WEEKLY.

LINES BY WILLIAM BLAKE.

HOLY THURSDAY.

Is this a holy thing to see In a rich and fruitful land— Babes reduced to misery, Fed with cold and usurous hand?

Is that trembling ery a song? Can it be a song of joy? And so many children poor? It is a land of poverty!

And their sun does never shine. And their fields are bleak and bare, And their ways are filled with thorns: It is eternal winter there.

For where'er the sun does shine, And where'er the rain does fall, Babes should never hunger there, Nor poverty the mind appal.

A LITTLE BOY LOST.

Nought loves another as itself. Nor venerates another so, Nor is it possible to thought A greater than itself to know.

And, father, how can I love you Or any of my brothers more? love you like the little bird That picks up crumbs around the door."

The Priest sat by and heard the child; In trembling zeal he seized his hair, He led him by his little coat, And all admired the priestly care.

And standing on the altar high, Lo, what a fiend is here! " said he; One who set reason up for judge Of our most holy mystery."

The weeping child could not be heard, The weeping parents wept in vain; They stripped him to his little shirt, And bound him in an iron chain,

And burned him in a holy place Where many had been burned before; The weeping parents wept in vain. Are such things done on Albion's shore?

TWO SONGS.

I heard an Angel singing When the day was springing: " Mercy, pity and peace. Are the world's release."

So he sang all day Over the new-mown hay, Till the sun went down. And haycocks looked brown.

I heard a devil curse Over the heath and furse: "Mercy could be no more If there were nobody poor, And pity no more could be If all were happy as ye; And mutual fear brings peace. Misery's increase Are mercy, pity and peace."

At his curse the sun went down, And the heavens gave a frown.

Russia To-day.

A comrade returned from Russia speaks as many of these children as possible to a dawn. Now these concessions are being showing special talent are sent from the

We asked the comrade about the "Living Church," which is supporting the Soviet Government against the Czarist prelates. The Living Church, he explained, is organised by supporters of the Government.

The Government is sympathetic to the Living Church, although it would deny any responsibility for the origin of this organisation. It attempts to modernise and popularise the Russian Church sermons, introducing Russian sermons and singing by the congregation.

The comrade knew little of the Workers' Opposition. Its work can only be underground, for all opposition is repressed. The time was an Anarchist paper. In its third issue this paper criticised the Government for imprisoning Anarchists and Left Communists. The paper was immediately suppressed.

There are swarms of prostitutes and beggars, numbers of the latter being horribly deformed.

Nothing is being done for education except in a few centres. The best efforts are expended on some of the orphan children, of whom there are an incredible number. Going south towards Samara, children are begging at all the stations. Children travel without tickets on the trains, riding on the buffers. on the steps, or where they can. They beg from the passengers when the train stops at the stations. Occasionally an inspector turns them off. They wait for another train. Large numbers of them are travelling on foot to Moscow. He replied that he thought so in anti-Church newspaper is greatly boosted by many cases, and cited some startling examples which had come to his notice.

An Anti-Bribery Commission is sitting to counteract this evil, which has been rife in Russia from long before the Revolution.

Those who are working to alleviate distress are everywhere confronted with a great shortage of equipment. Two of the orphan homes waited long for bedding of any kind. Two others were obliged to close their doors to new entrants for two months.

> The comrade replied that he feared the spur of necessity drives the Russian mother to the factory, and that there are no special facilities to lighten her load, except the factory nurseries.

> The American Textile Workers' Union gave machinery and funds to the Soviet Government to set up a textile factory in Russia. The workers in that factory who came over from the States declare they were better off in America. The women especially said they could not manage on the husband's wage, that they also must work in the factory, which was too hard for them, together with their housework. The U.S. Textile Workers' Union has also a factory of its own in Russia, called the Hillman Trust, after its secretary This factory is run at a profit, and the Union draws dividends from it.

I was sent away from parracks because the men were too fond of gathering round me-quick, off you go! with victuals for four days, and 300 marks 3 pfennigs a day for ten days. The food was so abundant that I should have had to employ a porter if I had not given away seven-eighths to my comrades. I arrived in Memel on the 30th, where I

was obliged to stop and wait for money, as it is almost impossible to receive it where I am now-it takes two or three weeks. I happen to have heard expressed some ideas of his, some academic and some bucolic ideas which, I regret, I cannot join in the conspiracy to enable him to carry out. His fate is against him. I shall do my best to frustrate his politics and confound his knavish tricks. That does not take one jot or tittle from the sincerity of the congratulations which I have to offer."

Messrs. Asquith and Lloyd George were less warm in their congratulations than Mr. Macdonald, who specialises in polish.

As to the deportees who were released, he had announced that they had given an undertaking. This they deny. He had said that one deportee had been released on account of bad health, whereas in fact a mistake had been made. Many deportees have lost their employment in consequence. The Government gave no pledge to compensate them for that. Mr. Lansbury (Lab.) told of the illtreatment of fifteen women deportees. He asked in vain whether they would be compensated for their sufferings.

THE SKYE RAIDERS.

Six men of Skye, six men out of 5,000 who have been promised small holdings by the Government and have waited in vain, took the law and the small holdings into their own hands. They have been sent to prison, but have been promised that they shall reap the crops they sowed on the raided land, and that they shall be provided with holdings to work next year. There have been other raids in Skye, Lewis, North and South Uist, Votersay, and so on: nine raids in all in recent years, and in every case the men who have seized, the land have been allowed to keep it, because of the great explosion of public reeling that has been aroused.

The people of the Highlands of Scotland still believe in the old tribal Communism, the memory of which is not dead, in spite of the won from us a strange, mysterious sympathy, Mr. Remer was refused leave to introduce persecution used to drive them from the soil.

> some few men of the Highlands settled on land which had been allowed to go out of cultivation, to grow food upon it. They were imprisoned by the Government, which was giving subsidies for corn growing.

> In 1913 the Board of Agriculture bought land in Skye, to be broken up into small holdings. In 1914 the men who had been promised that land went overseas to fight. Amongst these were the six men now in gaol: Alastair Mackinnon has a wife and two

It was also left to a Tory, Sir Henry Craik, to say that the small holdings system as embodied in Acts of Parliament is not the proper solution for the land problem, and is not reverting to the old tribal land-holding which the Skye people desire. He said:

"I would far rather that the Government had taken it upon themselves to purchase estates and to set these men on free terms on those estates than to sweep more men into this network of holdings, guided by this Board of Agriculture in Edinburgh, with all its narrow bureaucratic views.'

GOVERNMENT.

The dispute between the Russian Soviet Government and the British Government continues. Lord Curzon has accepted the offer of fishing up to the three-mile limit, while affirming that territorial waters extend no further, also the offer to compensate Mrs. otan Harding and Mrs. Davidson, whilst maintaining the thousands of other British claims. The question of propaganda remains at issue. Firstly, there is Lord Curzon's demand that the Soviet representatives be removed. Perhaps there is some conflict of opinion on this point in Soviet circles. Rumours have been circulated by the Press telegrams declaring either that the Soviet Government indignantly refuses the demand, or, on the other hand, that it submits and agrees that other representatives shall be selected in consultation with the British Government. Lord Curzon also demands that the Soviet Government reiterates its pledge neither to conduct nor support propaganda against the British Empire and its institu-

During the San Pedro waterfront strike, the Los Angeles Chief of Police, named Oaks, issued an order to arrest every man on the streets, unless he could prove he was working. Two hundred and sixty men were rested in the first raid, and charged with vagrancy, traffic violation, and criminal syndicalism. They are in prison without bail.

On May 15th Upton Sinclair was arrested there and charged with criminal syndicalism for reading the United States Constitution. Prince Hopkins, Hugh Hardyman, and Upton Sinclair's brother-in-law, Hunter Kimbrough, were arrested at the same time.

They are charged with "exciting discontent and disturbing the peace by discussing, arguing, oreating and debating certain thoughts and theories that are contemptuous of the Constitution of the State of California and calculated to cause hatred for the law," as also with conspiring to create

a riot and blockade the streets of San Pedro. The trial is set for June 15th.

FRANCE PREPARES NEXT WAR.

'If there had been no Washington conference the proportion of our capital ships in relation to those of other Great Powers would have been one to six. Our proportion is now one to three. The Navy we need is a Navy composed principally of fast cruisers and destroyers with a wide range of action and submarines, and we have retained full liberty to construct those units on any scale we desire."—Aristide Briand, ex-Premier of France.

France is preparing the next war. Many people who cling to the present system, afraid of change, will regret that they supported the system which breeds wars, when the next great war breaks out.

IN THE RUHR.

Divided counsels, hesitancy, and lack of belief in what the workers can do without the aid of Capitalist Governments, still handicap progress in the Ruhr. Miners and metal workers, spurred on by grim starvation, are fighting the desperate fight of those to whom existence has become intolerable. The German Government officials in the Ruhr have appealed to the French Commander to allow hem to bring in more German soldiers quell the rebellious workers. They remind the French of the service done by Bismarck to the French rulers when he enabled the French Premier Thiers to suppress the Paris Commune of 1871.

CORRESPONDENCE.

[Copy.]

To the Editor of the "Daily Herald." Dear Sir,—

After having read your sympathetic references to Russia in the "Daily Herald" during the past month. I should like to know the reason for the publication of the disgusting libel on Russia and Communist Sunday Schools in the shape of Max Beerbohm's cartoon, which appears in your issue of to-day.

If the artist had depicted a British dayschool or Sunday-school teacher inculcating the militarism, bloodshed and British Empire jingoism still taught in our schools after the greatest war in history, and the unemployment and starvation resulting therefrom, there would have been some truth in it.

I have read in your columns accounts of unemployed men falling down dead from starvation while waiting for their doles, reports of ten to twenty people crowded into two rooms, and of hunger in the mining districts, but I have vet to learn that Communist Sunday Schools have in any way advocated bloodshed to produce starvation.

Yours for Socialism,

HERBERT COLE.

SPICE.

It will be amusing if the Amalgamated Marine Workers' Union retaliates upon Havelock Wilson by getting a member to secure an injunction for an auditorial examination of his own Union's books. Everyone in the Labour world would like to examine those remarkable documents.

Four flies, united by friendship, lived in a certain house. They awoke one morning with a good appetite. The first applied himself to a dish of milk; but, ere long, he died in convulsions, produced by the chalk that was in the milk. The second found a sausage, of which he partook heartily; but the sausage having been coloured with aniline, the little creature was presently poisoned. A like fate befell the third fly, who had eaten flour containing a quantity of alum. Filled with despair at the sight of his comrades, and sick of life, the fourth fly betook himself to a flypaper in a plate, resolved to commit suicide. He sucked up the liquid greedily, counting on a quick release; but, wonderful to relate, instead of dying, he found himself uncommonly refreshed and vigorous. Even the fly-paper had been adulterated.

Facts on Education.

Observe these facts, fellow-worker; they are of interest to you and yours.

In 1913 5 per cent. of the revenue was spent on education.

If £97,000,000 were spent on education this year, it would form only 2½ per cent. of the revenue; but only £75,000,000 will be spent on education.

In 1913 expenditure on the child in the elementary schools was £4 16s. 4d. per head. In 1920 it was £10 11s. 4d., an increase of only 119 per cent., though prices had risen 152 per cent.

In 1922 the expenditure on education was reduced by £9,000,000; in 1923 it is further reduced by £3,250,000.

Though the Government economises at the children's expense, the parents, in spite of falling wages, are doing more for them; the number of children in the secondary schools has doubled since the war.

Nevertheless, only about 400,000 children attend secondary schools. The poverty of the parents debars the majority.

Salaries amount to 70 per cent. of the cost of education. That means very little is

spent on equipment for the children's use.

There is an average of 44 children per class. Many classes number 65 and 70 children.

Children cannot learn under such conditions.

The L.C.C. will be employing 280 unqualified women teachers for the infants in 1924.

and 600 in 1926.

In the North Riding of Yorkshire one-fifth of the women teachers are unqualified.

Large numbers of qualified teachers are, nevertheless, unemployed.

The Board of Education forbids the appointment of a head master to schools numbering less than 250 pupils

There are 10,000 mentally defective children in the school, and 2,500 mentally defec-

tive children for whom there are no school places.

There are 74,000 physically defective children in the schools, and 14,000 for whom there are no places.

There are 5,000 blind children and 6,300 crippled children, for whom no provision is made.

For 8,780 children qualified and desiring to enter secondary schools, no places are available.

Do you call this your country and the country of your children, fellow-worker?
