# THE MONTESSORI PRINCIPLES: By Muriel Matters

IV.—SENSORIAL EDUCATION.

We say that under the Montessori Method the children become independent and spontaneous observers of their environment at an early age. That this, if it became widespread, would be of inestimable value to humanity is daily apparent to us, for we witness the inability of most people to look at things through their own eyes; in a word, to stand upon their mental feet. This condition makes people easy prey to unscrupulous "pillars of society"; and the cause is mainly, we think, to be sought in the hitherto irrational method of education.

The most striking evidence we have that people -irrespective of class or circumstance-are illeducated is their response to the banal utterances of an unscrupulous Press worked on gramophonic methods. We ask: "What chance would a Northeliffe or a Bottomley have among a people whose nature, mental and spiritual, had risen to the heights of their ultimate destiny?" It is our conviction that St. John did not deceive us when he said-"Beloved, now are we the sons of God, but it doth not yet appear what we shall be." And there are others, too, who have caught a glimpse of our true heritage, not the least of whom is Maria Montessori. This heritage is to be realised state, as the charlatans have promised, with the proviso that the life of eternal bliss is to be the reward of a well-behaved, submissive life on If there is "no choice save darkness or rebellion,"we choose the latter state, knowing well that when the people reach their full stature, in spite, and not because, of the assistance of these pillars of society," the Bottomley or the Northcliffe pottage will not be accepted by the people in lieu of their birthright, nor will the official Christian faith, which supports the Governments instead of overthrowing them, have power to chloroform the people's soul.

The thought that depressed Whitman depresses us: "There is something profoundly affecting to me in seeing large masses of men following blindly after some man who does not believe in men." Then we turn to our little men, and faith in the promise and dignity of humanity is born again.

paring for direct and independent observation by the fine discernment of stimuli always increasingly the training and refining of their senses, thus bringing order to their minds from the chaos of teeming stimuli in the world around them. This bringing of order out of chaos gives a substantial foundation in their consciousness, and they go forward making their own discoveries.

We are concerned with this question of formation above all, and Horace Mann's words are with us always: "Where there is anything growing, one former is worth a thousand re-formers!" If from infancy the child become accustomed to judge, compare, and select (and working with the Montessori material one sees this power develop), it is clear that he will more likely than his father was before him be proof against those men, who believe not in men, but in machines.

The phrase, "Government of the People," etc., is the travesty we know it to be this day because of the absence of the people. The people, and all that the words mean, the will, the purpose, the full expression of our teeming populace, have been swallowed up to further the aggrandisement of the few. Whither has the spirit gone? Blown like the flame before the wind out of the hearths and homes to disintegrate in the army of destruction. here on earth, not postponed to some far future. The women hunt in queues for food, and meanwhile we concern ourselves with the future—the race that is marching forward, despite the present gloom, on the feet of the little children.

> We present to the children material, in a series of concrete objects, which serves to educate their senses, at an age at which there is naturally a rapid acquisition of the most varied sensations. Therefore this is the educable age, for there is taking place within the infant the formation of an inner organism in response to the stimuli offered by the outer world.

> We shall not deal with the question of the technique employed in the sensorial education of the child—this can be studied from Dr. Montessori's books. The main idea to be grasped by those interested is-that sensory education comes by the child himself practising a sensory exercise. When the child begins to persist in repeating an exercise, then-and not till then-does he give play to

These, ranging from 21 to 5 years, we are pre- the whole of his nervous system, and this leads to similar.

> To reach this stage of sense refinement the child has drawn on his inner powers-attention, concentration, and reason, leading finally to selection. His mental content—the sensations taken from the environment-form, as it were, the armoury of a mental construction. By such auto-exercise

he accustoms himself to reason upon, and to choose from the truths which the world, his world, offers. As he comes closer to the truth, say in the small matter of whether two shades of colour are similar or whether they vary slightly, he is bound to analyse, to compare, and finally to decide. Will this not help him later when he deals with other matters of greater import, individually and socially?

We believe this early training to be fraught with greater possibilities than we yet know. We believe that such a training will protect man from the illusions which come so easily when there is not the inner guide, and that it will enable him to withstand the snares strewn across his path by man's exploiters in their varied guise.

But as these little men become conscious of their own power, they must be helped to exercise their power, not on others, thus perpetuating the evil, but on themselves.

# WORKSHOP NOTES: By W. F. WATSON

THE SHOP STEWARDS' MOVEMENT IN

FRANCE.

The "Times" Engineering Supplement for March 29th contains a remarkable article from an engineering correspondent on the French Shop Stewards' movement. The Shop Stewards in France have been reporting to their T.U. branches business which crops up in the factories, and the French Minister of Munitions has issued a circular pointing out the irregularity of such conduct.

The purpose, states the circular, of appointing shop stewards in the works is "to facilitate the relations between the workmen and the managers. Their functions must therefore be exercised only within the factory and no echo of workshop business must escape outside. . . " The duty of shop stewards is to do their office with complete independence and they must report only to the workmen whom they represent.

The circular also directs Labour controllers to enforce very carefully the instructions of this circular prohibiting the formation of Shop Stewards' Committees, and expressly forbids mobilised workmen, who are shop stewards, to belong to such an association. In comment, the correspondent says: "The perspective in which this circular exhibits the institution of shop stewards is the more instructive because it is presented by such a Government. It expresses a desire for a function in industry for which as yet no equivalent has been suggested in this country." The first business of shop stewards in Britain," says the correspondent, "is to keep the T.U. branch constantly informed of whatever is going on in the shops." The article concludes by saying: "French opinion would not lightly repudiate the symmetry by which our shop stewards are linked up to their Trade Unions, and the fact that

it has done so is perhaps a hint that the representation it expects shop stewards to undertake is consistent with the real interests of the workmen and necessary to those of industry."

The object of the circular is quite clear. The French Government, recognising and fearing the growth of the shop stewards' movement as a menace to capitalism, are doing all they can to stem it by localising its activities. If they can prevent all communication between one shop and another, thereby preventing any unity of action, they can crush any manifestation of shop activity.

Of course the "Times" wishes the British employers to emulate the French Minister and the editorial comments are really illuminating. These state that in this country the shop steward is primarily a man selected from the workmen to take note of what goes on, and report to the District Council; but that "of late there has been a disposition in many shops for the stewards to claim a greater independence of action; whereby the contest between the parent bodies and those who in their original function were its officers has given rise to embittered disputes and sometimes even to strikes." This is quite true. It is the inevitable result of reactionary officialism driving the workers to transfer their industrial organisation from the branch to the workshop. Further than that, the new shop stewards' movement will and must be apart from the Unions altogether and, eliminating all barriers of craft and sex, will ultimately usurp the industrial functions of the Craft Unions, leaving those organisations as relics of mediævalism, merely administering "goose club" benefits. The "Times" then re-states the functions of the French shop stewards as outlined in the circular, and concludes by saying: "Shop stewards of this type, if British employers individually could get

the habit of negotiating with them to mutual satisfaction, might do much to localise and prevent the spread of the infection of unrest which, in the view of many, is fostered and disseminated by shop stewards as known to British industry.

"The British type may be necessary if the French type is insufficient; but British employers might do well to consider whether they could not make a success of the French type." How delightfully naive! How little these scribes know of the growth of the shop stewards' movement!! That movement has come to stop in spite of all the machinations of the organised boss and State. And as for localising its activities, whilst human ingenuity can devise ways and means the workers' committees will not only prevent localisation; but will, by scientific co-ordination, prevent any form of victimisation and will finally obtain the entire control of industry. .

# MORE VICTIMISATION

On March 17th ten fitters, one of whom, Sid Newman, was Chief Convener of Shop Stewards, received their notices from the Hotchkiss Works, Coventry.

The position was placed before a mass meeting of the employees, whereat, after discussion, a deputation was appointed to demand from the management immediate re-instatement on the grounds that it was a clear case of victimisation.

At the interview the management stated that the men were discharged because a certain part of the gun was replaced by a more simple device, which is now being done by women. The management was asked if it were possible to find work for the men in another department. The reply was that it might be possible to place two or three in the Tool-room. Upon being (Continued on back page).

# SOCIALISTS AND THE WAR

Socialists who have been able to keep their wits in spite of the all-but-universal cry, "My country right or wrong," realise that the origin of this War is the desire for capitalistic expansion. The treaties which Germany has forced on Russia, Ukrainia, Roumania, and Finland clearly reveal the German War aims. These treaties have given Germany access to corn lands, mines, and factories in Ukrainia, oilfields in Roumania, and copper, manganese, and oils in the Caucasus. They have also given to Germany control of seaports in the Black Sea, the Baltic Sea, and the North Sea, and railway communications to the East and North. German capitalists had long determined to secure, when opportunity should offer, more raw materials, and greater railway and seaport facilities. These, if they can hold them, they have now gained by conquest.

The Allied War aims have been exposed, not alone by their conquests, but also by the secret treaties which have been published by the Bolsheviks, who discovered them in the Petrograd archives. These treaties have been re-published also in the Dreadnought. By their secret treaties; if and when they were able to realise them, the Allies would gain oil in Persia and Mesopotamia and ports in the Mediterranean Sea, the Black Sea, the Caspian Sea, the Persian Gulf, and the Arabian Sea; also Constantinople and the Dar- foreign politics. The Socialists' strength lies not in and peaceful orientation; he then continues:-

"This, however, would have to be preceded by a change bargaining after all, a matter of give and take at of Government itself. And in changing horses we must be bottom. And what have we to offer the Tory areful. Naturally I should prefer a Labour Government were that possible. . . . What sort of Labour Government should we get now? The Labour Party is only finding its feet in these questions, and for it to step in before the issues are prepared for it would be to commit a blunder even greater than was its decision to join a War Coalition. It would have to face with an untried team a maximum amount of difficulty on a field where its past experience has been most scanty, where it would be easiest for it to come to grief, and where its failure would be most fatal to itself and the country. Every month that passes makes its arrival more probable, and it can afford to wait and use the present governing authorities to pave its way. In face of this it is argued that we should let the present Government go on its further ruin. I do not consider that associated. cynical view to be in accordance with our duty to our people. We have to conserve the salvage, and not stand by and see more of it merged in the general ruin. believe that a policy with peace at its end ought now to be begun; that is why I want to see a change of Government without a day's delay. I believe that a Government can be formed which will have a grasp upon a policy of peace just as firm as any Labour Government which can be formed now, and though it will not suit me for reconstruction, I am willing to use it for the great pressing need of the moment. If such a Government were to ease the Censorship and give us facilities to speak to the Central peoples it would do a service for the time being equal to any that we could do if in office ourselves. The support we should give it would be independent support. We could defend it from Jingo attack and put at its disposal our great international influence, and when it had done its work Whitehall would be ready for Labour. None of us would be very much older when that opportunity would

"Strait is the politicians of the old school? Lord Lansdowne's gate and narrow is the way which leadeth unto record is not inspiring. He was in office either as life." Let us be like the "wise man which built War Minister or Foreign Secretary throughout his house upon a rock," for if we build upon the the Boer War. He was Foreign Secretary in the shifting sands it will fall once more when the rain

"So you have broken the peace. The Russian Revolution was everything to us, too. Everything in Germany was tottering, falling. For months the soldiers of the two armies fraternised, and our officers were powerless to ston it. Then suddenly the Russians fired upon their German comrades. After that it was easy to convince the Germans that the Russian peace was false. Alas, my poor friends!

power some idol with feet of clay? These are the The Editor of the "Socialist Review" speaks of days in which to pray for more greatness and

THE MAN POWER BILL.

country. In Ireland will be massacre and revolt. and scenes more terrible than those of the European battle-fields. Mr. Lloyd George has announced that conscription is to be enforced there as soon as the necessary machinery can be created and put into operation. The Rebellion of Easter Week arose because of the fear of conscription; conscription can only be enforced in Ireland at the cost of a massacre in every street. There will be unprecedented numbers of C.O.s. And conscription is to be thrust upon Ireland without even the definite promise of self-government or Home Rule of any kind. Mr. Lloyd George announces that the much-vaunted Irish Convention, which was never a democratically constituted body, has failed to achieve unanimity, and that the Government will draft a Bill on its own lines. But he adds: "Let there be no misapprehension, the two questions (conscription and self-government) will not hang together."

Obviously the Government Bill will not be acceptable to the Irish people, and the Government will attempt to force conscription upon Ireland by the sword. Only 85 Members of Parliament protested in the Division Lobby. Th democracy will remember this.

For the rest the Man Power proposals raise the military age to 50 or 55 in certain cases, and extend conscription under what appear to be modified conditions to the clergy. The leaders of the Churches, according to Mr. Lloyd George, have agreed to this use of Christ's ministers. Ministers of Religion will now have an opportunity of suffering for their faith on equal terms with lay conscientious objectors. Exemptions are to be cancelled by Proclamation, and Tribunal to be re-constituted. Already the military authorities are sending boys of 181 years to France.

All this, Mr. Lloyd George assures us, is necessary because of the reverses on the Western Front; yet he admits that the Allied forces are already numerically greater there than the German forces and America is pouring in more men. Mr. Arnold Bennett, in the "Daily News," elaborately seeks to prove that the Man Power Bill is unnecessary to achieve victory in the West. But in war millions of lives are recklessly sacrificed and the Government is already sending men out to Vladivostock to support the Japanese troops in the effort to crush out Socialism in Siberia.

The Government's wanton disregard of the lives of British men and the true spirit of capitalist administration have been shown in nothing more clearly than in this embarkation on a new War in the East in order to put down the Socialist Re-

## FLOWERS.-Miss Whitehead. INTERNATIONAL YOUNG AGE PENSIONS.

Dear Friends of Humanity,-In order to relieve the terrible poverty and suffering that is devastating Europe, let us endeavour to place the children and all those who are helpless in comparative safety by securing SEVEN SHILLINGS A WEEK each for them from the State, that we may be free to work for other reforms. At present, whilst they are exposed to cold, poverty and hunger, we can think of nothing else. 7s. a week would ENABLE FAMILIES TO MOVE AT ONCE INTO BETTER HOUSES, and to obtain better milk and food. This would stimulate local trade and reduce expenses of WORK-HOUSES, HOSPITALS, PRISONS and LUNATIC ASYLUMS, and do away with all poor rates to such an extent as to be A GREAT SAVING to the taxpayers, and would enable sensible girls to marry where they would otherwise not dare to do so, and to bring up healthy happy children to become stalwart citizens and parents in their turn, besides relieving untold pain and suffering, and being an estimable benefit to the State.

The fact of a married man becoming automatically POORER at the birth of each child constitutes a cruel wrong to all children, and until each child has 7s. a week in its own individual right, as an infant citizen, suffering, war, disease, and poverty can never be abolished. Let us all demand this from our different Governments Now, before it may be too late.

S. MACKENZIE KENNEDY.

# Advt.

# WORKSHOP NOTES. (Continued from front page)

asked: "Supposing nine men accepted their discharge would the Chief Convener be re-instated?" The management replied with an emphatic: "No." Another mass meeting was called, and it was decided to demand re-instatement of all men by March 22nd, otherwise down tools.

The men were not re-instated, so tools were downed, since when Tom Dingley, a very active worker in the Industrial Movement, and ten others were fined. We have had no further information, so cannot say whether they are still out. But it is another object lesson of the fact that the bosses are straining every nerve to break up our movement by harassing our active workers. The remedy-for every one to become an active worker. They can't victimise the lot. Perfect the Workers' Committee Movement.

# NATIONAL ADMINISTRATIVE COUNCIL.

A National Conference of Shop Stewards and Workers' Committees takes place at Manchester on April 13th and 14th, to consider a scheme of organisation, a programme for Labour, and ways and means of establishing a National Workers' Congress. A full report will be contained in next week's DREADNOUGHT.

LONDON WORKERS' COMMITTEE. The meeting of April 7th at Chandos Hall was one of the most successful hitherto held. Delegates were appointed to the National Conference

to be held at Manchester; to the Conference of Apprentices to be held at Gravesend on April 20th; and to the Conference of Workers' Committees in the Metropolitan area to be held in London on April 21st, at 7 Featherstone Buildings, W.C.1. This conference is convened by the L.W.C., for the purpose of defining areas, and formulating a common ground for co-ordination of activities. Educational classes every Wednesday evening and Sunday afternoon at the office.—T. KNIGHT.

# BARROW IN FURNESS.

The Barrow Shop Stewards have rented a large room at £50 a year wherein they intend to hold all their meetings and to run whist drives. The shop stewards have created a big impression in the town. Three of their number were elected top of the poll in the election of the Co-operative Committee, and it is intended to contest several - more seats at the next election. The stewards are represented on the Food Distribution and Food Control Committees. A very strong stand was taken by the Barrow workers on the J. T. Murphy case.

# CLYDE WORKERS' COMMITTEE.

We regret to learn that the energetic Secretary has been ill of late. We hope to include a report in our next Notes.

PORTSMOUTH.

The following resolution was adopted at a mass

meeting of the A.S.E., held at Portsmouth on March 24th :-

"In view of the meagre pittances doled out to our

sailors and soldiers, this mass meeting calls upon the Government to increase at once the pay of the men of the lower deck of the Navy, the rank and file of the Army, also, the allowances of widows, orphans, wives, and all other dependants of the said men to the same level as that of the Australian fighting forces." But why merely to the level of the Australians?

Why not to the same level as the best paid workers in civil life? Again it is useless calling upon the Government for anything unless you have the power to enforce it. And the best way to secure that power is to organise the Workers' Committee movement and then build up Councils of Workmen, Soldiers and Sailors.

## THE WEST LONDON ENGINEERING WORKERS' COMMITTEE.

Practically all large shops in the district are now affiliated, but we want a representative from every shop. Our paper, "The Record," was in a subtle manner recently suppressed, causing a set back. Had it been a horrible capitalist jingo rag it would still be running. The "Trades Hall" scheme is going well, and promises to be a huge success. Already over one thousand £1 shares have been taken up, and suitable premises are required immediately. Our district has some of the most active workers in the London area propagating our views; may the good work continue. Despite the re-action that has now set in, owing to the German offensive, it is certain that when the fever has again subsided, the workers will, and must, stop the colossal crimes now being perpetrated. A joint Conference of all Workers' Committees in this locality is to be held shortly, when it is hoped a common policy will be agreed

Space does not permit of the recording of details, but possibly in future issues we shall be able to point out some of the numerous successes achieved.

In the meantime, best of luck to the DREAD-NOUGHT, let us hope, and further, let us make Workshop Notes a weekly feature. If the workers were one-tenth as keen on their "Press" as the bosses, what a power we should be !-E. A. C.

# FORTH AREA.

Remarkable progress is being made here, over 1,600 members in three weeks! Am inundated with inquiries from shop stewards of outlying firms in the district, and I can see the industrial army assuming huge proportions. Control from the point of production has evidently caught on and the workers have learned that the craft union methods of dealing with industrial problems must be scrapped. We had Arthur McManus, of Glasgow as speaker at our meeting on March 23rd. He dealt with the history of the "Workers Committee" movement, traced it from

its inception, showing the pitfalls to be avoided, and warning us to be prepared to meet attack from any quarter. We know that a movement is afoot to discredit the shop stewards locally, and steps are being taken accordingly. We have no fear of the employing class now, the Workers Committee movement is a power to be reckoned with. A note worth mentioning; our meeting was "fairly" reported by the local press!

Dreadnoughts sold out, but shall do better still when Workshop Notes appear as some desire is evinced to know what other "centres" are doing. At a certain dockyard frantic efforts have been made to get the workers to adopt a premium bonus or some other piece-work system, but all attempts having failed, a conference has taken place between the "heads" of departments and subordinates to consider another scheme. The precaution was taken of ensuring that no shop steward or other desperate characters were present, and little is supposed to be known outside the "wisdom ring."-E. A. BARTLETT, Hon. Sec., 4 Spring Gardens, Abbey Hill, Edinburgh.

# AN EXPLANATION.

I have got into hot water, and I have been caned. In my article last week I referred to two publicans who had gone into the Engineering industry to avoid military service, and two men who are publicans and who happen to be working in an Engineers' shop have taken umbrage at it. These chaps both volunteered for service, but were rejected on medical grounds. Everyone admires any man who, believing in the war, volunteers to do his bit rather than wait until he is conscripted, and I am sorry that anything I have written should cause these two chaps any inconvenience. . . . .

Who was the Socialist Shop Steward at Walthamstow who shook hands with Geo. Windsor and afterwards said he was a decent old cock?

A correspondent writes commenting upon our reference to Trade Unionism as obsolete. She states she is in a millinery workroom, and although milliners and dressmakers are eligible for membership of the Shop Assistants' Union, has met no one inclined to join. Without retreating a single step from our position that Trade Unions are obsolete, we recommend all workers to join their respective Union and use their influence to change the method and machinery of that union.

We suggest that the Garment Workers is the correct Union for Milliners and Dressmakers not the Shop Assistants' Union. Regarding literature, a study of Webb's "History of Trade Unionism" would be helpful.
