## SHALL SACCO AND VANZETTI DIE ON NOVEMBER 1st?

Innocent Men Face Execution.

On April 15th, 1920, a van belonging to a shoe factory of Braintree was assailed by two persons who, after having killed the driver and paymaster, succeeded in running away with

18,000 dollars. The police did not manage to capture the two men; but, as public opinion in this society of ours must be satisfied, they found two scapegoats (this is a common occurrence in the United States) in the persons of two revolutionaries, Sacco and Vanzetti, notwithstanding that these two men at once cleared themselves by establishing an alibi, as, on the day of the crime, they were away from South Braintree and had credible witnesses to prove what they were doing and where they were. Nevertheless, the authorities insisted on placing them on trial, and although several witnesses called for the defence had proved the alibi, the jury found them guilty and they were sentenced to death on November 1st, 1921. The judge exhorted the jury to show "loyalty to Government," and to " seek courage in their deliberations, as did the

either as murderers, or as slackers and Radicals." Sacco and Vanzetti, on trial for their lives, testified to their political ideals, but denied any connection with the murder and protested against the charge. The public was much impressed when Sacco, before leaving the Court, turned towards the jury and pointing at them with his finger, shouted: "Cowards! you are murdering two innocent men!"

L'Opinione, an Italian paper published in Philadelphia, which, so far from being a Red paper, is actually a Conservative organ, says:-

"The free press, civilian and working-class organisations, Italians and Americans, men and women, raise their voices in defending Nicola Sacco and Bartolomeo Vanzetti, the two Italian workers who, having been arrested on the charge of subversive propaganda, were tried on a charge of murder, of which they were innocent."

The prosecution did not even try to prove that Sacco and Vanzetti had killed with a view to robbery, but only alleged that, as Anarchists, they might have committed the crime they had been charged with by the police.

Another paper, the Minnesota Daily Star of Minneapolis, has an article on the front page by the editor himself, Herbert E. Gaston, with the heading, "When They Will be Dead," in which he says :-

"Probably Sacco and Vanzetti will be put on the electric chair for the murder of the two men belonging to the firm of Braintree. and when they are dead it will be of little importance to ascertain whether they have been guilty or not. As far as the two men, personally, are concerned, the question is settled. If they had been found innocent, they would be dead just the same as if they were found guilty. There has been a jury which has given a verdict on certain facts; but one must do all that is possible to have the two men re-tried, as, during the trial, many faults and mistakes of procedure were made. The jury did not give their verdict on sound proofs, but on the assumption that 'whoever is a rebel, does not go to church, or submit meekly to the exploitation of those belonging to the privileged classes, is, and must be, a murderer, and that if he has not yet murdered anybody, he will no doubt, one of these days kill somebody, and it is therefore better to put him out of the way.' "

The Labour and Socialist movements of both France and Italy are campaigning to save the lives of these two innocent comrades; but the British movement is not yet awake to their position. We all remember how narrowly Tom Mooney was saved from the electric chair, and that, in spite of the monster campaign carried on on his behalf, he is still retained in gaol.

Democratic America has certainly a terrible way with her political opponents, and American methods are all too apt to spread to this country. This is just one of those individual cases where the pressure of working-class opinion may take effect, as it has done partially in Tom Mooney's case.

Will the working-class organisations do for Sacco and Vanzetti what they did for Tom Mooney? These two comrades of our have wives and children who are suffering with them.

A Release Meeting.

In response to the appeal of comrades, a Sacco and Vanzetti release meeting will be held at Osborn Street, Whitechapel. on Sunday week. October 23rd, at 3 p.m., and a march will be organised to the American Embassy.

## LLOYD GEORGE'S GAME WITH LABOUR LEADERS.

By SYLVIA PANKHURST

LABOUR LEADERS TO BE INDUCED TO RECOMMEND REDUCED WAGES IN ORDER TO RE-ESTABLISH FOREIGN TRADE : CLYNES GOES HALF-WAY TO MEET THE PREMIER: LABOUR PARTY BILL

Mr. Lloyd George's manoeuvring with the Labour Party, his expressed desire for a committee of Labour leaders to confer with him, his statement that the Government cannot take full responsibility for solving the unemployed problem, and that workers and employers must cooperate with the Government; all amount to this: Mr. Lloyd George is trying to manœuvre the Labour leaders into a scheme for cutting down wages, on the plea that industries may thereby be continued which would otherwise have to shut down, because no profits could be made out of them if the Trade Union standard of wages were maintained.

Unionism, as it has hitherto been known, and establish instead Wages Boards which will adapt wages in the employers' interests, so that he may compete successfully with foreign rivals and at the same time continue to make what Capitalism considers legitimate profits.

When, during the war, the workers showed signs of taking advantage of the labour scarcity to force up their wages, the Government rushed the Munitions Act on to the Statute Book to keep Wages stationary. Mr. Lloyd George induced Official labour to join in the administration of the Munitions Act and to use all their power and influence to enforce it upon the workers. Will

partially successful.

The much-advertised observation of Mr. J. R. Clynes, M.P., to the King, the other day, that the re-establishment of Britain's foreign trade is the most essential step in dealing with the unemployed problem, shows that he has already gone at least half-way towards the Prime Minister's standpoint. Shades of Keir Hardie who may have difficulty in obtaining it. and the other pioneers who toiled and sacrifieced that the I.L.P. might be; what think ye of this successor of yours? Clynes came into politics through the I.L.P., and now, instead of urging some immediate assistance for the poor Mr. Lloyd George wants to abolish Trade comrades out of work, he tells the Sovereign that the overseas business of the capitalists must be the nation's first concern.

The agreement by the Trade Union in the Cornish tin mines, that the workers shall accept any wages the employers can pay without making more than a certain loss, shows us what we may expect in other industries. The part which Clynes and his Union may be expected to play in Labour's struggle with capital is shown by the fact that his Union is joining in the effort to break up the united front of the workers in the South Wales coalfields, by endeavouring to capture sections of the membership of the Miners' Federation, and approaching the em-

Lloyd George has asked the Labour Party to workers down into the lower depths of economic appoint representatives to confer with him. The Labour Party, standing a little on its dignity It is only too probable that he will be at least just now, has replied by agreeing to send representatives to explain to the Prime Minister its own unemployment proposals.

The kind-hearted people who worked for the establishment of free milk for babies and nursing mothers will grieve and agitate. The crazemongers will say that the milk must be cut off in the interests of "National Economy," to teach thrift to extravagant poor women, and to force lazy and grasping workmen to abandon their claim to Trade Union wages, and find work

#### A DEATH BLOW TO TRADE UNIONISM Union promises to accept whatever Employers'

can pay. Cornish Poverty and Wealth.

The Cornishman says:-"The Workers' Union will put no obstacles in the way of men resuming work at South Crofty at such wages as the mine can offer without making a loss of more than £500 a month. With tin £20 a ton

restart Crofty." Such an agreement is a death blow to Trade Unionism in the industry concerned, and it is a dangerous precedent that may spread from industry to industry.

It is notorious that the Cornish tin mines are in difficulties, and that their present owners, owing to natural conditions, do not find it at present profitable to work them; but in how many industries may that not also be the case to-morrow? Are the workers in all the industries which are temporarily or permanently unprofitable to take whatever the employers may choose to give, abandoning altogether the attempt to secure a living wage and the advantages of collective bargaining and pressure which

their Unions are supposed to secure to them? Surely it is obviously not the duty of the Trade Union to help the employers out of their scrape? It is interesting to notice, as we have already pointed out to our readers, that Herr Stinnes, the well-known German capitalist, is was the main issue of the great coal lock-out, was Dreadnought Office.

expected to buy the Cornish mine dumps, because he believes he can make money out of them, though their present owners fail.

It is also important to observe that this very Herr Stinnes is the same with whom the German majority Social Democrats (the German equivalent of our Labour Party) wish to enter into a Coalition Government. We do not, and we think that this sort of argument is highly obnoxious: so far as it is accepted it helps to retain the workers in a fool's paradise in which they believe that they can get all they want by threats and without any sacrifice. That sort of argument, so far as it is accepted, leads the workers to embark on a fight without weighing its consequences, and without mustering the determination to continue i to the bitter end, however harsh it may be. e beginning of the antagonism between the Soviet Government and the Russian Proletariat

This antagonism became first of all noticeble in a theoretical aspect at the beginning of vear. It was the question of the Russian Unions that illumined suddenly the condictions in the conceptions within the Russian mmunist Party, and led to the sharpest delates, in the course of which, for instance, Rukharin was called a Syndicalist by Lenin. Nearly a dozen tendencies showed themselves of which three soon became distinctly

The Trade Unions were, owing to the manner of the management and administration of proluction (by specialists and functionaries of the Party) condemned to inactivity, and thus brought to a standstill. Their membership, that in March 1917 had scarcely reached 1,500, has, nevertheless, risen to millions.

What was to be done with these organisations? Their former and original object, the fight against the employers, for better wages and working conditions, appeared definitely realised, owing to the abolition of the employers through the Revolution. The dissolution of these organisations, consisting of millions of the proletariat,

The Rochdale Pioneers decided to allocate 21 per cent. of their profits to education. If the English Societies followed this rule, the education fund on their profits of £12,200,000 a year would amount to £320,000. No English Society, not even that which calls itself the Rochdale Pioneers, has done this. The total sum devoted to education by English co-operators does not reach £120,000, it is less than one per cent., and recently was diminishing. Moreover, recreation, teas, picnics, etc., absorb more than a third of the education fund. The development of Cooperation in England has, in fact, been mainly commercial. It purchases direct in Greece and Asia Minor, it has three establishments in Denmark (where it buys £4,000,000 of butter and bacon), one in the United States, one in Germany (at Hamburg), one in Sweden, two in France (at Rouen and Calais), one in Spain, one in Canada, one in Australia. Beside these establishments for purchasing abroad, it has a tallow factory in Australia, and tea plantations in India and Ceylon. In England it has six estates (18,000 acres in all) where it grows strawberries and tomatoes. It will shortly own coal mines. It has two ships trading between Manchester and Rouen.

Nor is there any security in the fixing of minimum rates of wages." He desires the land to be nationalised and also the industry "as a definite public service." He proposes Boards of Control subject to Parliament, representative of the scientific and technical workers' "managerial interests, both land and farming," workers and consumers. These Boards are to select the people who are to run the farms, but it seems the present holders are to remain in control unless found incapable. Apparently private tenantship is to continue side by side with farms held by the Boards. It seems to be a piecemeal scheme to patch things up and produce gradual reform.

### LLOYD GEORGE WANTS YOU TO HELP HIM.

Lloyd George wants you to help him, Mr. Worker.

You helped him to win the capitalist war, and now he wants you to help him win the capitalist peace.

How is it to be done? The capitalist newspapers supply the answer:

"By good will."
Whose good will?

Yours, Mr. Worker. Your good will to help your boss; to tide him over his difficulties; to build up his business for him on a sure foundation, so that it will guarantee him in his old age, not from the "doss house, or the Workhouse—oh, no, do not name such things in connection with your employer—your good will must help him to build up his business in order that he may be guaranteed a suitable subsistence; that he and his children after him may have wealth; wealth that will buy them motor cars, town and country mansions, wine cellars, footmen, butlers, parlour-maids, yachts, and diamonds—all the things that are necessary to the status of the English gentry. Surely your will towards your employer is good enough for that effort, Mr. Workman?

How is it to be done?

By pulling in your belt, of course, Mr. Workman; how else do you imagine that you could possibly have the power to help anyone? By working harder and longer, and eating less.

What Mr. Lloyd George wants, what he expects of you, and what he expects Mr. Clynes, Mr. Henderson, and Mr. J. H. Thomas to tell you you must do, is not to ask for more wages than your employer tells you he can afford to pay.

In short, Mr. Lloyd George want's you to scrap all your Trade Union rates of pay and rules

He does not tell you that plainly yet, because he does not want to give you a shock, or to ruffle you, or upset you, by thrusting his idea crudely upon you. He does not want to annoy you. He believes in conciliation. Therefore he hopes that the suggestion may come, if not from your own Trade Union officials, at least from a joint committee of employers and Government officials, on which your Trade Union leaders are also represented.

Lloyd George believes that when he has told the tale to your officials, as only he can tell it; when he explained "the seriousness of the position" to them, as he has so often done before, your leaders will recognise their duty, and will come out of the Conference Chamber eager to inform you that the only way to stop unemployment is to bring down the wages.

Mr. Lloyd George confidently expects that the star orators of the official Labour movement will presently be stumping the country with his colleagues, fervently proclaiming the great gospel of "More Production" and "Lower Wages."

Mr. Lloyd George believes you are fool enough to swallow that gospel, and he counts specially on the help of the one-time cotton operative, Mr. J. R. Clynes, M.P., who told the King that the first necessity of to-day is to revive our foreign trade, in order to preserve this capitalist country, to which Mr. Clynes has become so exceedingly devoted, since he got into Parliament and tasted the sweets of Government office.

What is your answer, Mr. Worker? Are you going to be sold again?
