PRICE TWOPENCE.

This is a sad anniversary for Soviet Russia. The Soviet Government is still in power, but Lenin himself admits it has suffered a serious economic defeat at the hands of Capitalism.

It has entered into Trade Agreements with capitalist Governments and, in return for an almost negligible amount of commerce, has mortgaged its right of Communist propaganda.

It has agreed to pay the Czarist debts, which it once so proudly repudiated, and in return for placing this crushing burden upon the Russian peasants, it has received a promise that the British Government will give some old war stores, which Lloyd George says are worth £250,000, to the British Red Cross in Russia and that France will give 6,000,000 francs to the French Red Cross.

The Soviet Government has granted concessions to foreign capitalists to exploit parts of Russia, and within these concessions unmitigated capitalist conditions of labour are re-established.

Vanderlip, the American capitalist who has secured a piece of Siberia for 90 years, has boasted of this. Dr. Hammer, for the New York Allied Drug and Chemical Corporation, has secured a concession for one of the richest asbestos mines of Russia, in the ing at the same conference:-Ekaterinburg district of the Urals, for 20 years. British capitalists are still negotiating to recover

the Russian mines once in their possession: they are not yet satisfied with the Soviet terms.

To home Capitalism the Soviet Government has also conceded almost all. Lenin, to the Russian Communist Party in Moscow, said:-

"The Socialist system of State barter for industrial and agricultural products has proved a failure, and has degenerated into ordinary trade. We must face the facts, and must return from State Capitalism to commerce and a monetary basis. A free market has been too strong for us.

"It should be realised that Socialism cannot be attained in the near future.

"We must place ourselves on a purely capitalist basis. This need cause no consternation, as an un-Communistic step. Truly, the strengthening of Capitalism is a peril, but what revolutionary measure has not been perilous? Every step has in it possibilities of danger."

Yes, every step has in it possibilities of danger: we should have preferred facing entailed in adherence to the dangers Communism,

the expenditure to 200 milliard roubles monthly. An increase of taxation and reduction of expenditure was necessary to cover the deficit.

"Ration cards would be abolished as from November 10th. State support would only be granted to children and invalids and workmen of the first category, numbering 146,000, Workmen of the second category, 88,000, would receive from the State neither wages nor food; they must provide for themselves. The billeting of workmen in the houses of the bourgeoisie would cease.

"Up to the present, 4,000 business premises in Moscow had been let. The tramways were paying for themselves, and the receipts amounted to 135,000,000 roubles daily.

"The payment of subsistence allowances to adults had been suspended as from November 1st."

Verily, the glory of Russia has departed: her workers, till lately, assured of a share of all she had, must now shift for themselves as best they-

MORE REALISTS!

William Paul, who, in last week's Communist advocated forming a bloc with the Labour Party, flinches a little from that proposition in his second instalment of "Are We Realists?"

One expected that in his second article he would have elaborated the bloc question: showing how it would work in practice, and how the Labour Party, which has so contemptuously refused the affiliation of the C.P., is to be induced to accept it. But no. Paul has dropped the bloc for the time being, and takes the safer, more popular ground of explaining, as we all know, that the Labour Party will fail to emancipate the workers when it gets into office.

W. Paul says that it is the duty of Communists to simplify the issues, by using their influence "to remove the Labour Party as an opposition to the present Government . . . by making the Labour Party the Government . . . their [the Labour Party's] acceptance of the Parliamentary system and the entire legal, legislative and administrative machinery of the propertied interests can only result in the persimple one: that of sweeping the Labour Party, position. of the way."

which has not formed a bloc with the Labour for the abolition of the Trades Disputes Acts. Party, and which has not taken part in the servile acceptance of the Parliamentary system," will be best qualified to simplify the position and lead the masses against the Labour Party and Parliament? Evidently Paul's arguments have shaken his faith in his own contention of last week. In spite of his Marxian tamely concludes !--

"For the reasons advanced above, and for many others that might be suggestled, the Communist Party must seriously consider the advisability of using its influence to get the Labour Party into power at the earliest possible moment."

ANTI-STRIKE LEGISLATION. Support by Trade Unions.

Readers will notice that our correspondent of the German Communist Workers' Party, whose notes should be carefully read, reports the introduction of anti-strike legislation by the petuation of Capitalism. . . . Thus the Labour German Centre and Social Democratic Govern-Party, as a Government, will not only prove as ment. He reports, also, that the Trade Unions helpless as the present one, but it will become are supporting this crippling legislation as a identified as the Party of Capitalism . . . the "beneficial reform," in order to preserve the political problem of the proletariat will be a Union Funds and their own comfortable

We shall presently see comprehensive antistrike legislation in this country also: perhaps we may see a general unofficial strike, or a spontaneous sympathetic strike in a number of trades before the anti-strike legislation is introduced. In any case, the anti-strike legislation will come as soon as we get an epidemic of references, he has got his argument mixed. He striking, and that will break out as wages get low enough to arouse in the employed the

desperate feeling that they might just as well be unemployed as endeavouring to exist on the paltry wages to which they are being reduced.

In Germany the Trade Unions are supporting the anti-strike legislation, and we shall see the same thing happen here, because the Trade Union officials will fear the bankruptcy of the Unions whose members, owing to reduced wages, compulsory Government Insurance deductions, and so on, will only be able to pay reduced contributions, and will often be reluctant to pay any contributions at all.

The Labour Party Unemployment Bill which proposed to extend State Insurances, was drafted before the present great growth in unemployment, reductions in wages, lowering of Trade Union power and prestige. The Trade Union leaders are short-sighted, conservative, and unimaginative: they did not contemplate this situation a year ago.

Now that their Trade Union funds are substantially reduced and the officials are forced to economise them, they are already setting their faces against strikes, and presently we shall, therefore, see the development of unofficial action: extra Union bodies will rise again; unofficial strikes will occur; the Government will propose anti-strike legislation and Henderson, Clynes, Thomas and all the rest will support the Government plan.

All this will give the impetus to the revolutionary workers' Union.

The single sections of the Third Interopposition.

It would, on the other hand, mean the thorough support of the international measures of the Soviet Government; that is to say, the obligation of propaganda and of most active participation in the building-up of Capitalism 'abroad, and thereby in the reconstruction of international Capitalism. The revolutionary proletariat would have to take up an antagonistic revolutionary attitude towards the proletarian revolution, and would have to utter and obey, instead of the watchword "Sabotage and the Stoppage of capitalist production," the watchword: "The most intensive work on capitalist lines and conditions." The Soviet Government demands this and nothing else.

It would be madness and betraval as well to follow the Soviet Government in the course thus

The aim, immediately to be realised, remains: the abolition of the bourgeoisie and the establishment of the proletarian power of the State. That applies at present more practically to the German proletariat. Only the victory of the German proletariat, in the shape of the conquest of political power, could have preserved Russia from its present fate; could have saved the Russian cial credits on long terms, and to charge home proletariat from misery and oppression by its own Soviet Government.

The Relief for Soviet Russia by the German Proletariat.

No event could have proved so quickly and clearly the truth of these pronouncements as the attitude of the Soviet Government and of the United Communist Party of Germany, in respect of the momentary distress of Soviet Russia. Not another word is uttered concerning, or in favour national, in duty bound, take upon themserves the mediation between the Soviet Governemnt of bourgeois-peasant Russia and the bourgeoisie of the various countries, and induce the proletariat of the whole world to place its labour power at the disposal of capital, under the conditions of profit-making. By doing this, the Third International enters in accordance with its whole theoretic attitude, practically, the service of international capitalism, for the purpose of its reconstruction and consolidation.

The United Communist Party of Germany has, by its manifesto for the relief of Soviet Russia, endorsed its complete political bankruptcy. I will in future refrain from actions in pursuance of the class-struggle directed against the bourgeoisie. It surrenders, already even, the idea of the proletarian revolution. It proposes to the German capitalists a compromise in the way of mutual interests in production. Not the German proletariat is to supply the Rusian workers with the means of relief, but the German bourgeoisie. It openly adopts the standpoint of the capitalist method of production and recognises the need of the means of production remaining the por-

perty of the German bourgeoisie. It begs the bourgeoisie to "grant it commerprice for Soviet Russia." The Russian proletariat is to purchase the means of relief from the By itself the Russian proletariat is too weak to German bourgeoisie; for this kind permission methods. THE STRANGE CASE OF COMRADE STEELE.

A policeman, who admitted he took no notes at the meeting, but wrote his notes from memory, delivered a long and elaborate speech at the West London Police Court on November 2nd. This he declared to be 'the fac-simile of an address given by Comrade John Steele at Hazelwood Crescent. Comrade Steele replied that he was not at the Hazelwood Crescent meeting, but at his favourite pitch in Hyde Park, where his propaganda is so popular and widely known. Several witnesses testified to the truth of Steele's alibi. The policeman alleged that Steele at Hazelwood Crescent had urged men to go to the cenotaph on November 11th armed with walking sticks. The leaders of the unemployed would refuse to turn aside at the bidding of the inspector, and if the police then used teh unemployed must retaliate. Evidently that policeman has a most

A FALSE STATEMENT.

A Letter to Willie Gallacher.

152.Fleet Street,

31 October, 1921. Dear Comrade Gallacher,-It is reported to me by a comrade, who was present, that at a public meeting in the Minerva Café, High Holborn, organised by the London Central Branch of the Communist Party, you stated that I had got myself expelled because someone was willing on that condition to finance the Workers' Dreadnought

W. GALLACHER'S reply to this letter is:-

"You will remember, you yourself said, that the next issue of the Dreadnought would be the last, and the evening following your expulsion, in conversation with McManus and Bell, I offered the opinion that your expulsion had been a tactical error, and said that I felt quite confident, from your attitude throughout the meeting, that the Dreadnought would not go out of existence, but that you were expecting financial assistance, as a result of getting yourself expelled. Of course, it was mere guessing, but I flatter myself that, in view of the fact that the week following, instead of the Dreadnought going out of existence, you sent out wires to your agents that the Dreadnought was going to continue publication, that my guess was pretty near the mark. It was along these lines that I spoke at the Minerva Café, and I may on occasion speak in the same manner again if I consider it necessary in the interest of Communism."

We repeat that W. Gallacher's statement is entirely untrue, and we again invite him to apologise and withdraw.

WILL BRITISH WORKERS FIGHT THE IRISH REPUBLIC?

British workers cannot remain neutral in the probable Irish war.

Every worker who produces, or transports goods that can feed, clothe, or provide with munitions those who are fighting, will be helping in the war.

The Irish war would be fought in the interests of English landlords and capitalists; it cannot benefit or concern British workers.

British workers would have to pay for the Irish war, fought for the benefit of British capitalists, as they are paying, in high prices, low wages and unemployment, for the European war. The Irish war would be long, cruel, and

British Workers Can, and Must, Stop the Irish War.

The Labour Party and Trade Union leaders are sitting on the fence about the Irish war: they urged their members to enlist in the last war, and they supported Conscription and the Munitions Act; but now they all profess to be pacifists: their hearts are in Washington, where 'they hope Lloyd George will represent them, and they all declare that they want the Irish question to be settled without force. Yet they the present distribution of iron in Europe is as support the Government in a policy that must follows:lead to force.

FRANCE THE GREATEST IRON POWER.

Every intelligent person is aware that Britain and Germany fought each other because they were rivals: rivals in trade, rivals in power. Britain's rise to power was largely due to her capacity for bringing labour power to bear on raw materials: Germany's rising position was still more due to that factor.

Before the war, Germany was richer in iron than any other country in the world.

UNEMPLOYED STRIKE.

Our German correspondent also draws attention to the fact that the German unemployed are striking against the work offered them at the Labour Exchanges, on account of the insuffic ency of the doles paid them for such work.

Undoubtedly we shall see the same thing here: already the Government prescribes that work provided by the municipalities for the unemployed must be paid for, at least, during a probationary period, at less than the standard rates. and, in England, the expulsion of Sylvia Pank- Sylvia Pankhurst in an article, "New Tactics," does not welcome the prospect of being sur-Labour Party's policy has always been: "Obey the law, and tell the workers they are to blame for not electing a Government that would change the law." Our correspondent in Germany tells us that the Communist Party is opposing the strike of the unemployed against the work at starvation doles, on the plea that if they do so, the power of the Labour Exchanges will be undermined and Britain and France have been the traditional the unemployed against work at starvation joining in the administration of the Borough promising palliatives, and away from the

While the British section of the Third admits the value of the work done by the industrialists, and murmurs that all tactics are to be used, it conveniently pigeon-holes the industrial policy. somewhere in headquarters, and makes it next to impossible to get any serious work done on the industrial field. The only time when they bother to notice the industrialists is when the Town Council Communists require their aid to pull their chestnuts out of the fire.

The sponsors of the Fourth certainly recognise the importance of industrial action; for, in Gerweapon in fighting the boss class on the political, military, and industrial field. To-morrow your Excellency dispel from the proletariat the vision of an Industrial Republic of the World. The form of organisation propagated by the revolutionary industrial unionists is based upon job committees and job delegates, and this is where the I.W.W. derives its almost unbelievable tenacity.

The travesty of democratic centralisation in sation as the I.W.W., is self-evident.

We see that in Russia to-day, as Capitalism presses hard on the Soviet Government, the Communist Party has to recede from its revolutionary programme, and the Russian Unions of workers controlled by the Russian Government (the Communist Party in majority) are helpless to attack the employers of labour, who are slowly creeping into Russia. If the masses had been industrially organised and conscious, the more Capitalism pressed and grew, the more the workers' organisations would have fought and

It seems to be to-day that the stumbling block to the revolutionary movement is the inability of the revolutionists to group the workers together in such a manner as to force the real rulers, the Industrial Plutocrats (not the political stage managers, with press and pulpit) to give way

before the direct attacks of the industrial army. The I.W.W. refuses to be gulled into believing that the political state is the place where the power lies; it realises that in all countries the political state and its machinery has merely become the camouflage which hides from the workers the force that, slowly but surely, is grinding them down to a depth that the back-

The Labour Party.

Arthur Henderson (Lab.) said Members of his Party were as "loyal" as any others. He challenged Lieut.-Colonel Archer-Shee to explain his charge Landlordism. that the Labour Members were friends of the Bolsheviki, so that it could be met either in Parliament or outside. He added: "We will give the drainage operations to provide employment. Jack Jones again expelled.

Liberals and Tories, and especially Earl Winterton, made interpolations during the speeches as is their wont. Jack Jones, whom the Speaker has often ordered to withdraw for the same practice, said: "Why don't you pull up some of those bounders." The Speaker threatened him with the order to again opposed it, saying it would cost £1,600,000, matters have been communicated to Sinn withdraw; he protested, and finally was made to and even £1,700,000, if 2s. were to be given to Fein, Mr. Lynn (C.U.) alleged by high officials in go out, saying: "Other people can interrupt, but each child instead of only to the first four. The East I Knew (Claudel)

THE ECONOMIC POWER OF SINN FEIN.

If you were living in Ireland to-day you would be wearing a suit of Irish homespun with French buttons, a French hat, or an Irish cap, and probably French shoes and stockings, unless you could happen to wear the one size in which Irish stockings are made: in short, all that you wore would, if possible, be Irish made, otherwise it would come from France, from America. from Germany; in no case from Britain. British goods are prohibited alike by the Sinn Fein authorities and public opinion.

By this method the Irish hope to touch British capitalists through the pocket and to make them realise that an Ireland held in unwilling subjection may be wholly unprofitable.

It may cease to be a source of profit and become merely a costly appendage, with potent power to send up taxation. Hitherto Ireland has been one of the best markets at the disposal of British capitalists; Ireland has been Britain's second largest customer, the largest being the United States of America. As to revenue, in 1919-20, £50,000,000 in taxation was raised in Ireland; of this, £29,000,000 was spent on Irish government and £21,000,000 went into the British Exchequer.

It may be that the boycott policy will have more effect in bringing the Irish crisis to a head than all the fighting. It is only the actual money cost of the fighting, as it is translated into taxation, and the consequent rise in the cost of the commodities he has to sell, which is a near concern of the British manufacturer and merchant: the death of a few thousand Irish workers and British Tommies may sadden him, but he is capable of bearing a great deal of sadness so long as it does not interfere with the course of trade. The loss of some customers across the Irish Channel affects him far more nearly. The same is true of the Ulster merchant: he has things to sell to the rest of Ireland, and his little "Northern Parliament" will be rather a costly one if it means the shutting off of the Irish market.

That is what it means in hard fact; for Sinn Fein has arranged a careful boycott of British and Ulster goods. This boycott arouses the British and Ulster merchants; but how will they act? What do they call on Lloyd George's "Business Government" to do for them? Do they want peace, or war?

A war, you know, is a splendid thing for trade. In war time, the Government becomes the great buyer, the main customer; and what a customer the Government is! No other customer is so lavish, so carelessly lavish, in its expenditure, so conveniently blind to the quantity and quality of the goods supplied. Any old thing will do for the Government, especially in war time, and the only limit to the order is "what you can supply."

Experience of the late war would seem to indicate that a big war, just now, would brisk up trade immediately, save the small employer who is drifting into bankruptcy, drive up the profits of the big Trust, bring work to the unemployed; but the little massacre in Ireland would not be a prosperous first-class war like the last, and there is a limit to the wealth that can be drawn out of even this wealthy country for purely destructive work.

The capitalists would, of course make a good thing out of the war: they would lend some more money to the Government and charge higher interest than they ever got before; they would make some war material for the Government and charge any price they liked for it; but the Irish war would not be big enough to absorb the unemployed. Wages would still be forced down, and the workers would have to meet the cost of the latest capitalist adventure in Ireland. The bad times would be worse than ever for the people on both sides of the Irish Channel. Ask the unfortunate Polish workers how they like being still at war!

Are you going to work for the capitalists, inthe Irish war, Mr. Worker; are you going to send your boys out to fight in it?

What are the workers in your shop going to do about it?
What advice are you going to give them? Do you not think you ought to call them together and decide what you all will do?

The Government cannot make war unless you help it, Mr. Worker.

Our advice is: "Don't!!"
