FOR GOING TO THE ROOT.

Vol. X. No. 42.

January, 5th 1924.

WEEKLY.

THE TALE OF AN ISLAND.

A great ship set sail from Britain laden with passengers. Some of these were rich and fortunate; but the majority were poor emigrants leaving their native land in despair of ever gaining a living there.

Among the latter were George and Flora Budd, both of whom had been victimised for their activities in proletarian causes.

The ship proved an ill-fated one. The steerage passengers in their crowded quarters were already beginning to look eagerly and hopefully for the end of the voyage and its hardships when there arose a tremendous gale, in the course of which the vessel was wrecked and its passengers cast on an uninhabited island.

Though now deserted, the island had obviously not long been abandoned. On every hand were signs of civilisation and abundant prosperity.

An eccentric old Scotsman, possessed of great wealth, had lived there for over half a century and had peopled it with servants he had collected from all over the world.

He had installed elaborate machinery and equipment for supplying all the needs, in food, clothing and housing, of a modern community.

Shops there were none, for there was neither buying nor selling upon the island. Its lord owned all, and dispensed all according to his will. He treated his slaves well in regard to their material needs. They were well fed and clothed, their houses were remarkably comfortable, and though simply furnished and devoid of all ornament with never a picture on the walls, their architecture was artistic, and they were fitted with cleverly devised electric and other labour-saving devices, to insure order and cleanliness.

Theatres and other institutions for amusement were lacking, but there was a great hall in which the lord of the island addressed his people, and a great square in which he reviewed them marching and performing exercises he had devised for them.

At eighty years of age the old Scotsman felt the hand of time heavy upon him, and feared that his power over his servants might begin to wane. He had heard of the monkey gland cure, and in the hope of securing rejuvenation thereby, he chartered a great ship and set sail for Paris. He took all the inhabitants of the island with him, lest any should gain authority in his absence, and dispute his power when he should return with the gift of youth to take up his reign again.

Not knowing how long the monkey gland cure might take, he caused his people to arrange matters so that, as far as possible, everything should be preserved from deterioration, and at the same time be ready for immediate use on his return.

The shipwrecked people were, indeed, fortunate in having been cast up on an island so desirable and so well prepared to receive them. Moreover, they had also passed almost unscathed through the wreck. No lives were group of admirers amongst the steerage with him.

passengers, a proportion of whom already looked up to him as a leader.

The comfortable homes of the island were open to all comers. Nothing was bolted or barred. Under the Scotsman's rule there had been no temptation to steal, since everyone had been assured from material want.

The Scotsman had seen to it that his servants should always keep a year's supplies of food and clothing in store, and as we have seen, everything had been placed in readiness for a sudden return.

The catering staff of the shipwrecked vessel found the great kitchens and the common meal rooms all provided with necessaries.

The poor emigrants, who had been crushed by poverty in their own land herded together during the long voyage in the steerage and, finally, drenched by the sea water, and buffetted by wind and waves, declared themselves in paradise. They clothed themselves in the garments with which the bedrooms were stocked, reclined luxuriously in the comfortable beds and easy chairs, ate their fill of the petition, which was displayed by his the smiling landscape.

Moreover, they explored the workshops, the granaries, and the farm buildings, the fields, and the orchards. As workers, they realised that this paradise could not be maintained in its plenteous bounty unless they, the newcomers, would immediately take up the labours that had been laid aside by the workers who had gone. They set to without delay. Men and women turning to the work to which they were accustomed, or adventuring in new directions as need arose. The beautifully devised machinery lightened the toil, and the clearly written instructions posted in every workshop and beside every machine greatly facilitated these efforts.

As to the great ones amongst the shipwrecked company, the new conditions affected them in various ways. Most of these leisured people continued behaving very much as they had always done. Their maids and valets still waited on them from force of habit; the masters and mistresses strolling into one of the dining-rooms of the island to take their meals as if it were a London hotel. They managed to reserve one of the dining-rooms for people of their class by icily cold shouldering any others who happened to approach them, and stationing their servants at the door to drive lowly persons away.

Fearing that some time might elapse before a ship would come to take them from the island, a few of the great and leisured ones had formed themselves into a committee to draw up a scheme for governing the island.

The bankers and merchant princes insisted that the money of old England should be the currency of the isle, and generously decided to place a part of their store at the disposal of the island treasury on condition that its land and industrial plant should be theirs, and its possession assured to them by the govern-

An ex-chief of police had happened to be lost, and no injuries received sufficient to in- travelling on the shipwrecked vessel. His capacitate anyone, save Flora Budd, who had presence was regarded as a tremendous asset, been struck by a floating spar, and remained for his subtlety and resource were recognised unconscious for several days. Happily, to be immensely greater than those of the two George was of a cheerful, philosophical old generals and half-a-dozen colonels and temperament, and never doubted that Flora majors and captains who chanced to be of would soon recover. Happily, too, the the company and who, of course, offered to medical and nursing staff of the ship were able enlist and train an army. It was clear that to give Flora every possible attention, so that strategy must for some time largely replace George, knowing his wife to be in capable force in maintaining the government, for the hands, was free to go about to investigate and old Scotsman had possessed but a small explore. He had gathered around him a armoury of weapons, and these he had taken

The good offices of the church, as a reconciler, would, it was felt, be of vast importance amongst a people whose government would lack powerful means to enforce discipline until a thoroughly obedient police and soldiery had been built up. The office of archbishop was hastily, though irregularly conferred, on a certain popular preacher, who had not many years before been received into the Church of England from the dissenting pulpit where he had become famous. The ship's chaplain and some other clerical persons of various creeds and denominations grouped themselves about the archbishop to form the island church, for it was felt that unity amongst the religious forces would be essential in the difficult days ahead.

A sub-committee of bankers was formed to deal with all questions of finance and taxation.

At the end of a week of arduous toil, the great ones had prepared all their schemes of government. They instructed the captain, who since the anchor was weighed in British waters, had been the recognised leader of the ship's company, to call a meeting of the entire adult population, informing him that though the newly-created archbishop would, on the first occasion, preside, his position as captain should be recognised by making him First Sea Lord of the island's Admiralty. Meanwhile, George Budd had been active in the cause of Socialism. He had appropriated an old shed as a meeting room, and hung therein the red flag which he had brought from England and had tied about his body, as a talisman, when the ship was wrecked. He had considered hoisting the flag from the roof of the shed, but decided that to do so might arouse antagonism and prejudice the cause. His most cherished possession, a volume of Marx's "Capital," he had also saved from the wreck by wrapping it in his waterproof and lashing it to his body when the ship struck. He now concealed the book under a board in the floor of the shed; and constructed an impromptu reading desk, on which to lay it, when he should bring it forth for his first Socialist meeting.

As soon as the captain's proclamation calling a meeting to adopt a government for the island was posted, George Budd increased his activities: he rushed about amongst the proletarians getting them to sign a petition for the rights of free speech, free press, public meeting, adult suffrage, and vote by ballot, explaining that these rights were the indispensable pre-requisites to future agitation, and that they must endeavour to secure them when the constitution was formed.

When the meeting summoned by the captain assembled in the great square, George had gathered a little group of enthusiasts about him and had made a banner embodying his demands, which was displayed by his

George's fame as a Socialist agitator had reached the great ones: they feared he might prove a dangerous influence. The largest banker, a suave and shrewd negotiator, offered on behalf of the great ones' committee to accept George's demands, as part of the proposed constitution, provided the committee's proposals were accepted without other amendments. George accepted this offer with enthusiasm. He congratulated himself on the result of his zeal, and so did the great ones.

Great changes were immediately instituted. The common dining-rooms and other large buildings were turned into government offices.

The rich men, to whom the great ones' committee, now the government, had sold the industry and the land, now went round to the A small reserve of unemployed was thus the chief requisite in capitalist industry. Work Bill.

Our View.

LABOUR PARTY FOREIGN POLICY. into office, it should-

(1) Treat Russia "with friendly generosity." We suppose that means give the Soviet Government de jure

ground that Mr. Asquith "is committed to Holland would also permit the dumping of directions and have tremendously advanced the

party leader and ex-premier?

Such a programme would show that the quantities." Labour Government desired to make an advance on the capitalist parties, not merely to go only so far as the capitalist politicians

are willing to commit themselves. Nevertheless, we do not think a Labour Government with a minority of seats could accomplish even so much as Mr. Brailsford

MR. MACDONALD ON FATAL DECEMBER.

Mr. Ramsay MacDonald's speech at Elgin was extraordinary in many ways, but in nothing more so than in his version of the effect of the Government's failure to resign in December. He said:

"I don't know how many of you understand the technique of the House of Commons; but a Government that comes in in the middle of January is a Government that months' expenditure and for the Budget tied round its neck like a millstone. If you are going to change anything, you are going to change it in December. After December it is too late. Great schemes of expenditure make alterations by creating something like of the Party.

we come in or the Liberals come in, Wing propaganda or any alternative to the it is of the greatest importance that official propaganda is made by the Third Interbefore a Government meets the House nationalists themselves in a much more rigid of Commons the heads of its Departments and intolerant way than has been shown by Allies as Austria was, as Germany will be. of their Departments and know what is More far reaching than such decisions of thinking as a beneficent measure. These

dealing with the unemployed. . . . debates in the House of Commons."

Mr. MacDonald by his explanation of the situation, as he sees it, has certainly uttered a very striking condemnation of Parliamentary Government, as he alleges it is practised at the initiative in harnessing the tides of the Westminster to-day.

Nevertheless, though we are prepared to of electric power. believe that Ministers are puppets in the hands The fact opens up great vistas of progress of the permanent officials, we do not believe and foreshadows the emancipation of mankind they are quite such utterly helpless puppets as from the necessity of delving in the bowels of Mr. MacDonald asserts.

introduction of the New Economic party, them from the Philistines. have now forced the present Government of Russia to face two alternatives.

"The first, according to M. Dan, is a the new and the remnants of the old bourgeois dream of this. The second alternative, he declares, is a liquidation of Communism which will be made by a new party, which will support the interests of the working masses. This is feared, and is being opposed by the Bolsheviks.

"Capitalism continues to exist in Russia, but it is Red Capitalism (said M. Dan). The Bolsheviks . . . wanted no rich and no poor. But at first all became poor, and then later the speculators and the Communists became rich. The Bolsheviks promised to do away with the aristocracy and bureaucracy, but they only took the epaulets from the shoulders of the officers and put them on their sleeves. The governing classes have merely changed in Russia. . . . The Russian revolution has not developed a proletarian Government, but it has developed a new bourgeoisie. The workers have gained nothing. . . A monarchy will never return to Russia. That is out of the question. The Bolsheviks hope to be able to restore the rights of private property in such a way as will permit them to retain what they have gained through the revolution. Their's is a new aristocracy which is determined to hold on to what it has cap-

Such an utterance from such a source cannot be taken without reserve. Nevertheless, we must aver that the documents published by e Soviet Government's own representatives have long led us to the conclusion that Russia is rapidly reverting to complete Capitalism and developing a highly pernicions form of Governmental tyranny.

The one great question conveying the seeds of hope is, What prospect is there of a new movement for freedom and pure Communism amongst the Russian massles?

E. SYILVIA PANKHURST.

SAD PLIGHT OF EMIGRANTS TO CANADA.

Numbers of men who have emigrated from bondage is revolution. to any relief centre.

THIRD INTERNATIONAL CONTRO-VERSIES.

Dissension is evidently growing fast in the Russian Communist Party. Boris Souvarine, in the French Bulletin Communiste, discusses

the question. Observing that a section of the Russian Communist Party demands the immediate re-election of the various party committees, Mr. Boris Souvarine says: "The Executive resists this exaggeration and remarks it will not do to break up everything." He adds that one must not throw out the bather in emptying the water from the bath.

Mr. Souvarine also refers to the workers' opposition of the Communist Party. He admits this group repudiates the tactics of the United Front and the New Economic Policy,

because it considers itself to be as infallible as the Roman Pope.

Our concern, the care of the Russian working man for the future, about the achievements of the October Revolution, is declared

counter-revolutionary.

We, the workers' group of the Communist Party of Russia (B), declare before the proletariat of the whole world that Soviet Russia is one of the greatest achievements of the international movement. We, therefore, sound the alarm, because the Soviet State, a power of the proletarians and of the October victory of the working class of Russia, is threatened with the danger which we will defend against with all our energy, against every attempt to overturn the Soviet power. We will do so, even though we are sent to prison and deported in the name of Soviet The recent dock strike is a very good example. power.

If the ruling group of the Communist Party of Russia proclaims our anxiety about the fate of the October Revolution to be illegal and counter-revolutionary, then you, revolutionary proletarians of all countries, and particularly those belonging to the Three International, express your impartial opinion after reading our manifesto. The attention of all proletarians of Russia, who are anxious on account of the dangers threatening the great October Revolution, are directed upon you, comrades! We do not put before you great demands. We desire that you speak at our meetings about our manifesto, and make it a point that the delegates of your country unroll before the 5th Congress of the Third International the question of Soviet politics of the Communist Party of Russia and its policy within the party. Discuss, comrades, our manifesto and make resolutions. Know it, comrades, that, in this manner, you will help the working class of Russia, worried to death and exhausted, to save the achievements of the October Revolution. And our October Revolution is a part of the world revolution. On to work, comrades!

(To be continued.)

Unemployed Workers Organisation.

With deep regret, during the past few years we have witnessed the gradual decline of what could have been a most powerful weapon in the hands of the working class—the Trades Union Movement.

The theory of industrial trades unionism at its inception was one of the finest conceptions born of working-class brains. Alas! we find to-day, after many years of attempting to materialise, the theory a number of "clubs" up and down the country called trade unions These have failed miserably to give expression to a tithe of the actual meaning or objective of the Industrial Trade Union Movement. Trade unionism, as we know it to-day, has failed ignominously, and, therefore, these so-called trade unions do not justify their existence.

There are numerous reasons which can be attributed to the failure of trade unionism. Let us take one common reason, which is the excuse we invariably get when we are trying

to organise men.

the highly-paid official. The men say: " Why should they give high salaries to a number of officials who always seem to let us down at the moment of crises." That is an excuse; the men fail to see that they should be the union and not hand over their power to a few "leaders," to be used or abused as they wish. High-salaried officials have been the primary cause of the disruption and failure of the movement. A man comes from the workshop, gets a job in the union; after a time he is elected to a prominent position with a pay-roll running into hundreds a year. What happens is what has happened: the surplus cash which the official is in possession of is invested, it goes into the industry which the owner knows about. This has happened in seamen's unions, railwaymen's unions, and various other unions.

So we have the leaders opposed to any suggestions of strikes, as it would interfere with their dividends.

There are about 1,200 different trade unions in Gt. Britain, which is by far too many There can be no unity of the working class while they are divided so. It is rare that two or three parties can agree on a common point, so we cannot expect 1,200 parties to agree. The reason for so many "unions" reverts again to salaried officials. Each union, large or small, has its own set of paid officials, and in the event of a fusion a number would lose their jobs. Therefore, before there is any talk of one big union for industry, we have a large number of biased, unreasoning enemies.

As the unions are constituted one can quite constitutionally and legally scab upon another. The lightermen were authorised to strike by their union. The goods which they transported, particularly oil, was being carried by road in motor-lorries driven by men who were trade unionists, but were not ordered to strike. Perhaps it was not in the interest of the

"leader" to order them out.

The fatal blow which is leading to collapse was struck during 1921-22, when the wages of workers were being ruthlessly attacked. The men were prepared to fight but were held back, and consequently let down by the

men they trusted—their officials.

The members have lost all power in their unions. They have handed themselves, their destinies, their power, over to a few officials, thereby giving great power to these individuals who use this power for their own self aggrandisement, as detrimental to the welfare of the rank and file and workers' cause. The present system of Industrial Trade Unionism has proved to be futile, therefore, we must construct a trades union which must be a success. This can be an Industrial Union of Workshop Committees.

The first thing which is needed is propaganda. We must point out to the workers the necessity for organisation, unity and solidarity. Organisation is essential and necessary; we must organise in order to present a bloody revolution, which will inevitably occur unless the workers are prepared.

For a trade union to be a success we must present to the workers a real rank-and-file democratic organisation, which will be so constituted that if officials are necessary they will receive no more wages weekly than the average member receives. This will prevent them apeing in the interest of the boss, buying shares, etc.

Only a few industrial unions are needed. The transport section, for instance, would be a combination of workers which would embody sea, road, rail, and river workers. This alone would sweep away a large number of petty unions.

These big unions would be so constituted that the power would always be in the hands of the individual members, who would be the deciding body on all subjects. This would give the men the stimulant they have long been needing. Each would be able to take an active part in the union affairs, and as it is expected from them to control their own destiny, naturally they would take an interest in their own affairs.

No large dues are necessary to run a big They complain (and quite right, too) about industrial union. One penny per week per member would be sufficient.

No great expense is necessary to start these Workshop Committees which would constitute the union.

The initial outlay for a few cards is all. These cards could be sold for a penny, which could be used for purchasing fresh cards for other workshops.

When 5, 10, or more men joined in a workshop or factory, they would select a committee, which could be linked up with the nearest workshop committee in the vicinity. A delegate could be appointed in cases of emergency to meet other delegates from workshops, to discuss the important local business. This could be nationalised and internationalised. This system of organisation started is sure to grow. When a workshop committee is formed it will be the duty of each of them in turn to act as collecting

steward. The dues of 1d., besides helping for printing, etc., will be a weekly reminder to the members that they are in an organisation, and should be doing something. If a delegate owing to union activities is forced to lose time, such loss of time and expense could be met by a penny levy.

I am sure that a man with the movement at heart could get a number of his workmates to join, just for consulting at first, and when he formed a committee and joined up with another workshop some useful propaganda work could be mutually arranged, which must, and would, be for the benefit of the working class.

These industrial unions, through workshop committees, can be formed; they must be formed, and they will prove to be the only salvation for humanity; that humanity-the working class.

It is now for those few class-conscious men to think a little more; educate your fellowworkers to the cause; start a workshop com-J. T. BELLAMY. mittee and organise.

GOODNESS.

Prayers have been offered in the State Church, fellow-worker, asking the Lord of the religious people to take pity on the "lonely fields " and the " empty shippons," and to stay the cattle plague in order that the Churchgoers might "rejoice" in his "goodness."

Have you noticed, fellow-worker, that the attitude of the Capitalist State towards the unemployed and all unfortunates is very much like the attitude the State Church imagines its God adopts towards humanity and the animals?

They believe that their God visits plagues upon living creatures, and they say to him: Please remove the plague you have sent in order that we may bless you for being so good as to cease to torture us.

The unemployed worker is expected to accept with resignation and humility dismissal by the employing class from the socially necessary services he performs on the land or in industry, for which alone he is given the means to live.

Then he is expected to beg with humility and patience that his exclusion from the social economy shall be so far mitigated that he shall receive a bare minimum subsistence which will ward off actual starvation till the employing classes call him back to work.

Religions are, in fact, a reflection of people's experience of life and opinions thereon.

In a barbarous society, as ours still is, we need not be surprised by the barbarous prayer which has been offered up in the Churches for the staying of the cattle plague.

THE SEARCHLIGHT.

WANTED .- Second-hand copies: "How the War Came," by Lord Loreburn; "Economics for the General Reader" (Clay); "Brass Check" (Upton Sinclair), cheap edition; "Ancient Lowly" (Osborn Ward).

SUBSCRIBERS.

A certain number of subscribers have fallen into arrears with their payments, and as we need funds very urgently we urge them to pay up at once. Their papers are marked each week with the date when their subscription expired. Rates: 1s. 72d. three months, 3s. 3d. six months, 6s. 6d. twelve months.

Some of our is. a week subscribers, too, need a reminder that their subscriptions are due.
