BRITAIN AND ITALY SIGN ROBBER PACT

Open Road For Bloc Of "Democratic" and **Fascist States**

Outstanding among the recent moves on the chessboard of imperialist politics was the signature in Rome last Saturday of an agreement between Great Britain and Italy which, for the time being at least, ends the acute state of tension that has prevailed between the two robber states since 1935, when Mussolini threatened vital British interests by his conquest of Ethiopia, last independent native state in Africa.

Not the least significant aspect of the agreement was the obvious haste with which it was concluded. Little more than one month elapsed between the opening of negotiations and signature of the pact. Chamberlain's government was anxious for a settlement with Italy so that British imperialism, its hands untied in the Mediterranean, in the Near East and in East Africa, would be free to conclude a satisfactory agreement with Hitler and-of equal if not greater importance—to handle the Japanese threat to Britain's imperial interests in the Far East.

CIO Decision To Form **National Body Brings** Unity Issue Forward

Six-Month Interval Provided To Give Hillman Chance To Make New Peace Overtures; Leaders Fed Up With C. P.

By JAMES P. CANNON

The conference attended by the chief officers of 38 international mions affiliated with the Committee for Industrial Organization n Washington, April 13, announced the decision to form a permanent organization of the C. I. O. at a general convention to be held next September or October.

Julius Hochman, representing the powerful International Ladies Garment Workers Union, abstained from voting, pending the further action of the executive board of his organization. Otherwise, the decision was reported as unanimous. It is known that there is strong opposition in the leading circles of the I. L. G. W. Leaders of ILGWU Local Try To Cover Their Own Bankruptcy

PHILADELPHIA.—Seeking to cover up the bankruptcy of their own leadership, the Stalinists in have opened one of their typical red-baiting campaigns with attacks on the Trotskyist members of the local, whom they accuse of hindering the efforts of union officials to maintain the workers' standards and conditions in face of the advancing economic depression.

This accusation is made in an article which appeared in the Stalinist Daily Freiheit of April 4, which deals with the alleged activities of three Trotskyists and one of their sympathizers in the Philadelphia local.

Conditions Grow Worse

For a long time the Stalinists their stooges have been spreading lies in Local 15 to keep the workers from realizing the true role of the people whom they elected to office. This local, numbering over 3,000 members, has been completely in the hands of the Stalinists since the last election. As a result of their misrule, conditions in the shops have grown worse. In some cases, wages and working conditions are comparable to the period prior to the great general strike of garment workers in 1933.

Work flows out of the inside shops to contractors, union and Spauldings and Jennings plant fused its members and tied them non-union, where it is made up and refused to adjust grievances to the tails of both capitalist cheaper, not only further endangering union standards but increasing the idle period. But nothing is being done about it.

Members Wake Up

At the last meeting, the Stalinist business agent added to her report a warning against certain elements who are trying to take advantage of the crisis to break up the union. All these efforts on the part of the officials to shift the blame to someone else, however, are ceasing to work. The workers' eyes are being opened and they are becom-

The unemployed who are now on relief or getting \$54 a month on works projects, will be even more depressed. Those unemployed only will have temporary relief who get jobs in private industry as a result of the inflation unswing.

But this relief will be shortlived. Inflation will cut the purchasing power of the workers; surplus products will pile up as capitalists prepare themselves against future price rises. Consumption will have lagged again behind production. And the illusion of recovery will crash into the reality of depression.

Roosevelt's program is a counsel of depression. It can no more

To Hide Decline

All this propaganda, because t serves to hide the decline of American capitalism, is part of the ideological struggle to suppress the workers. Its utter falseness is proved by the statistics of the capitalists themselves.

Index Year ... 119 ... 110 1937

The drop in industrial production is nine percent. However, this does not take into consideration the fact that the population increased by millions. If we take account of the population increase, the decline between 1929 and 1937 is not nine but almost 15 percent. (The Monthly Labor Review of November 1937 said the loss was 16 percent between 1929 and 1936. Due to further increase in population at the same time that there was an increase in production, pretty much the same loss held for 1937.)

In short, production is falling at the same time that population is rising. Capitalism cannot profitably satisfy the needs of evergrowing portions of the population. Falling production is falling about the heads of a growing population, pressing down upon them more and more. Above all it presses down upon the workers, who compose seven-tenths of America.

The Right of Asylum

The House Committee on Immigration and Naturalization opened up public hearings in the middle of this week on the bill submitted by Representative Emanuel Celler concerning the question of asylum in the United States for political and religious refugees.

The bill is conceived in the same general spirit as the statement made a few weeks ago by Secretary of State Cordell Hull in favor of facilitating the migration to the "democratic" lands of those whose existence in the Fascist countries had become insufferable.

Mr. Celler not only proposes that the President be empowered to increase the immigration quota for any foreign country in case of an "emergency situation," but also provides that a political or religious refugee who "in his last place of residence outside the United States has been subject to persecution, personal abuse or indignity, economic boycott or social ostracism because of his religious or political beliefs or practices," shall not be excluded from the US. as a person likely to become a public charge, provided he is "otherwise admissible."

Like the much-publicized Hull declaration, the Celler Bill is hedged around with just the kind of reservations and weasel words that are characteristic of all the flowery gestures of the "democratic" pretenders. Anxious to increase the patriotic allegiance of the masses to the government by emphasizing the contrast between fascism and democratic capitalism, our statesmen do not, however, fail at any time to puncture their policies with enough holes for most of the democratic content to leak through.

The "generous" American immigration policy of recent times has facilitated the admission of men like Albert Einstein-which is, of course, as it should be- or of bloody tyrants like the Cuban ex-dictator, Gerardo Machado, but has left virtually insurmountable bars against the entry of thousands of nameless soldiers of the labor and revolutionary movements. The new Celler resolution in reality perpetuates one of the oldest bars, when it makes reference to the "otherwise admissible." In the past, this has meant the power of the Wash! ington authorities and their representatives abroad to exclude "undesirable aliens," that is, all those labor militants who have not relented in their views despite the most savage persecutions.

The reference to "his last place of residence outside the United States" is of a piece with the other. It means, concretely, that while a would-be immigrant in Germany has a chance to come to the United States (if he can ever get out of Germany!), a German or Austrian exile who now happens to be in France, in utter misery, as is the case with most of them, is not eligible for admission to this country.

The bill, in other words, requires drastic revision in the direction of really letting down the bars to the horribly persecuted political and religious protestants against fascism and reaction. Among the best of the democratic traditions of the last century was the unalloved right of asylum, which brought to the shores of the United States in particular some of the finest fighters for the labor movement. The bars which are maintained by some of our presentday half-baked or decayed "democrats" ought to be torn down without hesitation. And it is the labor movement that should be in the fore in the work of tearing them down.

Whose Morals?

The elections in Local 16 of the Waiters' Union in New York are worth more than a second thought. By a very close vote—a difference of about 150 votes out of a total of more than 3,000 would have changed the results—the Stalinist combination managed to defeat the slate put forward by the progressives. The progressives charge that the C. P. victory is to be explained by the fact that in the fusion of the late "red" union with the present A. F. of L. local, the Stalinists packed the rolls with numerous Party and Young Communist League members whose closest connection with the trade is obtained when they order a meal in a restaurant.

Of decisive significance, however, is the composition of the Stalinist slate. It was made up by a combination between the Communist Party and several gentlemen who served as paid officials in the administration of Messrs. Paul N. Coulcher and Aladar Retek, who now have their offices in a penitentiary as Convicted racketeers. These same gangsters and the remnants of their associates were, in the past, vociferously condemned by the very Stalinists who, last week, imperturbably carried through a common election slate with them!

There are those who believe and charge that the Stalinists are immoral in their practises. Strictly speaking, this is not true. They are neither immoral nor amoral. In the remote past, some of the Stalinist leaders learned that the high moral pretensions of the ruling class are a gargantuan fraud, fair words which barely cover up the depravity, cynicism, hypocrisy and chicanery which constitute the reality of bourgeois moral standards.

In part, the communist movement was born in rebellion against these moral standards which had permeated the decadent movements of the Second International—the corrupt old social democracies. That rebellion has been suppressed by the rogues who usurped the leadership of the Communist International and who can live only by virtue of their adoption of the very standards of morality which they originally abhorred.

The barefaced alliance with gangsterracketeer elements is not exceptional to, but part and parcel of Stalinism. Those who, on a grand scale, are capable of palming off the governments of the most ruthless exploiters in history as illustrious democrats, are entirely consistent in presenting underworld characters as worthy co-leaders of a trade union.

Street-walkers of the G.P.U.

A mimeographed circular is making the rounds of liberal and intellectual circles, signed by Messrs. Robert Coates, Stuart Davis, Marc Blitzstein, Paul Strand and the not unknown Malcolm Cowley. It asks recipients to join with the above in underwriting a statement of approval and apologetics for the last Moscow frame-up trial, to be published in the name of "progressive forces everywhere."

A more nauseating piece of mendacity is hard to imagine. Its character may be judged by the following quotations from the letter. In face of the universal disbelief in the Stalin-Vyshinsky charges, Cowley and Co. have the bland impudence to write: "The link between Hitler and the Trotsky-Bukharin camp is plain for us to see." It would be more accurate, it seems to us, to say: "The link between Browder and his running dogs dressed up as 'American progressives' is plain for us to see."

For who but running dogs of the G.P.U. murder gang could have the effrontery to put down on black and white, on April 2, of this Year of Our Lord 1938, the following staggering statement: "Most newspapers have discarded the earlier charges of 'frame-up' and now admit the validity of the trials."

Most newspapers!? Perhaps Citizen Cowley, who is a man of high moral integrity and a luminary of one of our leading liberal weeklies, the New Republic, will name a few of these newspapers for us? If not a few of them, will he name at least one—apart from the Daily

Worker? Perhaps the New York Times? or the Herald-Tribune? or the New York Post? or the World-Telegram? or the Daily News? or a single other fairly well-known periodical? We doubt it, for not a single one was so gullible as to describe the "trial" as anything but a crude and utterly fantastic frame-up.

More than that. The Nation, and Cowley's own New Republic, both of which admitted the "validity" of the first trial and of the second, and sought to jam their despicable conclusions down the throats of their readers, have washed their hands of the third trial and publicly acknowledged that it is too much even for their eager and distended gullets to swallow. Doesn't

Mr. Cowley read the New Republic? We have always felt sympathy for those unfortunate women who, in their economic distress, are forced by capitalist society to sell themselves to all who approach them. They are victims of a frightful social pressure. But the zealously voluntary prostitution of certain "liberal intellectuals" to the Stalinist machine passeth all understanding. If it is economic need they labor under, it is still beyond understanding why they do not resort to a solution which while far indeed from ideal, is nevertheless something—the relief rolls. At least, they could then bear themselves with a modicum of dignity, with a million times more dignity than they can in their present position, which makes it impossible for them to look even an ordinary decent person straight in the eye.

Towards Real War

LaGuardia boasts that American capital is strong enough to offer Latin American customers the same low prices and economic advantages as do the "aggressors." In advance, he repudiates the idea that his proposal means economic war. There is, as always, only a question of legitimate "self-defense." Statesubsidized exports, however, are nothing but dumping. Dumping is nothing but economic war. Economic war ultimately leads to real war. Of course, all this is the only self-defense for a capitalism torn by crisis.
