# Free Women: A Discussion both Humorous and Grave

By Sylvia Pankhurst

The meeting at Tredegar was a lively one.
A thousand people were crowded into the hall
and it is said that as many more were turned

At question time someone asked: "What would be the position of women under Communism?"

I answered: "Women would be free."

A little woman at the back of the hall, who

Afterwards I was astonished to be told by Mr. Thomas that my reply: "Women will be free," had been taken by large sections of the audience to infer that under Communism" Women will be common property."

I had thought myself that the people of the South Wales valleys were an advanced people. How could Mr. Thomas, who was corroborated.

in his assertion by Mr. Oliver Power, imagine

of Mr. Thomas and Mr. Power and caused them mistakenly to see reflections of the ideology of primitive man amongst the present-day population of South Wales, or were traces of primitive savagery still lurking in those valleys in spite of the educative powers of modern industrialism, the Welsh Board of Education and the C.L.C.?

If such primitive savagery existed how was it that the Government inquiry into industrial unrest in South Wales had not discovered it with the aid of Mr. George Barnes, and the other able Labourists who had given evidence?

Make no mistake, the mentality which can imagine that the phrase "women will be free" means "women will be common property" has sprung, unmistakably, from the tradition of the barbarous marriage by capture and the posses-

sion of women as chattel slaves. Could it be that Mr. Thomas and Mr. Power were seriously of opinion that such primitive thought had persisted in the South Wales valleys because the Welsh woman has not passed, like her sisters of Lancashire and Yorkshire, through the mill of modern industrialism, that she has remained secluded in her mountain cottage, whilst her man has gone out to labour : for an employer? Could it be that in the opinion of these local students of evolution the Welsh woman, because, after marriage at least, she is not to any large extent employed in factory wage labour, is still surrounded, in her own eyes and those of her spouse, by the traditions of chattel slavery? Would these experts perhaps declare that I am an emancipated woman only because there circulates in my veins the blood of those Marsden women of Wigan who doubtless worked in the cotton factory and on the pit brow, and of that Browridge woman fustian-cutter who sent her husband to the battle of Peterloo, and of those Brownfield women of the potteries who doubtless turned the wheel for the thrower and trod the lathe for the turner. Perhaps they thought that even I also might fancy myself to be someone's private property if all my foremothers had lived in the shadows of those coal-dusty frowning heights.

To any who can imagine that the words "women will be free" mean "women will be common property," it is evidently incomprehensible that women should be the social equals of men and that a woman should be mistress of herself and no man's property.

If such an opinion were really held in that Tredegar audience it would certainly be a revelation of the persistence of the conception of the slave and the slave owner!

If any people really made that so tragically humourous mistake in my meaning, apparently they consider that if a woman be freed from the dominion of one man she must inevitably fall under the dominion of many men.

To them apparently the husband is the slave owner, who protects his slave from the intrusions of other men, in order that she may belong to himself alone.

Assuming that such persons exist, do they regard all men as hunters, all women as their prev?

Or do they imagine the average woman, in spite of her outward quiet and domestic aspect, is actually pining to fling herself into the arms of all comers, and is only restrained by the fear of the master whose possession she is?

THE VERY PASSING SHOW!

had previously shown considerable excitement, stramed:

Want to be! ARE free: we are as free as we

that the audience had gone away with such a very odd and extraordinary notion.

Had the study of primitive man through the medium of the C.L.C. classes befogged the minds

Both these suppositions appear impossible. Modern workaday men and women are obviously such reasonable creatures that she cannot think such fantastic thoughts of them. Perhaps, howover, our local students will tell us that the sub-conscious influence of the primitive tradition of marriage by capture and cluttel slavery still persists. amongst sections of the South Wales population in spite of the beneficient influences of modern civilisation which our captains of industry have bestowed upon them.

It must be explained that when I innocently used the expression "Women will be free," I was not thinking of the woman of to-day as the sexual bond-slave of her husband; I did not think of her as though she were wearing one of those peculiar girdles into which the mediæval baron used to lock his spouse before setting forth on a journey in order to ensure that she should respect her matrimonial vows. I was thinking wholly of the economic position of the woman to-day.

I was referring to the fact that if the modern woman, the heir of the ages, goes without the requisite cash to the grocer, the baker, or the milkman, she cannot obtain the wherewithal to keep herself and family from starvation, be she never so virtuous, never so worthy. Therefore she is an economic slave of the private property

I was referring to the fact that the modern married working-class woman, burdened with a family of children, whose welfare is dearer than life to her, is the economic dependent of a wageslave, as a rule of an ill-paid wage slave.

I endeavoured to observe, in the hubbub created by the outcries of an excited woman at the rear of the hall, that when the modern working to the factories of her native land to earn her bread, the very fact that sha is a woman ensures to her the poorest paid and the most monotonous and distasteful work. The modern working woman, as everyone knows, is the sweated drudge point of view. "A business Government of the capitalist world in which she and her surely that stunt has already been discredited brother are wage-slaves.

I credit the excited little woman who was shouting at the back of the hall, and all the other women in the audience, whether they agreed with me or not, with too much common sense to imagine that I was advocating or condoning the ilea that women should be "public

The idea is too entirely unpleasant from the woman's standpoint for any woman to assent to it, even in theory. If women were "common property" they would not be free. On the contrary they would be slaves, the slaves of men as a whole and of whatever man wanted to make use of them.

The modern woman, the product of ages of natural selection is too fastidious, too individualist, too much a creature of personal affections. and antipathies ever to assent to a position inferior to that even of animals in their natural

The people who propagated the silly lie about the nationalisation of women in Russia never themselves believed it. They knew it to be inconsistent with human nature.

Someone will ask here: "What of the pros- for delaying Communism.

The answer is that the existence of the prostitute as of the man, or woman who commits murder for gain, is one of the many sal instances of how low men and women will sink in response to economic pressure.

Someone else asks: "What about Free Love under Communism?' The answer to that question must be given another day.

#### MPORTANTI

We urgently suggest that comrades should endeavour to secure new subscribers to the "Workers' Dreadhought" and that they should collect at meetings and from their friends whatever is possible. However small the sum you can collect, it will be welcomed. Send it in stamps or postal orders. The "Dreadnought" is not self-supporting: the editing and managing is unpaid.

## Spice

IN THE SACRED CAUSE OF TRADE.

Said President Wilson: "I have seen fools resist Providence before, and I have seen their destruction, such as will come again upon these anxiety. The Chamber of Mines realises that -utter destruction and contempt. That we shall the above native Union is the only thing which prevail is as sure as that God reigns."

of his chief: "Isolation is bitterly accused of tence. responsibility for America's diminishing commerce and menacing surplus."

A NEW I.L.P. HERO.

Mr. Fenner Brockway protests that the classwar will not be preached in rural districts and that the I.L.P. is "now completing details of a constructive agricultural policy, which justifies Lord Ernle, ex-Minister of Agriculture."

"ELECTION RUSHING."

Mr. Fenner Brockway's statements are literally tumbling over each other: pause a little; Mr. Brockway, to let the brew grow thicker! "If the Government has decided," he says, to rush a general election on December 10th, a more scandalous misuse of power and a more flagrant denial of democracy can scarcely be

Yet Mr. Ramsay MacDonald says that Labour is "straining at the leash."

Haven't they finished writing up your car vass books yet, Mr. Brockway?

A BUSINESS COVERNMENT?

woman becomes herself a wage-slave and goes make of Mr. Ramsay MacDonald's protestation end. Many men were reported to be working that "The Labour Party desires to see the for wages less than December, 1921, rates. finances of the country handled in the way that a real business man would handle them.

We ask the same thing from the opposite white mine workers ignored and despised

VOTE CATCHING.

The John MacLean 'Scottish Workers' Republican Parly got 2,458 votes in the Glasgow municipal election. The S.L.P. got 327 votes amongst three candidates. If those votes could be taken to mean that 2,735 Glasgow men and women were ready for a Workers' Council Communist Republic we should call the number by no means di couraging at this stage.

We are surry to say, however, that we have no proof that the voters have got so far as that ever in thought. The vote really proven nothing; and in our opinion the election merely si le-tracks the Soviet idea:

DELAYING PROGRESS.

I rather regret; in looking back, to see that my efforts were responsible for delaying the crealion of a proper sewage scheme in Stourport for nine months."-Mr. Baldwin, in receiving the Freedom of Worcester.

Such men as this are chosen for honours in the private property State:

Many men should regret their responsibility

## RATIONAL LIVING.

A radical, independent magazine for the workers, devoted to the teaching of rational methods of living in present society, always emphasising the socialeconomical industrial background of wrong living. Stands for prevention of disease, for conservation of health, for drugless healing, and against all swindles in the healing professions. Special price for the readers of the "Workers' Dreadnought," 1.50 dol. (7/6 for 12 numbers). Our famous book, "The Child and the Home." by Dr. B. Liber, on the radical upbringing of children, special price for the readers of the "Workers' Dreadnought." 1.50 dol. (7/6). Address: Rational Living, 61 Hamilton Place, New

#### SOUTH AFRICAN NEWS.

The campaign of the South African Mine Workers' Union to form a coloured section, so that natives on the mines might belong to the Union, is causing the Chamber of Mines great can endanger its power. Hence its fanatical Senator Glass gave point to the above words attempts to stamp the S.A.M.W.U. out of exis-

According to the "Guardian" (Labour paper) the effort to organise the native workers is "one of the most important and far-reaching changes in industrial outlook that has occurred for many

It is the intention of the S.A.M.W.U. to discuss the question of organising the native mine workers at the annual meeting of the general council with a view to the constitution being altered so as to permit of coloured sections being

At the monthly meeting of the central section of the Union, held at the Trades Hall, Johannesburg, the General Secretary reported:

"That a [coloured] mine-boy, representing himself as a delegate from his mine, called at the Union office with a request to be supplied with a quantity of membership cards for his friends, who were ready to pay in

The report further mentions that one of the principal items was the serious reduction in the employment of white miners during the past eighteen months, and the indication that many more were likely to be discharge I after March, The: Daily Telegraph" asks what it is to 1924, when the 10.5 to r ratio comes to an

> The first effect of organisation is bound to be an increase in native wages. Too long have the coloured and native miners. Only when this is achieved will it be possible for the workers to prevent the Chamber of Mines playing off the white miners against the coloured and native miners. It has taken a long time for the Communists to make the white miners see that the coloured and native miners must take their part together in industrial organisation. The Con munists advocated equal pay for equal work, and the acceptance of the coloured and native workers unreservedly and without restriction is skilled cc upations.

> Our aim, which is an international one and one aiming at revolution, is to organise the natives, not only on the Rand, but in the whole of South Africa, in order that they may join up with the proletariat of other lands for the overthrow of the present capitalist system to secure the emancipation of the workers. ISAAC VERMONT.

# The Crossing Sweeper

By TOM ANDERSON. (Proletarian Schools.)

Last Sunday a man came to our meeting just an ordinary proletarian. We had never seen him before. During the service he was deeply interested in every part of it. As the children repeated the "maxims" his eyes seemed to dance with joy, and at the singing of our songs I could hear a deep mellow bass voice blending in harmony with the children's. And so I looked to the part of the hall from whence came the harmony. And there I met the rugged face o the Crossing Sweeper. I knew he was not a "down and out," the face was too bright, he eyes bespoke that courage of men who live. Ou lesson for the day was on "Making Work," ar I cannot do better than give it to my readers read the lesson from our school magazine,

MAKING WORK. "Girls and boys," I said, "let me read you

is short lesson on Making Work." They are going to make work for the men who are not working. They are going to get them to dig great big holes in the ground, the biggest holes you have ever seen; some o

them will be nearly a mile long and nearly some of the most active members, two motor that in depth. Then they will get all the school lorries were hired and about sixty members went. talism. children to come and look at the great big. This resulted in well advertising the U.W.O. and holes that the workmen have made, and the chit- a very enjoyable evening for those who went. dren will clap their hands with joy and shout, Mr. Scurr failed to be present at Poplar last and dance, and sing, and say it's a "topper" week, but he has informed us that he will come

they will look at the workmen who have made in Poplar Town Ha!l from 10.30-5 p.m. the bir holes, and they will find that they are This meeting will be held to revise the rules, give the workmen work. And it so happened on opportunity on Thursday. cil hall, and the light of God shone on his Leauti- pital are progressing favourably. The workmen will think it is work; and as long ers in the U.W.O. as they do so, we are perfectly safe.' And the

The Crossing Sweeper, at the finish of the Town Hall, Poplar. lesson, clapped his hands ever so loud; he was so pleased with the story that many of the children looked round at him. You do not get many Crossing Sweepers with an outlook so keen as that; in fact, you get very few workmen that could understand the meaning of a

simple story like that. We concluded our service, as we always do, by the singing of "The International," and we all stand when we sing this song, because it is our battle-call. And one's battle-call must be sung with courage and reverence. At the finish of the song I said, as is my usual custom, "Good afternoon, girls and boys," and the children of the proletarians reply in no mistaken fashion: Good afternoon, Comrade."

I then went right over to the Crossing Sweeper and said "Good day, Comrade. Did you enjoy our school?" A tear-drop fell from that rugged face, a tear of joy and sympathy, for emotion had taken hold of him. But he brushed the tear away and shook my hand firmly. Enjoy it? I gloried in it. I have -walked four miles this morning to be at your school, because I had read of you in the "Dreadnought." What can I do for you.

I clapped him on the back. "Just work the same as I am doing." But he said 'I am only a Crossing Sweeper." 'So much the better," said. "By the God above and the gods below, what we want to-day is men and women who will work, Comrade. 'And so I have enrolled into our army a man whom the gods have made—only a Crossing Sweeper. And you who read these lines, what are you doing? Are you only digging holes? If so, give up. The harvest will only come as you sow and reap. God only knows them who make themselves greater than the beasts.

## Lessons for Young Proletarians

GEORGE STEPHENSON.

George Stephenson, the inventor of the loco. engine, and also of the safety lamp, was born of working-class parents. His inventions met with father. He had applied himself to learn the determined hostility from the engineers and scientific men of his day. To them he was an to call the chief engineer of the colliery to his outsider, "not one of us." He had not received aid the education of a civil engineer, how then could he teach his betters.

lage of Wylam, near Newcastle-on-Tyne, in a ness to accounts of the exploits of Napoleon, two-storied four-roomed cottage divided between then campaigning in Italy. Hearing from a four families. The house stood on the road be- newspaper that the Egyptians hatched eggs by tween Newcastle and Hexham. In one of the artificial heat, he procured birds' eggs, placed lower rooms George Stephenson and his five them in flour in a warm place in the enginebrothers and sisters were born and lived.

Old Bob, was a Scotsman who came to England but they never hatched. as a gentleman's servant. Mabel, the mother of George, was the daughter of Robert Carr, a dyer He heard of the wonderful inventions of Boulof Ovington. She was a delicate woman: her ton and Watt and that these were fully described neighbours said she had "the vapours," but des- in books, but he could not read, he had not even cribed her, nevertheless, as a "rale canny body." learnt his letters. So he must learn: he went Samuel Smiles, in his "Life of George Sta- to a night school taught by a poor teacher, phenson," gives the following description of Robin Cowens. Stephenson paid 3d. a week Stephenson's father, obtained from an old Wy- for three nights' teaching. At nineteen he was

nailed tegither, an' a bit o' flesh i' th' inside; to be very good at arithmetic. Andrew Robertson, he war as queer as Dick's hatband-went thrice and paid 4d. a week. Robertson was proud aboot and wudn't til. His wife Mabel war a of his pupil, and when Stephenson was obliged delicat boddie, an varry flighty. They war to "fallow the wark" to Black Catterton, Roban honest family, but sair hadden doon i' th'

The father earned no more than twelve shillings a week, there was a shortage of food and clothing, nothing to spare for education: none of the children went to school.

"Old Bob" was a general favourite in the November 11th, was a great success. It was village and "Bob's engine-fire" was the most said by many who attended that it was by far popular haunt there because of the wonderful the best meeting held in Edmonton for some stories that Bob used to tell to those who gath-

Some very interesting questions were asked with his family to Dewly Burn to get work as and a good discussion took place, which mainly a colliery fireman. The family lived there in a

ment. The questions were satisfactorily answered George got work as a cow-herd at twopence and I am sure a number were convinced of the a day. One Saturday night he went with his justification of the U.W.O., its merits, and the sister Nell to Newcastle, and as she was fifteenpence short of the money to buy herself a ship Poplar and Bow Branches were represented. bonnet, George spent several hours holding gen-The committee had arranged to take over tlemen's horses to earn the required "siller."

Such is the education of genius ender- Capi-

In his spare time young George Stephenson, with his friend Bill Thirlwall, modelled engines out of clay from the neighbouring bog, using the hemlocks growing about it to make imitation

Later on George was set to lead the horses at the plough and to hoe turnips for fourpence a day, and later still he worked in the colliery sorting the rubbish from the coal at 6d. a day, raised to eightpence when he was promoted to driving the horse that pulled the coal tubs.

He was described then as "a grit growing lad with bare legs an' feet," 'very quick-witted and full of tun and tricks: indeed there was nothing under the sun but he tried to imitate. George's father was very fond of birds and George also loved them. He did not confine them in cages, but tamed them by kindness so and roost upon the bell head at night. One of his blackbird friends would make its home in the cottage till pairing time, go to the woods to rear its young and then return to the cottage after its young brood had learned to fly.

At fourteen years George was appointed assistant fireman to his father at is. a day.

At length the coal at Dewley Burn was worked out; the Stephensons were obliged to leave their home to "fallow the wark."

They moved to Jolly's Close, Newburn, to work at a colliery owned by the Duke of Northumber!and called "the Duke's Winnin"; and after to "Mid Mill Winnin." From there George went with a young man named Coe to work a pumping engine at Throckley Bridge. His wages were raised to 12s. a week and he told his companions: "I am now a made man for

At seventeen George was made plugman to an engine at Water-row, of which his father was fireman. Thus he was promoted beyond his construction of the engine and soldom needed

Stephenson could not read, but he used to get friends to come to read the newspapers to him Stephenson's parents lived in the colliery vil- by his engine fire. He listened with special eagerroom and turned them every twelve hours. They George Stephenson's father Robert, known as chipped and some of them had well-grown chicks,

Stephenson still continued modelling engines. proud to have learnt to write his name. In 'Geordie's fayther war like a peer o' deals 1799 he went to another teacher, who was said ertson moved with him.

> George had now a faithful dog who used to bring his dinner to him in a tin can tied round his neck. The other dogs used to run after the faithful messenger to get the dinner, but he always evaded them till one day a hig butcher's dog fell upon him. There was a great fight. Stephenson's dog won, but though he still had the tin, the dinner had been spilt in the struggle.

> Stephenson now desired to become a brakesman to the winding engine. He learnt the work from his friend Bill Coe, but his advance was opposed by a banksman called William Locke (father of one of the same name who afterwards became M.P.) Locke used to stop the working of the pit when Stephenson was called in to the brake and pretend that the fault was Stephenson's But his friend Bill Coe exposed the position to the manager, and at 20 years of age George was appointed to the responsible post of brakesman to the Dolly Pit.

## Our View.

THAT HOLLOW SHAM, the general election, is upon us in all its old-time trappings. Tariff-Reform versus Free Trade is the very issue on which the professional politician most dearly loves to fight, because it is an issue that will never be finally settled, whi st buying and selling lasts, and because it does not touch the fundamentals of the economic system. This election will be as futile as any that has

been held since the days of our grandfathers. The Labour Party, lacking a definite policy, will not be able to prevent Free Trade versus Protection being a main election issue, although the workers care nothing at all for the issue.

AFTER SAXONY it was obvious that the Stresemann Government would attack Thuringia because Thuringin, like Saxony, had Thuringia a Social Democratic Government which was Socialist enough to prefer a coalition with the Communists to a coalition with capitalist parties. The troops of the Reich, as was expected, have occupied Weimar and in restoring an order which had not been disturbed they killed and wounded about 80 civilians. The Communist movement is being systematically suppressed.

The Communist-Socialist Coalition, having made no plan to meet such violence, merely sub mitted. Such is Parliamentarism, an affair of resolutions. An overwhelming proportion Saxon workers was supposed to support the Socialist-Communist Government; yet no industrial or other action was used to check this reactionary violence, which was illegal even according to the standards of Capitalism.

THE POSITION in Germany is obviously one of great confusion. A babel of political quacks are voicing conflicting schemes. A clear Communist outline of the life to follow the nightmare o Capitalism, a clear course of ac tion for the masses to follow i order to attain that life, are the great needs, who insists that grey is white because he fear the people may prefer black does but befog and

and economic problem in its widest aspect an indication of economic war if the Empire fails to get its way and a promise of further Im perial Protection to benefit the Dominions.

The Imperial Conference of course declared against any break-up of the German States, both for fear the seceding States might come under French influence and to maintain a Germany strong enough to prove a counterpoise to France. Rooted determination to prevent the real in dependence of Egypt was subtly conveyed by expressing satisfaction that an advance had been made towards "a pacific settlement of this com plex problem, which will safeguard communi-

cations between several parts of the Empire." It was decided that a Treaty signed by repreto return to Berlin gives rise to commit that part of the Empire, and if the all sorts of speculations. APPENDIX.

An Appeal for the abolition of the Prisen System

An endeavour should be made to associate prisoners with other men, to unite them to society. Instead of which they are completely separated from their fellows, excluded from society, exiled from their family. They should be brought to serve the general interest, made part of it, and, on the contrary, they and their they are divided from the interests of humankind by a strict and artificial isolation. - No news is permitted to reach them from the outside world as regards their immediate personal interests; no newspapers (except those giving war news during the war). Ideal interests should be made more accessible to them, infused into them, and instead all intellectual occupation, reading, etc., is granted only as a favour, while it should be looked upon and adopted as a most important means of education and reform. The hours of freedom, not less important for education than the hours of labour, are so short, and are curtailed as much as possible.

cooks and carvers. Take first the roast cook. come by the foul sme'l: Joints are weighed before being put in the oven turned to the carver, who receives a cheque diseases, but they are allowed to carry on. for each portion sold. Those cheques are counted and the remains of the joint are also weighed.

For the joints he receives each cook writes out a cheque, which is signed by the chef and taken to the stores, and everything required is weighed or counted.

find his own white uniform, and pay for its or two later. washing out of his wages.

Wages for cooks (men) to-day, excluding chef, run from £2 to £3 per week, and in many cases less than £2, less it surance. Supplying and keep. ing clean the uniform makes a great drain on wages, thus: White coat to buy, 6s. to 10s.; ditto to wash, 8d. to rod.; white cap to buy, 18. to 18. 6d.; ditto to wash, 3d. to 4d.; white apron to buy, is. to as.; ditto to wash, 3d. or 4d.; trousers to buy, 5s. to 6s.; ditto to wash, 18. to 18. 6d.

A cook's laundry generally consists weekly of one pair of trousers, 1s.; three coats, 23.; two caps, 6d.; six aprons, 1s. 6d.; total, 5s.

The cook must also supply his own knives, etc. The only personal utensil some places supply is a cloth or two called a rubber for holding hot

dishes, pans, etc. Sometimes these are so bally worn that burns and scalds are the result. But still the manage. ment refuses to buy new rubbers, in spite of the complaints about the rotten state of the old

I know some large catering firms where on your engagement you are given a paper which generally runs something like this :- "I agree to terms of engagement, re wages, paid up to the time of leaving. No notice given or required.

Signed, So-and-So. Although this may sometimes work out to the advantage of the kitchen worker who has got another job, one never knows at what moment he is going to get the sack, and sometimes one does not know what it is for.

I have seen four persons sacked at different times in the same day in the same kitchen, and no reason given.

One instance I remember. The manager sent the man's wages up the lift in a sealed envelope, with a message, "Tell him to clear out"; and that was all.

Several large catering firms owning many restaurants and hotels, before the "great war employed all men in the kitchen. During the war they employed women in several grades of work. Now, after the war, there is hardly a man employed in a large number of their kit. chens, simply because women are dieaper than

Women to-day make the fires, clean the kitchen, fetch the coal, cook the food, c'in the silver, wash the pots and pans. It is hard laborious work, fit not even for men under existing conditions.

Women are doing this work for a miserable wage, bad conditions, and disgusting, indigestable "food," and we are told by Sir George Newman, Chief Medical Officer of Health to the Board of Education, that forty per cent. of school children have physical defects, whilst there is definite malnutrition, heart disease, anæmia, deformities in about one hundred thousand children.

## Reward of the Faithful Labourer

The North-East Hants Agricultural Association has just held its autumn show at Alton. This association is representative of the three classe; ENGAGED in agriculture: the landlord, the farmer, and the labourer, and a newspaper report says that at a luncheon held in connection with the show "the goodwill of all classes of the agricultural industry towards each other was apparent." In other words, this is the beginning of the new era of the Capitalist Cooperative Commonwealth.

In connection with the show there was of course a prize-list and the longest section was headed "Labourer's Rewards," I started at the beginning and read:

"LABOURER WHO HAS MAINTAINED THE LARGEST FAMILY RESPECTABLY .- 1. Daniel What else can we expect when women, young Cook (it children, entered by Mr. T. A. Chal-

These are not cattle "entered" by the farmer; I have often seen women faint from the heat mentioned, but heroes-men who have brought working over the washing-up tanks till they workers get sufficient wages to keep it children

respectably, but rewards come to them for doing

Next follows a list of LABOURERS (married. single; shepherds and cowmen) WHO HAVE BEEN EMPLOYED FOR LONG PERIODS WITHOUT INTERMISSION ON THE SAME FARM, OR WITH THE SAME FARMER. G. Spiers, with a period of 51 years to his credit, was entered by Major-General G. D. Jeffreys, Burkham; Wm. Dewey (42 years) by Mr. H. , Lillywhite, Bentley; J. Clifford (24 years) by Colonel W. G. The German Situation

(From the I.W.M.A.)

Since the Government has given up pasive resistance in the Ruhr, the condition of the workers of Germany has become even worse than before. Economic misery is on the increase, and political and social reaction law and the investing of the Government with dictatorial powers. It is no exaggeration to sa, that under the conditions thus created revolutionary elements of the proletariat are the worst sufferers: industrially, because they are the first to be doomed to unemployment; politically, because they have to bear the brunt of the reaction. . . .

The champions of the State idea from the extreme Right, as well as from the extreme Left, Fascists and Communists alike, all vied with each other in denouncing the Syndicilists and charging them with having played into the hands of the French. . .

The " Perliner Tageblatt," the mouthpiece of the industrial barons of Germany, in its issue of September 6, wrote:

"France has a new ally in the so-called Syndicalist movement. It may properly be said that the disgruntled at any price, the disturbers, the lazy and the foreign elements have all gathered in that movement. Its political program, which may be called anarcho-communism, and wheh is antagonistic to Moscow "centralism," plays but a small role. But the more intensively does it propagate impossible economic demands. and it strives to exploit all the dissatisfaction that has inevitably accumulated among the miners. The Syndicalists without exception favour French work, and for this purpose they make use of the bitter feeling entertained by the forces of occupation against the mine owners. All the Syndicalists favour the secession of the Rhine and of the Ruhr from Germany."

"The French hoped for the aid of the Communists, with a view of gaining the support of a certain element of the Party, namely, the "Ruth Fischer wing." But the attitude of the latter was so prejudicial to the position of the whole Communist arty in the Ruhr that at least officially they stood for a united front against the

As a matter of fact, the Communists served e interests of the nationalists and of the Capitalist Government. During the whole occupation of the Ruhr the attitude of the Communists was such as to turn the workers over to the Nationalists. And after the Government suspended passive resistance the Communists exerted themselves to the utmost to prove that they alone are the true defenders of the German "Fatherland." They lost no time in declaring that the giving up of passive esistance was "treason to the German beople." In this regard the Communists are in entire accord with the Nationalists, the Deutsch-voelkisch " (reactionary) and the Fascists, all of whom declare in favour of the continuation of the policy of passive resistance.
