# he Putty Users

By TOM ANDERSON. (Proletarian Schools.)

The "putty"-users are the well-meaning reformers who desire to "putty" up the cracks in our social order. Some of them apply the putty through Parliament, others again want to build houses for you; some favour birth-control, others again want you to become vegetarians or spiritualists.

A big section use the putty by telling you "to trust in Jesus." "Try dear Jesus," they say; "He will cleanse you from all your sins." "Only trust Him, trust Him now." This section uses an enormous amount of putty. They have no sooner filled up the cracks and made them quite respectable, when lo! and behold, the putty hardens, and the first storm that blows, the putty all falls but, and thus the cracks are more numerous than ever.

Others again say, "If it were not for drink, the workers would be happy, and everyone would he well off." A good deal of putty is used in this way—nearly as much as that used by "The Trust Jesus" crack-fillers. They have never heard of our 400,000,000 Indian subjects who paupers. But then it is splendid putty, and-what order. more do you want.

Then we have the State Socialists: they use the putty with liberal band; they would give you all "work," and a State suit, the same as the

Post Office slaves. They would brand you with a number, but then you would have work and you on your bread. We have also the "simple lifer." They don't use so much putty as some others, but they say, "It would be grand if we all could live the simple life." It is a beautiful idea, the "simple life." By using this brand of putty, we believe you could bring down the subsistence rate to zero. Think over the idea, my dear fellow wage-slave. If you did not drink, smoke, wear clothes, or if, at least, you wore very little clothing, if you did not rent a box-room, but got hold of an old bag, and went out to the common—if the police would allow you and hopped into it and went to sleep, the cost would be nil. Again, there is no valid reason why you should join a trade union, or a burial society; the parish would bury you. There is no reason why you should get married or go to church, music-halls or cinemas; all these things can be done without, and in due course you would find yourself happier and healthier without them.

Even with all the putty, the cracks still remain as numerous as before. The political landreformer protests that the reason of all the poverty and destitution is because the land does not bear its fair share of taxation, and these get 6d. a day and never drink alcohol. You see putty Socialists say: Tax land values and all you can only drink when it is included in your would be well. They have been using this brand subsistence rate. If it is not included, then you of putty now for fully fifty years, and it has cannot drink. For proof, take our one million not filled up as much as one crack in our social

> So long as you believe in applying putty to fill up the cracks, so long must you endure things as they are. To the crack-fillers the work is quite congenial; but remember that they are not on your plane—they are removed from you ever so far. They don't require any putty for their own special use; the putty is for you.

> All these putty-users are parasites; they may call themselves by whatever name they choose: Labour, Socialist, Christian, Spiritualist, Free Thinker, Liberal, Tory, Salvation Army, Church of England, Scotland, Ireland or Rome; all the charitable and ethical societies are in the same boat, they are all putty-users and parasites. You, my dear fellow wage-slave, are a dumb animal bred and reared in superstition and destitution, and so you quite naturally think that putty should be used.

If you would waken up, if that were possible, there would be terrible consternation in the camp of the putty-users. They know that they are coming it" on your mentality, and whether they be "Come to Jesus" users of putty, Labour leaders, simple-lifers, or Free Thinkers, they

know, right down at the bottom, that they are parasites, and they would tremble if you showed would have some chance of getting margarine signs of life. But then they know you wont, you have been too long "a drawer of water and hewer of coal."

In plain language, they know you are the "bottom dog," the slave, their slave to do their will, and it is beyond the vision of any of the users of putty to think of the world in which there would be no slaves.

"It is God's will." That chunk of putty has filled more cracks than all the others, and this kind of putty costs nothing; but its value is greater than many of the other kinds. Patriotic putty is very cheap: it consists of "Your king and country need you." When they don't, it is simply because the cracks are filled up. Political putty is the freedom your bourgeois gave you some fifty years ago. You can now vote for who you like, and the boss-that's if you have got one-will not know. It is good, is it not, a slave having a vote, a Saviour and a God, a king, and a country! What more could the slave want, you might ask; and the thought might occur to you: Bread! But they cannot get bread, they cannot get bread because they are slaves. That is beyond the conception of God or man.

"And must they remain slaves?"

"Yes, until they secure the Conquest of Bread.' "

Then all the struggle is for bread?"

"Yes."

we require putty.

"I thought that God ruled the world?"

"That's only Christian putty." "How can they get bread?"

"They can only get bread by fighting for it. They must make it a bread fight and leave all the putty-users on the one side. Once the conquest of bread is secured then mankind would start to live and to grow, and none of the putty would be needed."

My dear fellow slave, think this over; it might dawn upon you to throw away the putty and fight for bread.

If you did, we would then get "Bread and Roses," and on that day none would say unto the other: "You should be pure, holy, noble and virtuous," because we would have left the beast stage, and have entered into the kingdom of Equality. The battle for bread would have been won, and there would be no slaves in the land. To-day we are still beasts-everyone of us, and the big ones devour the little ones. That is why

ULVEN. By Ulv Youff. Chapman and Dodd. Five Shillings.

The story of a young pianist who, in the struggle to acquire his art in poverty, contracts tuberculosis. He says:

"The fact that one is a first-class artist guarantees him nothing. After study and struggle, comes the insurmountable barrier, the impresario. One is forced to buy one's career. Concert opportunities are guarded and controlled by enterprising managers whose commercialism amounts to a fine science. New York especially is a glaring exposition of musical graft and crime, so glaring that most people are blinded to the fact.

"Who does not hate a go-between? They are as invincible as Gibraltar and made of even harder stuff. There is no choice, their laws are absolute, and to denounce them means oblivion.

Miss Mayence also was eager upon the subject, and the two arranged to go together. On the way they met Miss Goodman, and when she heard where they were going, she insisted on coming too.

They found a tall boy who seemed as though he had overgrown his strength; standing on a little stool, talking to an earnest crowd of sadeyed men and women, whilst the police passed frequently to drive away those of the listeners whom they considered to be impeding the traffic.

"Who is that nice-looking boy?" asked Miss Goodman, who had never been to a street meeting before; "he seems so young."

"That's Gape," a woman in the crowd answered. "One of the unemployed."

In the last hundred years, since the Rhineland was bartered to Prussia, the Prussian Government filled all the official positions in the Rhineland with men of the farthest Easttern provinces of Prussia, bought over the newspapers, and controlled the Rhenish schools and universities. The people of the Rhineland were thus forced to consider themselves genuine Prussians. High as had been that enthusiasm was the dejection deep when the Rhineland, by the Treaty of Vienna, in 1875, became, quite unexpectedly, a province of Prussia.

The Congress of Vienna.

The delegates to the Congress of Vienna were unable to come to an agreement about the Rhineland. There seemed only one alternative: to let the Rhineland be an independent country; but this country could become nothing save a republic, because its population had never accustomed itself to a king. All the delegates at Vienna were representatives of kings who had fought for their own houses when attacked by Napoleon; they could not vote for the creation of a republic. To make this country a bishopric because some parts of Rhineland were bishoprics could not be agreed to because that would have strengthened the power of the Pope, and so weakened the power of the kings.

# The Case of William Gape

Comrade William Gape is 23 years of age. Born at Ipswich, he lived at Wembley, where he went to school from 1910 to 1915. He then went to Poplar to become a seaman. He worked on the ships in Port till he got a job going to sea, and staved when on shore at Jack's Palace. or Victoria Institute, Poplar, or at Ashburton House, Canning Town. Since 1916 he has stayed in one of the seamen's houses in Poplar when on shore. In February, 1921, he began what has proved a long spell of unemployment. The Guardians said they could not grant him relief till he had been on shore twelve months. From Unemployed organisation, and I say Soderberg February, 1921, till February, 1922, he lived take any part in organising the deputation to that Poplar Guardians granted him relief for

about eighteen months. He had joined the Poplar Labour Party, and moved some resolutions, one of which dealt with the treatment of political prisoners in America. The resolutions were not accepted, the meeting broke up in disorder, and there was a rather heated discussion between Gape and the chairman of the meeting, a Guardian named Sells. This happened on a Monday night. The followingWednesday Gape says that Sells moved on the General Purposes Committee of the Guardians to inquire into the question of his title to relief. Relief was granted one more week, then it was stopped, and the question referred to a later meeting of the General Purposes Committee. Left without money (his insurance dole had long stopped), Gape got diphtheria, and was removed to Brook Hospital, Shooters Hill. His case he got a ship.

The relief; however, was never granted. After discharge from the home Gape was offered the Workhouse or nothing. He went into the House for a few days, but naturally finding it too much like a prison he left. Since then he has existed precariously; given an occasional meal by comrades, and sleeping wherever he can get a free bed. His comrades are too poor, too over-

crowded, to take him in. The Guardians, after granting relief for 18 months, declare that they are basing their present refusal on the fact that Gape has not

# Poplar Unemployed versus Guardians

A DEBATE.

Councillor C. Key, the prospective Mayor of earners paid less than the Poor Law scale. Poplar, having thrown out a challenge to the not a Guardian, alone appeared to speak for purpose.

The case of the unemployed and the views of the chairman are familiar to our readers; we shall therefore devote our space to the defence put up by Councillor Key.

He evaded the point that the Guardians could have got out, once the police had opened the doors for them, without having the unemployed ll-treated, since the unemployed used no violence and offered no resistance.

He failed to see that even lavishly given Poor Law relief would not be an example of Communism: and had admitted that the scale at the best had been too low to keep people healthy. He also failed to notice that in other countries also the masses have passed through a period of faith in reformism before coming to an understanding that the capitalist system must be destroyed: indeed, the attitude of the workers has,

Replying to the charge that the action of the Poplar Councillors in refusing to levy the rate, the political parties, as bulwarks of the counterfor which they were sent to prison, had mainly benefited the great ratepayers, Mr. Key admitted it was true. If the Guardians could get the their purpose is to prevent a proletarian revolumoney out of the big ratepayers without raising tion. Its immediate aims are: the rents they would do it.

This was an admission that Boards of Guardians can do little to help the workers and that the Labour Party can do little more than the Moderates when it gets a majority on the Board.

When that happens the scale of relief Guardians were, therefore, entitled to use force is bound to be made virtually the same throughto get out: the only force they could use was out the country. Poplar does not get a higher Old Age Pension than other places. Those who object to equalisation should not ask for unemployment to be made a national charge.

Mr. Key said that the Labour Party was "not attempting to burst up the capitalist system by disruptive tactics." There was a shout at that: he added "in Poplar alone."

Comrades Soderberg and Mommery emphatically denied that they had walked out of the Board-room behind the inspector, as alleged by Answering the argument that the capitalist some Guardians. #### CORRESPONDENCE.

Dear Editor,

I seldom read a letter that has given me greater satisfaction than Mr. McCartney's in last week's "Dreadnought." He who runs may read and learn from his straightforward outlook on strikes; it should be studied and stand for a valuable guide.

Direct action, organised from the workshop, is the only course possible to ensure success, if an act is wrong we refrain, if it is right we do it.

Allowing overpaid middlemen to step in obscures the issue, and generally scotches a strike.

A traitor is more easily discovered on the premises. Had McCartney's tactics been adopted in the case of the railwaymen, miners and workers in key and other industries, wages could not have been brought down as they have been, for, "automatically" as the key industries cease, the paralysation of the others quickly follows on.

Here is proof that unofficial strikes are effec-

One of the most successful ones was the Chinese seamen's strike, which was won without a trade union, or any organisation, save that of the workshop. Fifty thousand struck for three months, and held solid. A win for the workers of the world! Public sentiment amongst the Chinese was so universally in favour of a strike that it was difficult to recruit from strike breakers; "most of them were obtained from the riffraff of the city jails. | Criminals were given freedom if they would strike-break."

In India the East Indian railway strike was won "despite the fact that there was no union to guide and control the men," so says a Labour paper. I say, because there was no union to

let the men down.

For seven weeks they were solid, and no case of loot or disorder occurred. At Lahore the women went on strike in the same way, and won.—I am, yours truly,

C. G. COLE.
