932.

All the News That's Printed to Fit

America's daily press boasts of its worldwide and speedy news coverage. It points with pride to its network of news-gathering forces and communications reaching into the remotest hamlets and least accessible spots on the globe.

Is it likely, then, that the complete national press blackout on the sinister developments in Mississippi was due to any slip-

The Mississippi Legislature doesn't meet in some mountain fastness. It holds forth in Jackson, a flourishing American city with all modern conveniences, including telegraph, telephone and wireless.

Failure of the American press to report the unprecedented actions of the Mississippi Legislature last Nov. 14 is a case of deliberate suppression. This was news embarrassing to the American ruling class. Apt to stir up a lot of stink and protest. Apt to arouse labor on how far fascist developments have gone here in America.

Nor is this suppression of news anything

new, or exceptional. We have an even more recent example of the same thing.

On Dec. 15, on the floor of the U.S. Congress, a group of nationally-prominent Congressmen launched a scathing attack on the National Association of Manufacturers during the debate on the so-called anti-inflation bill. Did you know it? Not if you didn't read the Congressional Record of that

This important event was completely suppressed. Leading newspapers on Dec. 15 and 16 printed hundreds of thousands of words on everything from Congress to babysitters — but not even a hint that the NAM had been exposed on the floor of Congress by such public figures as Senator O'Mahoney, Morse and McMahon and Representatives Douglas, Rayburn and O'Toole.

The only thing, obviously, that is really free about our so-called "free press" is that it is free to spread misinformation and systematically poison the public mind.

Dictatorship in Brazil

The Truman-Marshall Doctrine pretended to strengthen the "forces of democracy." Instead it is bolstering up the forces of dictatorship and fascism. This is being demonstrated in action not only in such European countries as Greece, but right here in the Western Hemisphere in Brazil.

From 1937 to 1945 Brazil was ruled by the iron dictatorship of Getulio Vargas, one of Roosevelt's "good friends." The Vargas regime had little to learn from Hitler - it abolished elections, smashed unions and destroyed democratic rights.

When the war ended, Vargas' rule ended too. Opposition parties regained the right to function legally, new elections were held, the Communist Party got almost 10% of the votes, the Social-Democrat Dutra was elected president, a new constitution proclaiming democratic liberties was adopted.

Then last March Truman announced his anti-communist doctrine. His puppets in Brazil — as in the rest of the world — got the cue and joined enthusiastically in the Wall Street crusade.

Insanity and Capitalism

Times were brightened on Jan. 3 by the cheerful note struck in an editorial entitled "New Horizons of Psychiatry."

It seems that cases of insanity increased 21% in this country between 1940 and 1945; mental cases fill half of all hospital beds. But even though "It is expected that an increase ... will continue for some time to come," according to the Times there is no cause for alarm.

Every cloud has its silver lining. The Times takes comfort from "the tremendous development of psychiatry which took place during the war years."

And in the end, this enemy of world progress will find itself as isolated and helpless as the bloody Czar of old Russia in the

revolutionary days of 1917.

Within two months Dutra had suspended the Communist Party and the Stalinist-supported Brazilian Workers Confederation. Political clubs were padlocked, newspapers were suppressed, militant unionists were hounded. Truman and the U.S. State Department and their bi-partisan supporters in Washington, who bellow indignantly against Stalinist suppressions in Eastern Europe, smiled with satisfaction, patted Dutra on the head and promised him more aims and more funds to keep up the good work.

Application of the Truman Doctrine in Brazil was extended further this month. On Jan. 7, the Communist Party members of Parliament, the legally elected representatives of several hundred thousand, people, were ousted from their posts. The next day police smashed their way into the offices of Stalinist newspaper in Rio de Janeiro, arrested everyone present and shut down the

Gunmen Hired To Break Strike

AKRON, Jan. 14 - Armed thugs and gunmen have been hired to break the strike of the Brotherhood of Railroad Trainmen against the Akron-Barberton Belt Line railroad. The entire working force of this small but strategic railroad has walked out after fruitless negotiations carried on since

At issue are 6 changes in present working rules that would bring conditions on the Belt Line up to standards already prevailing on the main

The Pennsylvania, Baltimore and Ohio, and Eric Railroads, joint operators of the Belt Line, have refused to meet with the strikers, and are attempting to operate with scabs and imported gunmen. Approximately 30 scabs are trying to run trains, according to union members.

The company's claim that boxcars are being moved onto the main lines is disputed by H. M. Drillian, chairman of the B. R. T. Lodge. The entire working force is out and picketing in complete solidarity with the 24 trainmen directly involved, he

Although the railroad is small, employing only 40 workers, it is strategic to Akron industry. All but one of the great rubber plants are entirely dependent on the Belt Line for railroad shipments. A prolonged strike would seriously affect their operations.

According to Chairman Drillian, the workers of the Belt Line are being used as guinea pigs for a company offensive against the railroad unions through use of the Taft-Hartley Law. The important railroad interests controlling the Belt Line, their refusal to even meet with the union, and their use of scabs and thugs to break the strike, show the serious implications of this strike for all labor.
