WEEKLY

The Ferrer School by Prince Hopkins.

When I first visited the Ferrer School always deeply regretted. Under the pres- them. Their attitude seemed to become were almost equally inadequate.

resulted in the first place from the fact that the idea of a school based upon liberty was new to me, I was unwilling to make allowances when I saw certain things neglected which the ordinary school places in the first rank of duties, but which, as judged by the standard of real life, are useless or harmful. Among such things are the stereotyped order of studies, the tomb-like class-room silence, and the exaggerated respect paid to the authority of the teacher.

which resulted from other causes. The blems arose which made the adherance to cramped quarters, the poverty, the fact this rule very difficult; and some slight that the children came in largely after infringements of the letter of unqualified handicaps.

the remaining deficit, purchased a piece of land at Stelton, New Jersey.

new colony The community, however, was not merely school. It was a place to which my next visit, they'd all been lost. wholy unaffected, naive, way. anarchists and heretics of all kinds could come, and live more cheaply than in the city, at the same time that they enjoyed not only the country air, but the society of others of like minds with themselves. Withal, Stelton was near enough to New York so that members of the colony whose work was in the great city could, if they wished, go back and forth daily.

This combination of school and colony proved a very fortunate idea. The colonists suggestion that a chairman be appointed, was, for the children, only one of many sent their own children to the school. They or an order of speaking be decided upon, wider and more wholesome ones in which also had friends out over week ends, who became interested in the ideas of the school and sent children to it. On the other hand, the school provided an excuse, and a nuclear idea, for the colony. So the two grew together.

In some ways the site might have been more wisely selected The country around Stelton is about as dreary and uninteresting as you could find anywhere. The colony certainly didn't attract anyone from the artistic standpoint. Cheapness was its sole recomendation. Nevertheless people came, and set up their little wooden shacks. With only a few boards to shut out the cold blasts of a climate to which England has hardly anything to compare in winter, these hardy pioneers stuck it out, year after year.

The lack of funds drove the members to one measure, which I for one have

in New York, it was housed in some abo- sure of circumstances, they yielded to the suddenly highly purposive. They began to minable little quarters down by St. Marks advice of the individualistic faction among work very hard, of their own accord, upon Place, just off the Bowery. After that, it their membership, and declared for private the subjects, in which, they knew, they moved to quarters far uptown, but which ownership of land. Lots were sold on the were deficient according to the common freehold principle, and passed out forever school standards. At the time of my last My impressions were not good. This from the control of the Community. Re- visit to Stelton, this had resulted in their cently a cooperative store flourished for so thoroughly making up their deficiencies, some time in the colony, but during the that the Patterson school authorities, pasgreat part of its history, the only common sing upon the standing of Stelton graduates

From the beginning, as I've said, the cial mention of their excellent preparation. central principle of the school was that of complete liberty, limited only by the equal liberty of others. This has been maintained not merely in principle, but in practice, with very great consistency. When the school moved from New York to Stelton, and became a place where the child-But there were also some other defects, ren lived and boarded, a number of pro-

This had an evil side as well as a when some issue was being discussed in good one, the children retailed all the which all were greatly interested. At such scandals of the colony, which were by no times, all members of the group would means the less numerous because in talk at once, regardless of whether there theory its members justified freedom of were any to listen, or of how much each every individual in all that didn't interfere prevented anyone else being heard. Any with others. But this topic of conversation always met with strong disapproval on the they were interested. One heard from score that it would infringe personal li- them the most divergent views on all matberty.

effect of liberty was a mixed one. The med as the result of considerable reading children naturally objected to much in the and - best of all - of independent ordinary school program, as having not the thought. slightest bearing upon real life; at least It is the capacity for this last which is, as life touched them. If a teacher hadn't I think, the most valuable contribution the power to make a subject entertaining, the younger children shunned it in favor of other occupations which had a greater appeal. The immediate result, therefore, was a program of studies which departed radically from that of outside schools.

When, however, these children came of an age beyond which the Ferrer School was unprepared to carry their studies, so that it was a question of their attending, soon, the high-school in the neighboring pupils. I have since found an explanation

enterprise was the school itself. who were in their charge, had made spe-

This would certainly seem to be a very complete vindication of the free method, from an accademic standpoint. Furthermore, there are other evidences of true education which the authorities of the common schools are all too prone to minimise.

One of these is, that, in contrast with children who have been graduated from a school in which reading, writing, and'rithmetic are 'taught at the end of a hickory stick," the child from a free having fatigued themselves with a full day freedom were conceded to the realities of school goes forth with real interest in these in the regular city schools, were great the situation. For instance, on an ice subjects for their own sakes. The "Workers Dreadnought" may obtained from Mr. A. Turner, 25' Windmill GOVERNMENT AND AGRICULTURE By The Man With The Hoe

We find the inhabitants of this earth divided into two great masses; the peasant paymaster - spade in hand, original imperial producers of turnips, and waiting on them all round a crowd of polite persons modestly expectant of turnips, for some too often theoretical service, as John Ruskin says.

It is because those of us who get our living on the soil can see the truth of Ruskin's words, that we protest against the economic and social crime committed against the most useful of all citizens, and without whom not only the present civilisation, but Society itself could not exist.

No occupation or industry of any kind has the number of critics that the food producer has, and the set of critics know as little about the subject at issue as those who criticise him. Unfortunately the great mass of our critics find it much more respeeches in Parliament than to take a farm and show us how to do the job.

the Labour Party from MacDonald downward tells us that if we will only copy the methods of Denmark and Germany. by organisation through cooperation, we, like they, will get over all our economic troubles in production, and the consumer will gain. Of course none of these wise duced under other economic standards of tion of powers and the distinction of men tell either us, the producers, or the life, from the Dane to the Ryot of India classes, the two most powerful instruments industrial consuming public that neither of and the Coolie of China. HOUSES

100.000 houses a year are required to accomodate the growing population and to replice those that become uninhabitable. In 1923, 38,545 houses were completed or are in course of construction. More than half of these being for sale.

In Scotland there is a shortage of at least 100,000 houses. 57 houses were completed under the 1923 scheme and

On the adjournment of the House for His Majesty's Government attach so Easter Mr. Masterman (Lib.) said that of Health to lay down a standard wage Messrs. Harland and Wolff, who have Mr. Euldwin: May I ask the Right rate. He asked what proportion of the in Office they did not prove so.

The Building Trust, he said, does not guarantee, or even suggest it can produce houses enough to make good the housing shortage. 200,000, he said, are required each year to make good the shortage and keep abreast with the increase, yet the Building Trust only promises 200,000 houses in 10 years time, during which period the present shortage will have grown by half a million houses. Something bigger than that is needed, he declared. He suggested a building allowance to the municipalities. Apprenticeship, he said, is to be extended up to 20 years of age, but he did not think it takes four years to train a builder, and he did not see why men over 20 should not be taken in. A Liberal motion that the guarantees He instanced what was done in engineering during the war, and was met with wages and unemployment in that industry. The Building Trust further asks for restrictions against the use of foreign manufactured goods under the scheme of which it is to have the monopoly.

Sir Kingsly Wood (Con.) said he could not see why the Minister of Health was pleased with the Building Committee Report. He complained that under it employers would only be permitted to pay Mr. Ammon said the Government will trade union rates - neither more nor less - on housing, but on other buildings they could pay what they liked. An employer putting up a commercial building

The Government was investi-Viscount Curzon, but Colonel Wedgwood gating the Act to see whate was causing it not to work smoothly. Representative The Parliamentary Secretary to the Indians who had come to the Assembly in a constitutional way would be invited

> Earl Winterton asked whether the Indians invited would be those who are prepared to co-operate with the British Government, or those who are not. Mr. Richards said plainly he meant those who are prepared to co-operate. The Government would not agree, as suggested in a Liberal amendment, to a Commission to enquire what steps are now necessary

> towards fulfilment of the promise of ultimate Dominion self-government.

to state their views.

pleased with the answer of the Govern- We shoul not be surprised were the ment. He was glad to know that the Go- berals to oppose the scheme in order vernment intended to carry out the Go- curry favour with the poorer people and the vernment of India Act that are the vernment of India Act, that any enquiry ratepayers, and with those who are opport the government might set up would be ed to putting further financial burden merely an enquiry into the working of upon the local authorities. the existing machinery, and that evidence Under the private property system would only be welcomed from those who reform that assits in some measure one are interested in seeing the Act work successfully, not from those who had obstructed it.

Colonel Wedgwood said his Government colleague had not said so much as that, but we rather fear Earl Winterton has seized the main essentials of what the Government means to do, which is in effect nothing.

The Labour Government is following in the Old imperialist tradition. Some of the Liberals are making a show of being more advanced than the Labour Government. That would be easy; but the bulk

of the Liberal Party remains as backware as ever. The Indians must look not to Parliament, but to themselves for advance ment.

ler, and a former clerk in the Crown ar also facing charges of larceny, one which concerns a sum of 100,000 dollars Simpler charges are also made against the Accountant-General of the Post Office who has escaped to Canada, whilst former magistrate of Placentia is facing charge of obtaining 12,000 dollars under false pretences.

THE EVICTIONS BILL

Remarkable Government Action

The Labour Government secured and day amendment to the Evictions Bill of Mr rue E.D. Simon, a Liberal Member, a provision which, so far from providing additional wo safeguards against eviction, appears to inte have removed a safeguard which the Bill par already possessed. Apparently the Bill provided, or was intended by its promoter the to provide, that a landlord who acquired the a house after July 31st 1923 might not par obtain possession by evicting the tenant res If the landlord acquired the house before that date, the Court might grant possess- get ion, provided it was satisfied that, having cha regard to the accomodation available for por landlord and tenant respectively, greater hardship would be caused by refusing the wit order than by granting it. The Government dec Amendment made the possibility of obtain the ing an order for possession apply to land car lords who bought even after the passing of the Bill. Mr. E.D. Simon stigmatised chi

THE GOVERNMENT'S HOUSING SCHEME

Everyone wants to see more houses tor built, but no one wants to pay for them of whilst the builders, money lenders and On landowners are determined to get all they wit can. The result is a dead-lock typical of all the capitalist system. The Government is only obviously reluctant to disclose the details gee of its scheme, lest there be an outcry from we those who are expected to foot the bill that Mr. Snowden has, however, been unable litt to resist the temptation to disclose, some the thing of what is contemplated to an America rican Journal. He has stated that there is kee to be an average loss of 6/- a week on the proposed houses, two-thirds of which is to be borne by the State, one-third by the local authorities. When the full burden has fallen on the local authorities fifteen years hence, Mr. Snowden estimates that Earl Winterton (Con.) declared himself it will be equal to a rate of 10d in the

section of people, always places additional un burdens upon another section.
