

PRODUCTION FOR USE, NOT PROFIT.

VOL. X. No. 21.

SATURDAY, AUGUST 11, 1923

WEEKLY.

WHAT IS "HUMAN NATURE"? By J. R. Morris.

The repeated phrase: 'You must alter human nature before you can get Socialism," put forward by the opponents of Socialism, is due to a misconception. More who use it argue that " mankind is selfish, and always will be," which is, of course, perfectly true. Selfishness is observed to be rampant under Capitalism, but it is not always seen that what is called selfishness is simply the desire to obtain security of existence.

Greed and Capitalism are close relationsthe parents of nine-tenths of the crimes falsely attributed to "human nature."

The selfishness inherent in mankind to-day is due to fear; the desire to acquire more than one needs in order to guard against the evermenacing possibility of insecurity, a contingency continually arising under Capitalism. The fear of unemployment, ill-health, and numerous other evils, induces the workers to get all they can, and a bit over when possible, whilst the opportunity presents itself. They fight one another for jobs, blackleg in which are detestable actions forced upon them by an abominable system, and therefore unavoidable so long as that system operates.

Every possible opening to get something at somebody else's expense is eagerly snapped up. You strive to get to-day more than you require for that day, merely because you may not get what you require for to-morrow.

Capitalism decrees that a section of humanity must go short to create a surplus of labour. Capitalism decrees that the working class as a whole shall have a bare subsistence, in order to compel you to go to work for them. They dare not submit to your selfish (?) desire for a wage over and above that which you can exist upon.

Capitalism could not function without a working class; consequently, wages are distributed consistently with the maintenance of a working class. The one long continual struggle of the workers against starvation is responsible for self-interest—the desire to

look after number one, and devil take the That is the natural outcome hindermost. of a Capitalist system, where every individual is compelled to look after himself in a system of society that is one huge lottery.

The reader may argue that "the Capitalist class, with all its wealth, piles up more wealth because it is selfish and avaricious. A millionaire with every luxury at his command, and with more money than can be sanely spent during the whole of his lifetime, may not care to obtain more. Wealth, however, produces wealth, and the banking accounts of millionaires continue to accumulate at compound interest, whether they desire it or not, and whether they live or die.

The common idea that these accumulated millions should be utilised in the alleviation of poverty and other palliative measures, is an economical illogicality, in so far as it would tend to create an independence in the working classes which would make them refuse to enter the labour market. Accumulation of wealth ends by becoming quite automatic. The capitalists hold on to what they have because they know that to be a slave is hurtful and degrading. They know that the workers are at their disposal, ready to

Life To-day.

give them all that makes life worth living. and give it unstintingly. Human nature is the same all the world over-it struggles to reach a free and full life. You cannot alter Selfishness is inherent in all living things, animal or vegetable; it means selfpreservation—the first law of nature. Every form of animation at the time of birth instinctively searches for that prime necessity, food for self, first. Self, selfish, selfishness or self-preservation are equivalent terms. Therefore, it follows that selfishness is justified up to the point of acquiring that which to human nature is absolutely necessary.

The Capitalist system is so arranged that one class obtains that desired end, whilst one other class participates in a brutal struggle ever striving to reach that goal, economic

the workshops, accept cuts in wages, all of die for them if need be. They know you freedom, which is unattainable to it under the present system of society.

> Under Socialism selfishness will still be the predominating instinct of mankind. You will contribute your share of mental or physical energy in order to obtain the necessities of life, knowing that " he that does not work. neither shall he eat." All and sundry will do likewise, with the consciousness that the fruits of the earth shall be for self and everyone who labours upon mother earth.

> Make it possible for all to have access to the world's wealth production by altering this system, not "altering human nature"-that is an evolutionary process. Socialism will bring out all that is best in humanity. Then human nature will be as you would like it to be-just selfish in order to help humanity.

instance, they prefer rough Scotch tweed People will wear what they like, as they when they like, when economic pressur removed. The community can produce or six o'clock in the evening you can be back plenty of clothing of all sorts.

Mr. Sadler may argue that silk material of which it is difficult to prov unlimited quantities; but cotton, wool linnen can nowadays be made to look alr like silk, and certainly quite as beautiful there is a real scarcity of anything, pe vill not be able to obtain quantities of it le store does not contain silk, people win have to do without it. They must ei take turns or let it be a case of first co first served

When we are all producers in a Commu community, eevryone having the opportur to acquire skill and culture, people will g ashamed to display any marked extravage in dress. Girls will be too intelligent t unhappy for lack of any particular kind of apprentice in the embryo stage. dress. But really there are few girls to who would be so foolish as to mind a triviality

Mr. Sadler further suggests that v Communism too many children might porn. He instances China and India as cor tries where the population seems to him t large. China and India are, however, China nor India are so densely populate together in certain areas there, as they are overcrowded districts.

The richer classes are not those in which of culture and independence is not the one a relatively high degree of comfort, edu tion, and independence, is the woman who has a very large family.

TTERS OF KARL LIEBKNECHT LETTERS FROM PRISON.

cember 11th, 1916—September 8th, 1918. From Luckau, Dec. 11th, 1916.

could not come to see me on Thursday ause you were ill-this I was told after heard that I should be obliged to leave next day.. What is happening to you? rather worried, but I hope it is nothing My transference to this place was ed with great care. We left Anthalt Ukro (on the Dresden line) by the eight ck express in the morning—an hour's side. ourney-and in a quarter of an hour we got n there to Luckau. The prison, an easily ignisable building, is on the high road to the left, about ten minutes from the station. convenient train service, by which one arrives here by ten o'clock, will do nicely for you when you come to visit me; by five in Berlin again.

I am very well; please don't worry about ne. I have a nice large cell with a stove in a big window which I can open when I ike, a table, a wash-basin, and a plate and e, besides fork and spoon.

Only one thing troubles me for the present, and that is having to stay in bed for eleven used to it, so much so that in 1920 you will be pleased by it.

I have been told off to make shoes; I work m my cell. In the first fortnight nothing is expected; in the second fortnight one-third of ity the specified quantity of work must be done; ow in the next two weeks, two-thirds; and after nce six weeks or practice the full quantity must be finished. So now I am a shoemaker's

and after working hours in the week-we may epicurean also. ad and write. It seems that the prison der library is supplied with good books-for inhe stance, there are all the classics. The first volume that came into my hands was, besides too the well-known work of Jeremiah Gotthelf-Uli the farmer-Hermann and Dorothy, with the elegy from which I took the few lines 1 wrote to you a few months ago: Let your words be wise! This century will at last each wisdom to us, who have not been proved by fate. I explained to you the great importance which is given in this passage to Century. In the edition here (the andel edition) 1 found-certainly wronglythe end of the century; Goethe would not have used such a rigid expression.

There is the possibility that I may soon be ble to have my own books here, and also at I may hate my own paper for writing on. Perhaps you will be able to send me a few things soon, as you did when I was in prison on remand. We have a nice large ard for exercise; beyond the walls we can see a few trees and other pleasant things, mong them a peautiful Gothic church in ck, with a magnificent nave. In the yard is a pear-tree and a few flower-beds, nts and flowers, primroses and pansies course I walk there in line with the others We may write only once in three months, save in exceptional circumstances; important family events, and so on. Only the wife, children and sisters may write. The same rules apply to visits.

I hope to have good news of you and the children soon. At any rate, I say, don't erry about me. Of 1,460 days, 38 have already gone; that is, the thirty-eighth part, or about the square root of 1,460.

(Lyrical Composition.)

ment, in the gay flight of hving creature or found happiness may be found therein! the changeful form of a wandering cloud.

in that harrow sky strip, in the early hours of the night, gleams the most beautiful star. the most beautiful star in the firmament appeared, shining out of the great distance of cosmic space, dominating all the sky, clearer, warmer, mightier to me, here in this hole of a cell than ever to you in the world out-

From my strip of sky dropped a falling

You have stolen from me the earth, but not the sky; eevn though it be only a small, narrow-strip, seen through bars of iron, the free soul files towards it, liberated from the bodily senses-freer than you have been, you who think to subdue me with prison chains.

Luckau, January 10th, 1917.

You are all at home again now, with your hist impression at seeing me in this place. now upset you all were, and you yourself especially, to see me behind the prison grator thirteen hours. But I shall learn to get mg. I nope that by now you are all calmer. rou must cam yourselves-you can. And you, too, sweetheart, must not upset yourself at such things, which, after all, do not matter. What does the grating matter; what can it signify to us; to you, to me, to the enfldren? we are still ourserves, and shall remain ourselves, in spite of everything.

Remember to preserve your serently in the difficult moments of life.

These words of Horace are, as you know, In our leisure time—that is, on Sundays a very wise rule of life not only stoic, but

i am quite sure that when you come to visit me again all those things which struck you so paintully will not matter to you any

I beg you all, and you particularly, my poor anandoned little bird, drive these painru, impressions from your mind and remem per only the pleasant things you saw and

Do I not look extremely well? Am I not cheerful, energetic, interested in everything Does not the thought cheer you that I am allowed to-day to write this letter to you as an extra privilege, and that I have been able to procure a couple of books to write in, as well as penciis and indiarubber?

I am not surprised at not being able to receive daily papers; but I am very glad, and so must you be, that I can read a weekly

Did you not notice Luckau? It seems a very bright little town. The chiming of the hours and the quarter-hours comes to me day and night from the great church tower, and regulates my life.

Is not our exercise-yard consolingly large, and full of good fresh air and pleasant views. In that respect it is much better than the yard of the military prison.

Heads up, then! You have all been so brave so far; and I was so proud of you! Now continue so. If it hurts you, bite your lips; everything will go on well, much better than you think

Since November 4th 68 days have passed that is, the twenty-first part of the four years -and altogether I have been in prison eight months and a-half. The time has passed at a furious speed. We are not altogether sepa- can send you nothing but this greeting, these rated. In case of need we can write to each wishes and my kisses; a thousand kisses and other, even if it is not the prescribed time. embraces. I kiss your dear forehead. Be Though you have deprived me of the earth. In very urgent circumstances you can come calm, my love, and strong. "Marvel at t can you not take from me the sky; even to see me when it is not visiting day. This nothing," and "Let the world fall; its ruins ough my eye can reach but a narrow strip should console you a good deal, though, of will find me without fear," and you without

ating, or between the bars of my prison. I am greatly pleased to hear from Helmi conquer in spite of everything. Every best the heavy walls oppress me, it suffices that you are thinking again of giving some wish and many kisses to you and the lectures on the history of art. Dear child, children.

The glad luminous azures from which a don't despise those things, as your words on soft light penetrates here to me, and from Monday seemed to imply. Hold to your inwhich a distant twittering of birds descends. tellectual pursuits as a moral support, as an It is enough, my notice strip, to show me a object of affection, as a substitute for me black, cawing, busy rook, or to recall the during my absence, till our happy times taithful friends of other days of imprison- return and our sun rises again. What pro-

> After much reflection, I advise you to read the prose writings of Lessing (dramas, letters on the new literature, and essays on antiquity). The clearness of his mind, which muminates everything; the force of his diction and the elegance of his expression, the conciseness and efficacy of his style, his sovereign mastery or science and doctrine; all this is fascinating even to-day, and not at all tire-

Read the Laocoon with Helmi; you will enjoy it as well as he; and you will feel arawn closer together.

You must not bear me a grudge if I was cross on Monday because you had not yet looked over the two books of manuscript 1 left behind. You will find inside a particular tolded paper with some notes on my letters and certain forms. Please take particular care of it for me, and don't let it get lost.

And forgive me too, sweetheart, if I was a bit out of temper about the work of annotating the reports of the trial. You must understand that until that is ready for the printer my thoughts are continually on it. I want it to be ready as soon as possible. Think how much work and how much sacrifice I put into it. Must it be in vain? It is costing me so much trouble; and you know that the notes and explanations are most important.

I do not want to worry you; on the contrary, this work will help to tranquilise you. Do not let anyone else talk to you about it, otherwise, the thing will drag on eternally, because others do not understand the need for hurry. Only you understand that, only in you I trust.

Young Franz can help you better than anybody; he is a clever fellow. Therefore I ask nothing of you except to take care of yourself and the children, and of this work, which is my constant thought.

Read my letters very carefully, as we must now weigh and measure every word, having so few words to spare for ourselves.

Each part of all the papers you took away with you on Monday is complete. Leave. them with one of our friends, no matter which; it is all the same to me. . . .

And now I want to talk of you again. mave you made any plans about going away for your health? Just now the weather is not very propitious, but the time will come, will it not? We must think of that as certain; you must not ruin your health, my darling. You know how much I am attached to you, and how nervous I always am about you. If only that could help you! Your ourthday comes again a week to-morrow. You will be alone without me again. I shall think of you even more than in the past; and the winter wind will bring you my kisses and all the good wishes you so well know; wishes, too, for your mother, and Adolph and your sisters, wishes for peace and tranquility, wishes for an affectionate understanding between you and the children, who already love you, and will love you more and

Helmi will grow up strong. Tell him he will get on well in the world; that is the best method of extirpating pessimism. Fight proudly and persistently. Let happen what

Keep up January 18th. Unfortunately, I seen through the meshes of the iron course, it is only for very exceptional cases fear. With this idea before you, you will Your KARL.

WHAT SOCIALISM IS NOT.

The terms Socialism and Communism had originally the same meaning.

They indicate a society in which the land, the means of production and distribution are held in common, and in which production is for use, not profit.

State Socialism, with its wages and salaries, its money system, banks and bureaucracy, is really not Socialism at all, but State Capitalism.

A recent leading article in the "Daily strength of the present social order. Herald " referred to the Port of London Authority as "a concrete illustration of Socialism as a working system.'

A more gross mis-statement could hardly be made. It was a specially cruel mis-statement, since the dockers are on strike against the Port of London Authority.

Mr. Herbert Morrison, secretary of the London Labour Party, and a man of very moderate views, wrote to the "Daily Herald " to protest. He pointed out that the Port of London Authority has a chairman appointed by the Board of Trade, ten members appointed by the Admiralty, the Board of Trade, the City Corporation, London County Council and Trinity House, only two of whom are Labour representatives. These ten members, who might be remotely regarded as public representatives, though most indirectly appointed, are counterbalanced by no fewer than 18 members elected by private capitalist interests, including payers of dues, owners of river craft and wharfingers, the voting being upon the basis of the ousiness

Mr. Morrison declared it unfair to "genuine democratic Socialism" to regard the P.L.A.

'as Socialism in practice." He added, however, this very curious state-

A BARROW-LOAD OF SIN.

We of the Scottish proletariat have received as a heritage a barrow-load of sin." None of us can escape it, and as a result we are always trying to be good. We are always saying that if it was not for "sin" we might ave been well off. All our teachers tell us e same story. Of course it was from our achers we received our first lesson about his barrow-load.

It came about this way: Some 6,000 years go a lady lived in a garden with her husbane and one very fine day a gentleman called God Serpent came along and spoke to the lady He said: "Good day, my lady," and the

Good day, sir."

Fine apples, my lady."

Yes, very nice apples they are," the lady

Why not have one?" said my God But the lady said: "No; we must not."

All nonsense," said the God Serpent; But I am afraid," said the lady.

And with that he kissed her. At the same time he plucked an apple and handed it to

The lady fainted, and when she came to nerself again she found she was naked. And she laughed and laughed, and said to herself: Oh, that was very funny. I never thought

an apple could be so sweet." So the lady went in search of her husband, and she found him in a corner of the garden counting his toes, and she said unto him: "Here is an apple, my lord, and it is so sweet that it you will eat it you will experience the greatest joy in the world."

And he did eat, and, like the lady, he also fainted, and when he awakened he found himself in the embrace of the lady.

He said unto the lady: "What is this thoy ast done unto me? And the lady said: "Did you not enjoy it?" But having tasted sin, he was afraid to

Just then the real God of the Garden came long, and he was looking for them, and He suld not find them, for they were making clothes to cover their nakedness. So He alled unto them:

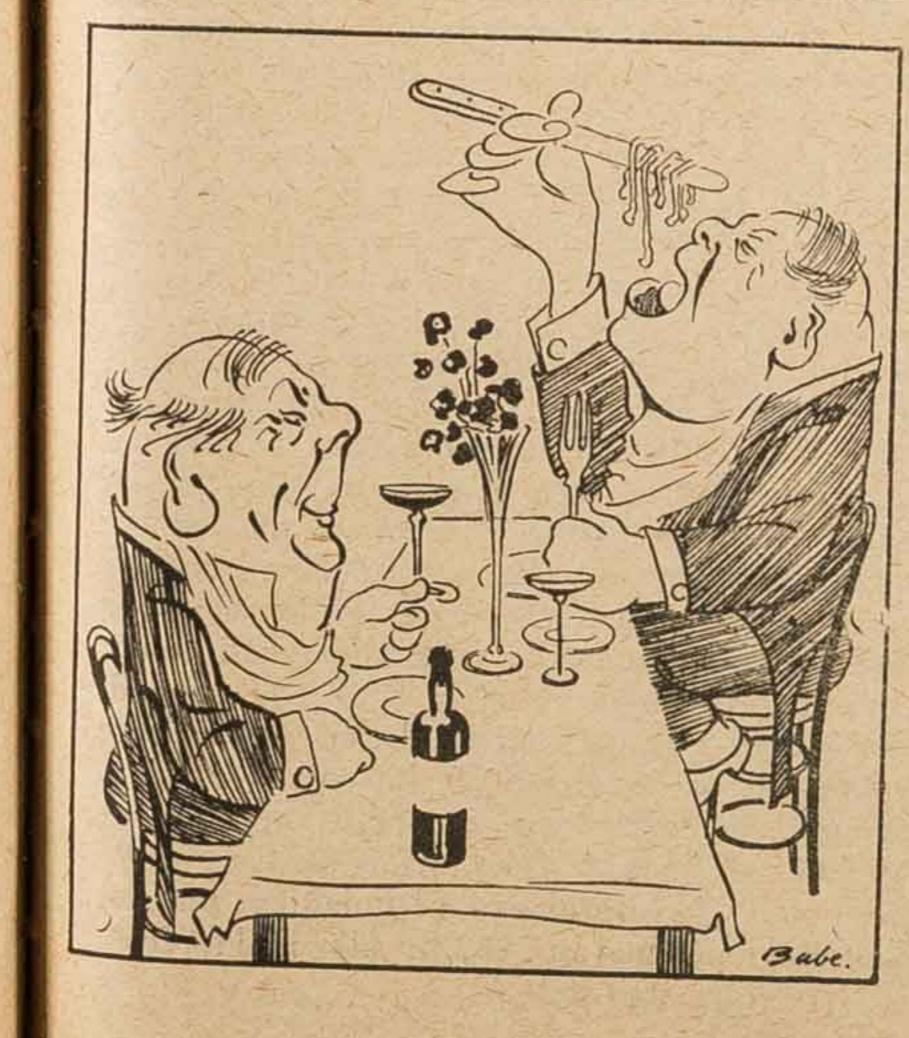

Where art thou?"

And so the lady and her husband came out of their hiding place; and lo and behold, they ad sewn together a number of leaves from he trees to cover their nakedness.

And the God of the Garden said: "Why is this thou hast done?"

And the man said: "The woman Thou gavest me has defiled me. She coaxed me, nd I did eat." And the lady smiled, and said it was the

of the pleasure she had enjoyed, both with -----

Now the God of the Garden was very to find premises of their own. It was imangry, and He said unto them: "Cursed be possible for them to buy a place large enough. woman; in sorrow and travail shall she bring They decided to build, and elected a small forth children."

But the lady only smiled. The thought of the pleasure she had enjoyed, both with low, which was conveniently central to the the God Serpent and her husband, made her Torget the terrible sin she had committed.

And unto the man the God said: "You shall earn your bread by the sweat of your But the man spoke not, because he was

under the thrall of the woman. After that the lady started having children. and so every boy and girl that is born into

the world is born in sin. by the sweat of his brow; it is only we of party and gave entertainments, in order to the lowly Scottish proletariat, for the God of bring in finance. Raffles were organised; the Garden said afterwards we required rich people as well as workers, so he made kings and queens, princes and lords, ladies and fine gentlemen to rule over us.

And later on He sent Jesus, His Son, to die for us, to take away the barrow-load of

But the sin can only be finally taken away when we die; because if you were to take away the sin now there would be no people in the world.

So we of the Scottish proletariat have a barrow-load of it, and we know that it is the will of God that things should be as they are. If it were not for this parrow-load of sin we might have a revolution.

I often wonder what would have happened if that apple had been an orange. One thing I am certain of—there would have been more juice in the story.

The moral of the lesson is, if you want to cod the workers, tell them a story, and put as much sin into it as possible, for it being in their blood, they will love you all the more.

THE COMMUNIST LIFE FOR MUTUAL SERVICE.

Hon. Secretary, A. Hodson, 36 St. Peter's Hill, Grantham.

The first Communistic effort to which we shall call attention in this bulletin is that of the Sheffield locomotive engineers and firemen, who built their own Club and Institute almost entirely by voluntary labour.

LOCOMOTIVE ENGINEERS' CLUB AND INSTITUTE.

Sheffield No. 1 Branch. On December 16th, 1922, there was opened in Sheffield a splendid achievement of Communist effort, in the shape of a fine institute with the above title. As a practical demonstration of co-operative principles, this Club and Institute is unparalleled in this area.

The branch of the Locomotive Engineers' Society, which undertook the work, has had, during the past twelve months, only a membership ranging between 500 and 600

An active group amongst them is composed of believers in the value of independent working-class education, and for the past four years the branch has had classes in economics, history, philosophic logic, and the materialist conception of history. The men who have conducted the branch business have been students at these classes.

During the last four years many schemes have been discused by the local Trade and Labour Council whereby the organised workers could find themselves a club; but it has been left to the locomotive engineers to realise this desire. These ardent Communists have learnt the valuable lesson from their studies, that something more than lip service is required if we are to be successful in overcoming our problems.

These men had no permanent meeting. place for their branch business and study classes. After being bandied about from one place to another, and finding that the less enthusiastic students were not prepared to endure such inconveniences, they determined

committee to give the project a start.

A site was found containing an old bungamen's homes and their work. The property belonged to the Duke of Norfelk. The price was £175, with a long lease on the land. in a comparatively short time £1,300 was raised from among the men, lent free of interest, and without any conditions. The methods of raising the money were numerous and interesting. The enthusiastic ones gave up their savings for the effort. A voluntary levy in the branch of 1/- per quarter was adopted. But every man does not earn his bread The younger members formed a concert paintings, cutlery, etc., were given by various members as prizes. While the men were putting their savings at the disposal of the Committee, they were at the same time giving their labour without payment in demolishing the old bungalow.

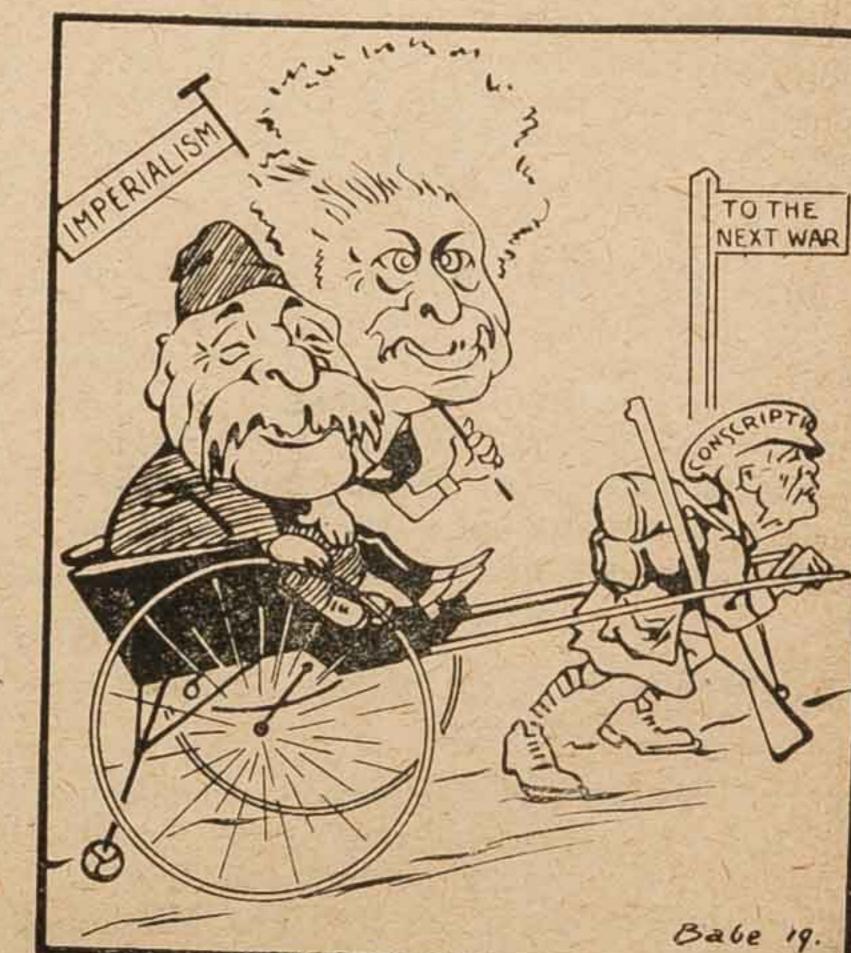

An expert was engaged to draw up the plans from suggestions made oy the committee men. Three bricklayers only were found to be necessary, along with their three labourers (a condition imposed by Union rules). All the remainder of the work was done by the railwaymen when off duty between shifts. Their only motive was their desire to have a Club. The men worked hard and long, with self-imposed discipline under the instructions of the secretary of the committee, who was elected to take charge. All the materials from the demolition were carefully placed on one side, to be used again later when required.

The contractor who supplied the plans entered into the spirit of this co-sperative effort, and advised the men on each purchase of material, all of which was made by the men's representatives. The men freely admit that the work was a sheer delight, and instead of regretting having to go to it, their regrets were experienced when they were too tired to do any more, or when they had to leave off to go to their toil.

Later it became necessary to raise more money. Somewhere about £1,200 was raised by means of loans at 5 per cent. interest. The payment of the interest constitutes the sole debt at the present moment which the Club officials have to meet, and they will

easily overcome this difficulty The work was commenced in December 1921, and the Institute was opened in December 1922. Twelve months of glorious

To-day Sheffield possesses a splendid Institute, comprising a lecture-hall seating 500, a bar, billiard-table, two committee-rooms, library, ladies' room, lavatories, and entrancehall. No Trade Union hall in Sheffield is its superior, and to-day there are a few proud men in Sheffield who know that Communist effort in practice brings a rejuvenation of the soul. Let others copy! The walls are a little

bare, and would be improved by the work of an artist, should there happen to be one who could find sufficient leisure to portray his or her ideas on the interior walls to bring a little more beauty and colour to this great work. All the mance was provided by the I see that the Ministry of Pensions is biology, they have opened a new field of members of the Union. We are all working people here in Poplar, but we have begun to fix our eyes on the class that lives at the other end of town.

We mean that you who never did a day's work in your lives shall work as well as we, for the world is as much ours as yours.

WHAT AGRICULTURE CAN DO. By Peter Kropotkin.

culture can be, and what can be grown on third, of what it is now. a given amount of soil, we must apply for The above examples are striking enough, information to the market-gardening culture and yet those afforded by the marketin this country, in the neighbourhoods i gardening culture are still more striking. Paris, Amiens, and other large cities, and in mean the culture carried on in the neighbourmolland. There we shall learn that each hood of big cities, and more especially the hundred acres, under proper culture, yield "culture maraîchère" under Paris-the disfood, not for forty human beings as they tinctive feature of that culture being replantdo on our best farms, but for 200 and 300 ing. In that culture each plant is treated I think the above lines are sufficient to persons; not for sixty milch cows as they according to its age. The seeds germinate and give your Committee an idea of our aims and do yield in the island of Jersey, but for 200 develop their first four leaflets in especially organisations here. Now if you think neces- cows, and more if necessary. While science favourable conditions of soil and temperadevotes its chief attention to industrial pur- ture; then the best seedlings are picked out at liberty to do that. If not, never mind, suits, a limited number of lovers of nature and transplanted into a bed of fine loam, and a legion of workers whose very names under a frame or in the open air, where will remain unknown to posterity have created they freely develop their rootlets and receive of late a quite new agriculture, as superior to more care because they are gathered on a modern farming as modern farming is limited space; and only after that preliminary superior to the old three-fields system of our training are they bedded in the open ground, ancestors. Science seldom guided them, and where they grow till ripe. In such a culture sometimes misguided—as was the case with the primitive condition of the soil is of little The British Army of Occupation in Cologne Liebig's theories, developed to the extreme account, because loam is made out of the celebrated on August 1st, not some British by his followers, who induced us to treat old forcing beds. The seeds are carefully victory over the Germans, but the British plants as glass recipients of chemical drugs, tried, and therefore give astonishing results defeat of the French at the Battle of Minden and who forgot that there can be no such like those obtained in 1862 by Mr. Halett from science as the chemistry of an organism: that his "pedigre wheat."

the only science capable of dealing with life and growth is physiology, not chemistry.

August 11, 1923.

Science seldom has guided them: they proceeded in the empirical way; but, like the cattle-growers who opened new horizons to us to take from the field one crop every year, our talk about good and bad soils, because on the same space; not £5 worth of hay, but They almost gave up their lives to bring £100 worth of vegetables, of the plainest

do as best they can without him now. by necessity, consume on the average 225 lbs And the boys who came back? Thousands of meat-that is, roughly speaking, a little and Belgium, 3 acres are wanted for keeping If those who live in Piccadilly and Park one head of horned cattle; so that a comwith the help of sewage, in growing 100,000 lbs. of beet on each acre, and occa-

sionally 150,000 and 200,000 lbs. He thus grows on each acre the food of, at least, two or three head of cattle. And such crops are not isolated facts: thus, M. Gros, at Autun, succeeds in cropping 600,000 lbs. of beet and carrots, which crop would permit him to keep four horned cattle

As to crops of 100,000 lbs. of beet, they appears that while we need in this country occur in numbers in the French competitions and the success depends entirely upon good culture and appropriate manuring. It thus 30,000,000 acres to keep 10.000,000 horned cattle, double that amount could be kept on one-half of that area; and if the density of population required it, the amount of cattle could be doubled again, and the area required If we want, however, to know what agri- to keep it might still be one-half, or even one-

among the poorer classes of all sections, races Coloured and White alike. and tribes. Even the dogs that are used as The doctor adds that he hopes the coloured

misery of the native workers, in spite of the says: sweet and fatherly " promises to them of 'the African Idol," General Smuts.

The appeal of awakened workers to the toilers of all classes and races to join in one revolutionary union has been disregarded. The leaders of the coloured races believe every now and then that their remedy is should make common cause with the White very easy to learn. almost within their reach. They fancy that workers: by hiding all revolutionary tendencies and organisations, they will win the favour of the White Government.

When the cup of tears is running over, words of truth escape, however, even from such moderate Liberals amongst the coloured people as Dr. Abdurahman, who, in protesting against the massacre of the Bondleswartz.

"When the small remnants of the Hottentots in South-West Africa were goaded into rebellion by their inability or unwillingness to pay a dog tax of £4 10s 3d.. and were then bombed by aeroplanes and driven into the desert to die of hunger and thirst. To condone this unbridled lust for murder on the part of the Whites, the South-West African Administration is now busy framing excuses to justify the horrible slaughter."

The doctor forgets that the White workers were also slaughtered by the same brutal Government—the issue is not, therefore, one of White versus Black.

The doctor continued:

"With the outbreak of the Great War we once again entertained high hopes that our rights would receive recognition. We proved to the world that, despite our unjust political subjection, despite the insults daily hurled at us despite the condition of industrial serfdom in which we laboured, our people were ready to respond to the call with other non-European races in the Empire. The response was prompt and universal. It was based on that sense of loyalty to the Empire that fills the breast of every coloured man, who was fired with the earnest hope that the Allies would prevail and that the protection of small nationalities would be not only a blazing emblem on their military banners, but would become the heritage and possession of every people of every class, creed and

Here again, was not every worker warned by our class-conscious comrades not to participate in the capitalist war? After the war was not the White worker fooled and betrayed just like the Black?
