# PRODUCTION FOR USE AND PLENTY FOR ALL.

Vol. XI. No. 7.

May 3rd, 1924

All I have is this life, brief yet full of potentiality, it is ebbing away; each day, each hour it is passing from me and rushing onward towards its end.

Small as I am, I bring my quota to the world; my thoughts, my actions go forth into the flood of endeavour: they do their part in making its monstrous sum.

My children go forth; they enter into the race. They are marked with my seal, the seal that I set upon humanity. Their part, which is also mine, is added to the

My children are of my flesh: they will ss. get other children. They are links in the chain of race, meshes in the wide net of or population.

er My deeds also are my children; deeds he with their far-spreading reverberations: ent deeds that bring changes to me and you, in their influence travelling further than we de can know.

Thoughts and words also are my ed children; little marks scratched with a ote piece of lead, impressions of printer's ink on papers that journey whither I do not

All these; all these are making me and

Other folk also are my children; and I theirs. I make them as they make me. In our thoughts and our deeds we are creators; creators of men and times; creators of waves of thought that go passing on. Only my life I possess, my life, my body with all its powers. Only these I possess; all else is dross. Save for these I have only some fugitive gear about me; some gear that perhaps might give me the power to summon others to serve me. But that is nothing; it strengthens not that little pump, my heart, that must beat till the days of my living are ended. It increases not the power of my hand or the keenness of my thought.

Only myself have I; my body with its powers. Only this for a space, for this will perish, my body that came down to me from the cave folk, down from the ancient hunters and the women who squatted before the camp fires, weaving and potting and scratching the earliest writing for ages after the dawn of people, after the time of those who had scarcely the art to fashion tools by knocking stone on stone.

I have only this body of mine that ages of men and women have fashioned, making me what I am, a complex of powers unknown in the distant ages.

What shall I do with this body of mine? All that I do with it helps to fashion the men and women of this, my time. It helps to fashion the men and women of the future.

What great things shall I do with my little span of life? What shall I do to enhance the life about me; to make us stronger and finer, the people of now and to-morrow; we people of flesh and thought and deed and endeavour?

What shall I do with my little span of life; that only which is mine?

which are

THE SOCIALIST IDEAL IN ART. By William Morris

Some people will, perhaps, not be prepared to hear that Socialism has any ideal of art, for in the first place it is so obviously founded on the necessity for dealing with the bare economy of life that many, and even some Socialists, can see nothing save that economic basis and moreover, many who might be disposed to admit the necessity of an economic change in the direction of Socialism, believe quite sincerely that art is fostered by the inequalities of condition which it is the first business of Socialism to do away with and indeed that it cannot exist without them. Nevertheless in the teeth of these opinions, I assert first that Socialism is an

all-embracing theory of life, and that as it has an ethic and religion of its own, so also it has an aesthetic: so that to anyone who wishes to study Socialism duly, it is necessary to look on it from the aesthetic point of view. And, secondly, I assert that inequality of condition, whatever may have been the case in former ages of the world, has now become incompatible with the existence of a healthy art.

But before I go further I must explain that I use the word art in a wider sense than is commonly used amongst us to-day; for convenience' sake, indeed, I will exclude all appeals to the intellect and emotions that are not addressed to the eyesight; though, properly speaking, music and all literature that deals with style should be

art or destructive to art.

denies it. The Commercialist sees that in Nor, however much we may suffer from ation of neighbours. And a rich man has

sure in the labour of production; and that, lack of which we must endure. are looked upon by almost everybody as by reason of his complicity. All this education are being furthered in decent years ago, and I know him very well to must lead unhappy lives, since their work, gold, the Midas of the ages.

lives, is devoid of pleasure.

the artists (using the word in its present sent.

Now, the Socialist not only sees this disease in the body politic, but also thinks that he knows the cause of it, and consequently can conceive of a remedy; and that all the more because the disease is in the main peculiar, as above said, to modern civilisation. Art was once the common possession of the whole people; town, the burned village, the deserted fields. Ruin bore on its face the token of its essential hideousness; to-day it is prosperity that is externally ugly.

The story of the Lancashire manufacturer who, coming back from Italy, that sad museum of the nations, rejoiced to see the smoke, with which he was poisoning the beauty of the earth, pouring out of his chimneys, gives us a genuine type of the active rich man of the Commercial Period, degraded into incapacity of even wishing for decent surroundings. In those

considered as portions of art; but I can vous indeed, but peace would bring back but as soon as he steps out into the exclude from consideration as a possible pleasure to men, and the hope of peace streets he is again in the midst of ugliness vehicle of art no production of man which was at least conceivable; but now, peace to which he must blunt his senses, or he can be looked at. And here at once be- can no longer help us and has no hope miserable if he really cares about art comes obvious the sundering of the ways for us; the prosperity of the country, by Even when he is in the country, amidst between the Socialist and the commercial whatever "leaps and bounds" it may ad- the beauty of trees and fields, he canview of art. It is also directly opposed to

It is not always for what is written

Amongst other business discussed was that of German competition, and the methods employed by German shipowners in securing freights; low wages and false register of tonnage. It was declared that the wicked Hun was to carry cargoes at a lower rate than the British shipowners could do, and even British merchants were taking advantage at this fact. The noble president of the above mentioned Union, his blue eyes flashing with anger, denounced such methods, as unfair, unscrupulous, and several other nasty names. He plainly indicated that something would have to be done to protect the poor British shipowner, who really ran his ships for the benefit of his employees. Profit was but a very minor consideration, but of course, he would like to make enough to clear working ex--

"We have already induced several German crews to hold up their ships in a demand for higher wages," the president continued, but what was the result? On their return to Germany these crews were promptly arrested and sent to goal. They have my entire sympathy, and all that, of course, but what can I do? I am sure, my friends, that we have done all that we possibly can."

"Hear, Hear!" cried somebody. "In fact, are we not doing our own members for a jolly old bob a week?"

"Certainly we..... "Silence!" thundered the president, "Remember where you are; and besides, we've got to get it somehow, a'in't we fathead? Now, we have got to devise a plan for meeting this unfair competition, so as to enable the British shipowner to carry on his phi- moral benefit of the members themlanthropic work."

in any day, and Walter Runciman, he of the generous heart, thinks that he may be able to scrape long by carrying sailor's bags and cashing their advance notes. So I am sure you will agree with me when I say that somebody - I mean something will have to be done."

"Why not have another war," suggested the delegate from Pentonville," 'surely that would put the kibosh on the Hun, and help our dear friends to recover the trade."

"A splendid idea," replied the president, but I am afraid this Ramsay MacDonald fellow would not listen to me. However I will discuss the matter with Mr. Winston Churchill. In the meantime we must find a temporary

"What about "Kruschens?" shouted one, but nobody heeded him.

Feeling that it was up to him as representing the premier port of the Empire, the delegate from Lewes now rose, and after clearing his carburreter, started off at top-speed: "I venture to suggest," he said, "that considering the straitened circumstances to which the shipowners have been reduced, the only solution, is a reduction of wages."

Loud and angry protests greeted this announcement, and several delegates, their evil intentions painfully apparent, made an ugly rush to seize the speaker. Before they could reach him however, he hastily assured them that they misunderstood him, "My dear brothers," he explained,' it is not our wages to which I refer, but those of our mem-

going to support a crowd of misguided dockers who are being led astray by their leaders? How different it would have been," he continued reflectively, "had they placed the control of their destinies in my capable hands. I'd give

them strikes!"

"However, my dear friends, you will see that it would be rather inadvisable to propose a further reduction at the present time. The silly blighters, I mean to say, our members might not grasp the fact that it was for their own good, and would probably resent such a measure. So I will make a proposal myself: on behalf of our dear friends and masters, that we open a fund for the purpose of providing needy shipowners with Sunday dinners, and I hope that you will get busy when crews are being paid, and make it a success."

Shouts of approval greeted the grand old warrior's proposal and it was car-

ried unanimously.

"Now, my friends,' went on the president, "I will not detain you longer, i' has gone two o'clock, and I am sure you are all longing to push a couple back before they close, so I will just ask you, as many as are here present, to accompany me with a pure heart and humble voice, saying after me : we love our masters and for what we have received may their Lord make us truly thankful, for we have no dispute with the owners."

After pronouncing the benediction he bade his followers adieu, and they departed singing:

"Jack's the boy to work a dozen hours a day "And, when the boss complains of loss,

signs on for lower pay. "He sings 'God save the King' of freedom

"So Jack my lad, you must be glad, Brittania rules the slaves.

# THE LEFT WING IN RUSSIA

The international Working Men's Association protests that in Soviet Russia there is "systematic destruction of all who dare think differently from the Tcheka." It urges a "world wide campaign." "to demand that all Anarchists, Syndicatists, Socialists and non-partisan revolutionists be liberated." A partial list of prisoners and exiles is given, including Herman Askeroff, an Anarchist of 20 years standing, several Kronstadt sailors who took part in the revolutions of 1905 and October and February 1917; several soldiers of the Red Army, Paul Kalabuschkin, an Anarchist who spent many years in the Schusselburg prison under the Czar, Meyer Rubntchik, a well known Anarchist of the Golov Truda publishing house, who is now ill in Moscow prison under the Czar, Meyer Rubintchik, whom are prominent in the movement.

The Anarchist Red Cross has also sent a similar manifesto as far as possible to every working class organisation in this country. This document complains that many of the prisoners are confined in the Solovetzky prison, on an island in the White Sea to which boats go only twice a year. This prison was in use under the Czar, and, according to the statements of the Anarchist Red Cross, the old treatment continues there. Prisoners are said to be beaten for the slightest infraction of rules, undressed and forced to stand naked in a dark cell. Two prisoners, Klysiev and Zapetzin, are said to be lying there crippled with hands and feet frozen, spitting blood, and awaiting death as a release from their sufferings. On December 19th the prisoners in Solovetzky revolted, and four persons were killed and two wounded. The Soviet Government has appointed a committee to investigate the occurence.

These statements make very unpleasant reading. What have the Russian delegates to the Anglo-Russian Conference to say

### THE EARTH'S BOUNTY

I verily believe that the earth in one year can produce enough food to last for thirty. Why do people die of starvation or lead a miserable existence on the verge of it? Why have millions upon millions to toil from morning till evening just to gain a mere crust of bread? Because of the absolute lack of organisation by which such labour should produce its effects, the absolute lack of distribution, the absolute lack even of the very idea that such things are possible. Nay, even to mention such things, to say that they are possible is criminal with many. Madness could hardly go further." Richard Jeffreys.

New ope'd this hour from dusky sheaths thy

E. S. P.

## MODERN SLAVERY

By H. Brown

We are supposed to be living in a state of civilisation; but our civilisation is far from humane. Slavery is supposed to be dead in this country, but there is a complete form of it existing at Belmont Institution, Sutton, Surrey.

In 1921 I went to Belmont. The authorities there brand one on arrival. All one's clothes are stamped: Belmont Institution, Sutton, Surrey. One is given a number of identification. Mine was H. Brown 1062.

In this institution there are men from all parts of England, Ireland and Scotland, and men are sent from different Boards of Guardians round about London.

The conditions reminded me of ancient times. The food is of the coarsest quality and insufficient to keep up bodily health. It may be sufficient for old people, but young, growing people, like myself, were always ready for meals. The shortage of food is sunnecessary, for men are set to growing all that is required, but the greater part of the vegetables are left in the ground to rot instead of being used for useful purposes. The cows used to get the green stuff and when I worked in the kitchen all the potatoes left after they had

been rationed out to the men were given to the pigs.

The beds were of the roughest material and in a filthy condition.

We worked eight hours a day for five days and four hours on Saturday. After that we were allowed recreation in the so-called day rooms. These were supplied with two sets of draughts, two ring boards with no rings, and two packs of playing cards, for about 400 odd men. We were allowed one sheet of writing paper, one envelope, one stamp and half an ounce of tobacco in return for our work.

Through wearing odd boots, one seven and one nine, I got a poisoned foot. From sleeping under a broken window the draught and rain blew in, I had got a bad face. On the advice of the medical steward I agreed to have a tooth extracted. I shall never forget the experience. I was told to sit in a chair, then, without doing anything to deaden the pain, he got hold of me and pulled my jaws, leaving me in terrible pain.

Belmont is worse than prison, and instead of the Labour Party making an inquiry, it would be more to their credit to abolish Belmont altogether.
