We propose that the regular 1940 session of the Congress of the United States shall enact emergency legislation to put into immediate effect the following:

1. Appropriation of \$10,000,000,000 to provide, at once, jobs on housing and other public works projects for unemployed workers.

2. Amendment of the Wages and Hours Act to provide throughout private industry and public works a maximum work week of 30 hours and a minimum weekly pay of 30 dollars.

3. 30 dollar weekly old age and disability pensions.

4. Appropriation of \$3,000,000,000 to guarantee either maintenance at school or jobs for all youth.

## General Motors Had A Bonanza Year, But Its Workers Got Nothing Out of It

By GEORGE CLARKE

1939 was a big bonanza year for General Motors. According to the corporation's report on February 7, the coupon

clippers cleaned up a cool \$183,-

000,000. The DuPont crowd took Let's break down these big numbers and see just how the profit was made:

For every one of an estimated 225,000 employees the corporation took approximately \$814. The corporation received a profit of over 50 cents for every dollar paid out in wages. A profit of roughly \$119 a car was made and shareholders received \$4.04 per share of common stock outstanding. This compares with \$2.17 re-

ceived by shareholders in 1938.

Par value of GM stock is \$10 per

These big numbers smell like prosperity. Yes, indeed. Plenty of gravy for the fat parasites whose function in production is sunning their hides on swanky yachts in Florida or rebuilding the ruined fortunes of some broken-down European count to make him a good match with one of their dissipated daughters.

It smelled like prosperity to be sure-but all the wage slaves on the assembly lines, in the press rooms, the die shop and the foundries-the men whose sweat and skill and muscle made the \$119 profit on the Chevrolets. Buicks. Cadillacs, Lasalles, Pontiacs and Oldsmobiles --- all they got was the smell.

## The Union's Responsibility

But it is the business of the -with determination, audacity listeners. auto workers. Underpaid auto and courage the gains of 1940 UNEMPLOYED LEARN workers mean suffering, semi- will make the triumph of 1937 THEY MUST FIGHT starvation, insecurity, malnutrition for the children, unsanitary pale into insignificance. housing conditions. Unemployed auto workers mean a constant threat to the wage scale of the eniployed—a steady reserve army of potential scabs and fascists. It is the business of the auto workers. It is not a hopeless problem -something can and must be done about it!

The United Automobile Worker, from which most of the figures for this article are culled suggests that \$200 more be paid the employed auto workers annually "and still leave profits above \$150,000,000. This is a profit figure that only one or two corporations in the world, aside from GM, have ever been able to touch.'

A very modest suggestion. Just contrast the fabulous profit of GM for 1939 with the miserable wages of its workers, and you begin to get an idea of how modest this suggestion is. Then contrast the present annual wage of the auto worker with the minimum set for security by the U.S. Department of Labor and the modesty of the CIO suggestion becomes appalling.

\$183,000,000 profit for General Motors coupon clippers for the year 1939! And how the parasites squander the millions made for them by the workers—gold-plat"THE SPIRIT OF '37"

It was battles like these that made General Motors recognize the Auto Workers' Union. This picture was taken before the huge Fisher Body No. 1 plant in Flint. When the General Motors Workers hit the ball again, they will be on the march for a living annual wage for the men who produce America's automobiles.

## Negro Question **■By J. R. JOHNSON**

On the ground that their confessions were extorted by torture, the U.S. Supreme Court upheld the petition of four young Negroes against sentence of death by the Supreme Court of Florida.

In May 1933 an elderly white man was murdered in Pompano, Florida. Immediately the murder was discovered, between 25 and 40 Negroes were arrested, among them the petitioners. From May 14 to May 20, the 25 to 40 Negro suspects were subjected to questioning and cross-questioning, resulting in the "confessions of the four accused." The evidence compels Justice Black to state that "the prisoners at no time during the week were permitted to see or confer with counsel or a single friend or relative. When carried singly from his cell and subjected to questioning, each found himself, a single prisoner, surrounded in a fourth floor jail room by four to ten men, the County Sheriff, his deputies, a convict guard, and other white officers and citizens of the community. As an ex-Ku Klux Klanner and a Southerner, Black understood well the significance of the fourth floor. A Negro knows that at any time in these proceedings he is liable to be thrown out of the window, after which his questioners would unitedly swear that he had jumped.

The necessary confessions were obtained. Justice Black quotes, "They bring one of them at a time backwards and forwards until they confessed." They were tried and sentenced on no other evidence than these confessions.

Here is a tale, one of ten thousand, of the organized terror against Negroes, by citizens, Ku Klux Klanners, lynch mobs, judges, sheriffs, policemen, state governors, and Federal authorities, by which the millions of Negroes are kept in economic and political subjection for the greater glory of capitalist profits and the maintenance of American "democracy." Every year there are hundreds of similar cases, most of which do notreach the Supreme Court at all.

## Justice Black Prepares For War

Today, however, there is a war in Europe, in which the American capitalists are planning to intervene. British and German imperialism are at each other's throats for the redivision of the world, and American capitalism seeks to become the dominant world power. The American people must be mobilized for war, and such is the bankruptcy of the capitalist system, that in its mad pursuit of imperialist aims, it has to fall back on the tattered, torn, and blood-stained slogan of the "defense of democracy."

The Supreme Court therefore takes this case as a platform from which to pontificate on the evils of totalitarianism and the benefits of "democracy," as exemplified in the Supreme Court of the United States. Justice Black has the impudence to make more than one reference to the Fourteenth Amendment, which was thrown into the waste-paper basket by many Southern states the day after it was passed and has remained there since. He speaks of "liberty-loving people," pictures the Supreme Court as defender of the rights of "the poor, the ignorant, the numerically weak, the friendless and the powerless," and contrasts the American way with the "rack, the thumbscrew, the wheel, solitary confinement," and the exalted power of "some governments to punish manufactured crime dictatorially." He concludes on a high note: "Under our constitutional system, courts stand against any winds that blow as havens of refuge. . . . "

## The Negro People Know Better!

Some of the Scottsboro boys are still in jail. Every year Negroes are lynched, not only those ganized doing-away with Negroes who in one way or another threaten "white supremacy." In state after state Negroes cannot vote. They are deprived of their social and political rights by brute force. The decisions of all courts in their favor are ignored or flouted. They are constantly insulted, beaten up, terrorized. Their groans and protests, sometimes subdued, now flaring up as the persecution becomes intolerable, are the permanent accompaniment of American life. And yet this ex-member of the Klan, with his eyes on his script and his mind on imperialist war, reads his piece about American courts being a haven of refuge against winds that blow.

The press has taken its cue and has repeated in swelling chorus the theme of the distinguished soloist. "We are not as they." And if "we," whose courts are a haven against all the winds that blow, are not as "they," the dictatorships, shouldn't we be ready to die for these privileges? The fifteen million cheated Negroes, the millions of unemployed and ther starving families, will know how to treat this impudent piece of war propaganda, this blatant self-justification, this stupid attempt to throw dust into the eyes of the Negro

Justice Black has lifted the case of these unfortunate Negroes (for if there was any evidence against them it would have been heard) from its place as one of a never-ending list of tyranny and injustice into a plea for the support of American and its imperialistic adventures aboard. But the tyranny and violence of three hundred years are not pushed aside so easily. They will be pushed aside not by rosy-hued lies from a war-monger's loud-speaker, but by the united voice of millions of workers, black and white, shouting the slogans of socialism. They will be destroyed only when the system which breeds them is destroyed. Our aim is the destruction not only of the naked dictatorships abroad but of the thinly veiled dictatorships at home.

## Men Wanted—in the Army

The one employer that still has plenty of jobs is the U.S. Army. Uncensored for Jan. 27 gives this from a list of recruiting hints sent to Army

"4. Some of the sources for young men are: those unemployed; on relief; ex-enlisted men. . . and young men of military and adventurous disposition." One special recruiting appeal the Army now makes to unemployed youth is the chance to learn a trade.

How doth the little crocodile Improve his shining tail, And pour the waters of the Nile On every golden scale!

How cheerfully he seems to grin, How neatly spreads his claws, And welcomes little fishes in With gently smiling jaws!

# On Finland

By FELIX MORROW

In the January 27 issue of the Socialist Appeal we commented editorially on a speech by a Czarist officer advocating aid to Finland. He had said, in calling upon Czarist Russians to fight against

"For twenty-two years we have been waiting for this moment. Now there is a place where w can go back from."

And our comment was:

"There in two sentences is the whole story of all the tear-jerking money-raising committees to aid 'poor little Finland' against 'Russian imperialism,' from Hoover down to the wretched Lovestoneites and Thomasites."

In previous issues we had devoted a good many thousands of words to a painstaking analysis of the pro-Finland line of Norman Thomas' Socialist Party and of the Lovestoneites. Both these groups have carefully refrained from answering our case against them.

At long last, however, the Lovestone Workers Age of February 17 replies. Its reply consists of a purported analysis of the editorial quoted above. It charges us with "the construction of an amalgam of labor and radical groups with the Russian monarchists, similar to the cheap and vicious type of argumentation used for the last fourteen years by Stalin against the Trotskyites."

Is it? All that the editorial and all our articles on Finland, say is: those who support Finland against the Soviet Union are supporting an outpost of imperialism against a workers' state. Defeat of the Red Army on the Finnish front would be followed by an imperialist invasion to destroy the workers' state and restore capitalism.

## They Argue Like Social Democrats

The Workers Age is not yet quite as brazen as the New Leader. But, at the risk of being accused of another amalgam, we must say that its case for supporting Finland against the Soviet Union is based on the same fundamental assumptions as that of the New Leader. The latter declares it a war between democracy and dictatorship, points as proof to the house-broken social democratic deputies, and minimizes the role of Mannerheim. And what does the Workers Age do? We quote:

"Both the Daily Worker and Socialist Appeal . . raise the menace of the White Guardist Mannerheim to gigantic and grotesque proportions, with the same intent in view, to prove that Finland is a White Guard outpost for the destruction of the USSR. All those who dare to raise their voices for the defense of Finnish independence can then be dubbed as 'agents of Baron Mannerheim.' Great care must be exercised to conceal the fact that out of 200 members of the Finnish parliament, the largest group, 85, are socialists, and that 143 represent workers or peasants parties. Otherwise, the cry of a White Guard Mannerheim regime,' would fall to the ground, and without a Mannerheim bugaboo, the amalgam would be worthless."

In passing, the Workers Age makes a little amalgam between the Socialist Appeal and the Daily Worker. We have pointed out the composition of the Finnish parliament; we have not called the bourgeois republic a White Guard regime. But all that is unimportant. What is most significant in the Workers Age article is that this paper, of a group which once called itself followers of Lenin, has degenerated to the point where (1) it does not recognize that Mannerheim, commander-inchief of the armed forces of the Finnish bourgeoisie, represents the class in power; (2) it can adduce as a decisive counter-weight to Mannerheim the fact that impotent and cowardly representatives of reformist parties sit in the bourgeois parliament; (3) it can deny that any bourgeois country on the frontiers of the Soviet Union must serve as a base for imperialist intervention. By the by, as it were, the Workers Age throws overboard the Marxist theory of the state.

## They Once Called Themselves Leninists!

Now listen to this, from people who once called themselves adherents of Lenin's theory of the progressive role of colonial wars against imperial-

"Nor is it ever explained (by the Trotskyists) why if Mannerheim's participation in the Finnish defense . . . deprives the Finns of our sympathy, the same is not true for China and Chiang Kaishek. . . . Because Chiang Kai-shek is head of the Chinese Nationalist government, are we therefore to bless the Japanese invader and deny the Chinese masses our sympathy and support?"

The only logic by which this extraordinary paragraph would make sense would be by the argument that in all wars we oppose the "invader." But we would defend China against Japan if China were the initiator of hostilities. We, as followers of Marx and Lenin, don't choose sides on the legalistic argument of who crossed whose frontier line first, but we choose sides by a class criterion: the workers against the bosses, workers' state against capitalist state, oppressed colonial people against imperialist. Yes, one must defend these elementary Marxist propositions today against the Lovestoneite ex-Leninists.

In the characteristic style of all the social democratic war mongers these days, the Lovestoneites conclude with a denunciation of our belief that "the end justifies the means." Yes, we recognize no separation between ends and means. Neither does any naturalistic ethics which has broken with supernaturalism. John Dewey's "crime" to religionists is precisely that he establishes that means have no meaning apart from ends. But the Lovestoneites will scarcely trouble to find out what the concept really means. It sounds like an epithet, thanks to religious propaganda, and so they hurl it at us. Who hurls it? The people who defended Stalin's frameup trials against Zinoviev, Kamenev, Radek and Piatakov!

"Reentered as second class matter December 4, 1939, at the post office at New York, N. Y., under the Act of March 3, 1879."

## FIGHT WITH THE SOCIALIST WORKERS PARTY FOR:

- 1. A job and a decent living for every worker. 2. Open the idle factories—operate them under
- workers' control.
- 3. A Twenty-Billion dollar Federal public works and housing program.
- 4. Thirty-thirty-\$30-weekly minimum wage-30hour weekly maximum for all workers on all jobs. Thirty dollar weekly old-age and disability
- 6. Expropriate the Sixty Families.
- 7. All war funds to the unemployed.
- A people's referendum on any and all wars.
- 9. No secret diplomacy.
- 10. An independent Labor Party.
- Workers' Defense Guards against vigilante and Fascist attacks.
- 12. Full social, political and economic equality for the Negro people.

## Unity For the Miners

The Progressive Miners Union is headed straight for a blow-up which we hope will lead to a unification of the Illinois coal diggers inside the United Mine Workers of America, the union representing the overwhelming majority of the nation's miners.

The rank and file of the P.M.A., led by genuine progressives, has been at loggerheads with the arch-reactionary international officials of the union, Joe Ozanic and Claude Pearcy, for some time. The dispute came to a sharp climax when the International Executive Board of the union expelled Dave Reed and John Battuello, two leading militants, on charges of cooperation with the U.M.W.

The very issue of their expulsion serves to emphasize the reactionary character of the P.M.-A. officialdom. A few months ago Reed and Battuello joined in a common action with the Illinois district of the U.M.W. to force operators to comply with state mining laws. The action was successful and as a result will cost the operators hundreds of thousands of dollars in the enforcement of these laws-to say nothing of the hundreds of miners' lives that will be saved from needless mine disasters.

What could be more natural than a united front of the two miners' unions on this vital issue? Yet, on precisely this issue the P.M.A. leadership expelled Reed and Battuello. The charge made by the two expelled miners, that the P.M.-A. officials acted in this matter in connivance with the coal operators, has every appearance of truth. Moreover, they present evidence showing that in June, 1939 the Coal Producers Ass'n of Illinois asked for their removal from their local positions.

The expulsion of Reed and Battuello comes only as a culmination to a seven-year reactionary course that has brought disgrace to what was once America's most promising militant union. In full revolt against the dictatorial policies of the Lewis machine, 50,000 Illinois miners broke away from the U.M.W. and formed the Progressive Miners Union in the fall of 1932. They waged a militant strike against coal operators, deputies, Lewis' thugs, National Guardsmen and martial law—a strike that made history in the American labor movement. More than a dozen martyrs stand as an eternal monument to that struggle.

But, soon after, leadership of the union was seized by a reactionary group that paraded as militants. In short order they made a mockery of the name "progressive." They kept the P.M.A. out of the unorganized coal fields of West Virginia and Kentucky, thus cramping its growth by restricting it to the narrow confines of the state of Illinois. They expelled the militants and began a red-baiting drive that must have made eyen the Lewis of that time blush for shame and envy. They converted the union organ into a Coughlinite-Huey Long fascist rag that forgot about miners' problems and spent its time railing at "international bankers, jews and communists." Slowly the union dwindled down in membership until only a few thousand miners remained, held by their enduring resentment to the murderous Lewis methods they remember—and because of P.M.A. job control in their mines. But the

United Mine Workers staged a great comeback, enlisting the bulk of the miners in its fold. In Illinois, too, it recouped its fortunes and won the majority of the miners. The P.M.A. was left with a shell.

Meanwhile the P.M.A. officials, at the end of their rope, turned to the Executive Council of the AFL for affiliation. Bill Green chartered this dual union for no other reason than to make trouble for the CIO and John L. Lewis. After two years, with twenty organizers in the field, an enormous payroll and a wretched policy of collaboration with the operators—Joe Ozanic, the union president, now admits "disastrous defeat." The coal diggers still in the P.M.A. are up in revolt. Local 3 with a membership of 550 defied the International and reinstated Reed to membership. Local 1, the most powerful in the union with a membership of 2,200, reinstated Battuello in defiance of the International. And now local after local is demanding that an election for international officials be held within 60 days or dues will be withheld. This is one revolt the P.M.A. skates won't stop by red-baiting and expulsions. The coal diggers are fed up.

Battuello and Reed are fighting the battle of the Illinois miners. Victory rightly belongs to them. We hope this victory will lead to the longneeded unification of the mine workers of Illin-

### LAW'S MAJESTIC EQUALITY

Convicted of stealing two loaves of bread-value 20 cents-John Richmond, 22, of Boston, was fined \$25 by Judge Robert W. Frots. Well, if a millionaire had stolen the bread, he also would have been fined!

## Hitler's Secret Weapon

The great fear that animated the imperialist powers before the outbreak of war-and animates them still—is the fear that the war would bring in its wake the destruction of capitalism everywhere.

This is what postponed the outbreak for so long. This is what lay behind the desperate efforts of the British and French imperialists to strike a bargain with Hitler by voluntarily giving him what he threatened to take. This is what still makes them hesitate, even now, before taking what they have reason to believe might be a fatal plunge for all of them.

In his new book retailing Hitler's private conversations with his principal henchmen, Herman Rauschnig, former Nazi leader of Danzig, reveals that Hitler has made conscious use of this

"We may be destroyed," he cried on one occasion, "but if we are, we shall drag a world with us-a world in flames."

Is this, perhaps, Hitler's "secret weapon" of which so much has been heard?

## ONE WAY RACKET

When two Minnesota youths were hailed before a judge, charged with cheating a pin ball machine by using a magnet to draw the ball into the winning pockets, the judge fined them and ruled that it is illegal to take advantage of the pin ball machine

## Can't Hide Cold!

On the same page of the New York Post (February 20) there appear two items with Lon-

"BRITISH HIDE WAR BUDGET-Even Commons Won't Know Amounts.

"It is neither practicable nor desirable," says a treasury official, "to present to parliament detailed estimates purporting to cover the whole cost of these services. It would not be desirable in the public interest. . . . "

If you would know why it would be "neither practicable nor desirable" then read the following item which appeared under the much smaller

"COALSHORTAGEINLONDONGROWS

"A coal shortage in London and elsewhere in England is reaching an acute stage, it was disclosed today, with widespread discomfort and suffering in the poorer districts.

"Officials said there was no actual shortage of coal but that the winter and war conditions had disrupted transportation."

Undoubtedly it would be neither "desirable nor practicable" for the worker who slaves at sub-standard wages in war factories to know that the reason for their heat-less homes is the billions the government is putting in the war budget.

But even concealing the war budget won't hide the fact that despite the coal shortage there is still plenty of fuel to feed the blazing fireplaces in the mansions of Messrs. Churchill and Cham-

. There are some things you can't hide.

## Increased Attacks Against Our Belgian Comrades?

This week United Press carried the following dispatch from Brussels:

"The Cabinet, which met unexpectedly today, was reported to have discussed means of strengthening legislation against persons disturbing internal order. It was believed that the Cabinet was anxious to suppress the activities of communist agitators who, it was alleged, recently provoked strikes, especially among coal miners."

The most recent strikes among Belgian miners were those of the Levant de Flenu company in the Borinage region, the traditional stronghold of our Belgian comrades, the Revolutionary Socialist Party (P.S.R.). Several weeks ago this column eported suppression of the party's legal organ La Lutte Ouvriere" and its reappearance under the title "L'Action Socialiste." The paper had to change from the mining region to Brussels. It is consequently safe to assume that the Cabinet action is directed against our Belgian miner com-

Despite all previous attempts to drive them underground, our comrades have shown a remarkable ability to readjust themselves under fire. Their deep roots among the Borinage proletariat have assured the continuity of their work. If their past performance is any indication. they will be able with the aid of their devoted following in the pits to overcome even these latest moves of the government. Their heroic resistance to the war preparations of Belgian capitalism is an example of the vitality of the Fourth International under increasingly difficult conditions.

### Only Fourth Internationalists Fight Against War in Canada

From Canada we have just received the latest issue of "Socialist Action," the excellent little sheet put out illegally by our Canadian comrades.

Of all the working class organizations in that country, the section of the Fourth International is the only one that is actively engaged in the struggle against war. The reformist Canadian Commonwealth Federation (Second International) has gone completely patriotic under the leadership of its parliamentary whip, Coldwell. The pacifist wing under Woodsworth, which repeatedly wrote a rather strong anti-war plank into the party's program at the Federation's conventions in recent years, has completely capitulated to the war-mongering leadership of its parliamentary representatives, although it has been known to have a majority in the membership. The Stalinist party seems to have disappeared from the field of public action altogether after the switch in line that followed the conclusion of the Stalin-Hitler pact. At the outbreak of the war in September it was still for the support of the "democratic" powers. Only our comrades carry on the strong anti-war tradition of the Canadian work-

In the elections to parliament which are now going on as a result of the dissolution of the lower house by Prime Minister McKenzie King, the C.C.F. is agitating along avowedly imperialist lines. At a recent meeting, Coldwell made the

America's Central Role

American imperialism, repre-

following declaration for his party, according to "Socialist Action"

"The C.C.F. believes that our national unity, the allied cause and securing a just peace could be served best by limiting our military and naval participation to defense to our own large territory and lands belonging to the British and French adjacent to Canada. That would include Newfoundland, the Bahamas, Bermuda and such islands as Miguelon and St. Pierre."

Allegedly opposing the sending of Canadian troops overseas, the C.C.F. leader makes clear that this is not due to any real opposition to imperialist policy. On the contrary, he appears to be concerned only to obtain the most adequate defense of allied imperialist interests on the Western hemisphere. As against the openly war-mongering policy of the social reformists in the C.C.F. our comrades are participating in the election struggle under the slogans:

"For a Workers and Farmers Government! Expropriate the 50 big shots! For Workers' Control of Production! Down with Imperialist War!"

## How British Trade Union Bureaucrats Deal with Opposition to War

In Great Britain the movement of opposition to the war has become particularly pronounced among local trade union bodies known as the Trades Councils which are similar in structure to our own Central Labor Unions. The opposition springs from the growing realization of the rank and file militants that it is they who-by the decline of real wages and the rise in cost of living -have to bear the burden of a war which is not of their making. Apparently this movement is giving serious cause for worry to the trade union bureaucrats at the top who are, of course, thor oughly patriotic.

Recently they have been going over from work rying to action. What action? They simply instruct local affiliates of national unions under their control on pain of expulsion to withdraw from Trades Councils which have declared their opposition to the war. In other words, they put on the economic squeeze. Thus, for instance, Ernest Bevin, head of the Transport Workers Union, announces in the Daily Herald of December 29:

"Trades Councils that support the 'peace at any price' policy will find that part of the price of their decision is that they will not receive affiliation fees for 1940 from the Transport and General Workers Union. That 'peace' policy is in conflict with the decisions of the Trade Union Congress and the Labour party. The union has a standing resolution to pay money only to Trades Councils and local Labor parties that accept the national policy of the T.U.C. and the Labour par-

Since then, the branches of the Bevin union have been instructed to withhold fees from the Glasgow, Aberdeen and Edinburgh Trades Councils. Such blackmail may deal a temporary blow to the workers' opposition to war. But only a temporary one. For the plan of the Chamberlain government to squeeze a major share for the cost of the coming war year from the pockets of the workers will undoubtedly give it a new impulse. The next wave will only be more embittered because of the dastardly steps taken to stem it.

## Government

**Just What Happens** On Election Day?

Election Day next November will be pointed to with pride by defenders of the "American system" as convincing proof that "genuine democracy" prevails in this country. On that day, they will argue, the adult population, of its own free will, without coercion and by secret ballot, selects its own chief executive, together with the other major officials who govern the nation. In the case of the Presidency, all citizens over 21 years of age may vote for anyone he wishes who is native-born and more than 35 years old. What further evidence could be required to show that the people rule themselves, that they have the kind of government which the majority wants to have?

Universal suffrage and the secret ballot are, in truth, precious rights, and no Marxist will advocate abandoning them; on the contrary, the problem in this country is rather to extend them so that they will apply in fact to all, and not be restricted as at present through various kinds of racial and property disqualifications. Nevertheless, a very little examination of what happens on and before Election Day will be enough to show that universal suffrage and the secret ballot are in themselves powerless to guarantee a full and genuine democracy.

### How Do Names Get on the Ballot?

The Presidency is the decisive political office in the United States today. The extension of the power of the executive branch of the government during the past two or three decades gives it in practice the controlling power over the most important political and social issues, including power to involve the country

On Election Day, though theoretically free to vote for anyone we wish, the ballot actually prints the names of electors for only from two to five or six candidates for the Presidency. In many if not most States, only two candidates—those of the Republican and Democratic parties-appear on the ballot.

How did those names get there? If the people have no real say about what names they select from on the November ballot, or what policies the men named stand for, then the pretended freedom of choice in November is largely an illusion. It would be like telling someone he is free to select any card he may wish from a deck, but then constructing the deck so that it contained only two's and three's

The decision about the two principal names to appear on the November ballot will be made at the national conventions of the Republican and Democratic parties, to be held in June and July. Preparations for these conventions are now going rapidly forward. Beginning next month, a series of primary elections will be held in many States to select the convention dele-

It might seem that through these primary elections. the people should be able to control the work of the conventions, and thus decide whose names go on the convention ballots. This is not at all the case. The delegate slates at the primary elections are publicized as if they were men pledged to Roosevelt, Garner, Dewey, Taft, or whoever it might be; but, with the exception of only one or two States, the pledges are not binding. The delegates are in no way responsible to the people who voted for them; they may do anything they please at the conventions. They are almost always hardened machine-men, ready to do whatever they are told. The public pledge to one candidate or another is only a temporary device to attract votes and interest.

So much so is this the case that many of the chief candidates do not even bother to enter slates in the primary elections. Senator Taft, for example, high on the list of Republican possibilities, is steering clear of public primary battles. He is lining up delegates quietly, behind the scenes in the club-houses and com-

Some years ago, many liberal reformers thought that direct primaries for convention delegates would break the backs of the corrupt political machines. A majority of States introduced them. Experience showed that they were seldom a handicap, and often an additional advantage, to the machines. In recent years, several States have abandoned direct primaries, and gone back to the standard method of selection by the State party committees.

Indirectly, of course, popular feeling influences to some extent the selection of candidates. A convention, unless it wants to cut its own party throat, has got to pick a man with a certain amount of mass appeal, who can be put across to the voters. But it remains a fact that in the United States today there is no serious and responsible democratic control over the major political parties and, through them, over the personnel and policies of the government.

#### A Labor Party and Democracy There is no mystery in this fact when once we

understand that the existing parliamentary and party machinery in this country has as its object not merely or even primarily to express a certain (very minor) degree of democracy, but to limit and restrict democracy within narrow and closely guarded borders. These borders are defined by the property relations of capitalist economy and the interests of the owners of

Inside those borders, some democracy is permissible, at least until capitalism in order to save itself is compelled to resort to fascist totalitarian politics. Outside those borders, attempts at democracy become-"subversive agitation." The parliamentary machinery, the "two-party system," are designed to defend those borders, and thus to limit democratic control by the masses in such a way that it cannot interfere with capitalism.

These general considerations indicate one reason why it is so vain to hope that the workers can ever 'use' either the Democratic or Republic parties to achieve their aims: by their very nature these parties are anti-working class, and workers support them

only at the cost of making their own aims impossible. For the workers to get anywhere on the political arena, the first step has got to be to break out of the framework of capitalist—that is, anti-working class politics; specifically, in this country, to break away from both the Democratic and Republican parties, and build a workers' party with a workers' program and workers' candidates. If this isn't done, the choice in November isn't worth the time it takes to walk to the polls. A vote over who is to be warden is not very crucial when the real problem is how to get out of jail.
