WEEKLY

abour and the New World A Critical Review,

Those who desire a new social order should constantly re-examine their ideals. Mr. Philip Snowden has attempted the task in his just published book "Labour and the New World." (Cassell 5s.).

The introspective effort required by this work must have done much to clarify and coordinate the views of Mr. Snowden. Nevertheless the work reveals annoying inconsistencies, and Mr. Snowden is obviously far, from sure whether many of the measures he proposes are to be regarded as integral features of his Socialist Commonwealth, or merely stop-gap palliatives of the present system.

In the course of his struggle to put his ideas of the "New World" into plain black and white, Mr. Snowden has discovered, like many others, that his vision is neither precise nor clear. In opening his exposition of the "new world order," he realised the flimsiness of his conception and prefaced his remarks of the excuse that—

The function of the social reformer is not to dogmatize about the goal of human progress, nor to draw a detailed and complete plant of the ideal state, nor to lay down rigid lines of social development."

Having made that statement Mr. Snowden proceeds to be exceedingly rigid and dogmatic on a large number of points which we shall presently discuss.

Evils of Capitalism.

Mr. Snowden is on surest ground in the first chapter of his book, in which he indicathe present system. This chapter is of lesser interest to those who are already convince l of the badness of the present system, but will have an educative influence upon the large unconverted public, who will read this book because it is written by the Chancellor of the Exchequer. To the unthinking it will doubtless be instructive to learn on such authority that "only one person in every seven who dies leaves any property whatsoever while in the year 1919, of the 91,499 estates becoming liable to duty, 41,581 estates did not exceed £500 gross value, 238 estates exceeded £100,000 in net value, nine estates exceeded £1,000,000, and one exceeded £3,000,000. To many heedless people it may not be a commonplace, but a revelation, to learn from Mr. Snowden that in 1910, of the total national income of the United States, 53.1 per cent. was monopolised by rent, interest and profit, only 46.9 going to wages and salaries. In 1920, when the population of Europe was urgently needing cotton goods the cotton growers in the Southern States were destroying part of the season's crop to enhance the price.

The Fallacy of Reformism.

Mr. Snowden, in this opening chapter, decides against the argument that the evils of the capitalist system can be, and are being, eliminated. He urges that "for a decade before 1914, there had been no advance in the conditions of the working class as a whole. On the contrary, wages had declined and the cost of living had increased." In 1854 the average cash wage of the agricultural worker was 10s. 8d., in 1908 it was 14s. 74d. In the

"The London Season."

principal industries—coal mining, textile manufacture, building, engineering—the mean rate of wages in 1908 was only 10 per cent. above that of 1874. Incomes assessed under schedule D (from gains arising from professions, trade, railways, canals, mines, gas works, water works) meanwhile had risen from £88,401,860 in 1854, to £565,601,312 in 1908 and to £1,094,000,000 in 1917-18. In comes assessed under Schedule A (from houses and land) rose from £111,000,000 in 1854 to £285,000,000 in 1914.

Thus the increase in national wealth clearly went, not to the wage worker, but to the landlord and capitalist. Mr. Snowden postulates, rightly enough that "whilst the unbridled ruthlessness of capitalism had been bridled" by legislation, such legislation had merely "given to capitalism a longer lease of life than it could have enjoyed had it been left to work out its will without restriction and control."

That is a very important admission, but unfortunately Mr. Snowden has not broken yet with the policy he condemns.

CAPITALISM BRIDLED, DEVELOPES IMPERIALISM AND TRUSTS.

Mr. Snowden, with great acuteness, observes that the state regulation of capitalism has been one of the reasons which have caused it to fortify itself by developing Imperialism and the Trusts. He attributes the arrest in the improvement in the position of the workers to Imperialism and the Trusts. To elucidate the facts regarding that contention would . require a lengthy argument upon which we will not embark, as our purpose is to examine the view of Mr. Snowden in regard to the new society. Nevertheless we regret to observe that though Mr. Snowden condemns Imperialism in unsparing terms his mind is not fully emancipated from its thraldom which has so strong a hold on the majority of his colleagues.

Mr. Snowden is aware that Imperialism is the outcome of capitalism, for "economic pressure urges capitalism to be constantly seeking fresh markets and new sources of raw material." He knows that "Imperialism has been advocated and defended as a great civilising policy and that National pride and con-

ceit have thus been exploited to serve sordid He declares that if all the commercial nations commercial and financial interests." He de- of the world were members of the League the clares that "Territorial domination of a native Covenant of the League, with its policy of une of commodities required by the whole people by an alien power will have to be Mandates, will provide the best way of adultimately renounced." Yet he belongs to a ministering the territories inhabited by back- distribute them through the District Commit Party that upheld the policy of the Irish ward races. Free State and the crushing of the Republie; he belongs to a government which is maintaining that policy of its predecessors; he belongs to a government which has endorsed and maintained the Sudan Irrigation Scheme, which has refused a round table conrerence with the Indian non-co-operators and given India to understand that she is by no means to be allowed to escape from the Empire, which keeps order in Mesopotamia and other primitive places by aeroplane bombs, which subsidises and advertises the British Empire Exhibition at Wembley, and generally proclaims itself as enthusiastic for Imperialism as any of its predecessors.

Moreover, even in the present work, Mr. Snowden excuses the evil he condemns; or rather, whilst he denounces, Imperialism he decides to preserve the British Empire.

"When an act reprehensible in itself has been committed it is not always the best or most expedient course to renounce the tionobligatons which have been acquired or to revert to the previous conditions. The British Empire is a fact which must be recognised, and its obligations must be accepted and fulfilled in such a way as will undo the mischief as far as possible while avoiding consequences which might aggra vate the situation. . . . "If we are looking to a federation of the world, then it would be a backward step to take any action which would break the ties which now bind the self-governing dominions and Great Britain together. . . . "If the British Empire uses its powerful position in the world, not for domination but to help the weak, then it can be the greatest inwhich have been done in the past.

"The problem of the position of the non-Anglo-Saxon dependencies presents very serious difficulties. But if British control of these dependencies be conducted in the spirit of conferring benefits upon our subjects rather than of exploiting them for our own advantage if our policy be directed to training these populations to become selfgoverning communities in all matters relating to their national affairs, then our Government may be justified by the good that it has accomplished. So long as a spirit of Imperialism dominates the Great Powers, the withdrawal of British Government from dependencies like India and the Crown Colonies will not be likely to leave these territories in the possession of independent self-government, but to leave them a prey to the predatory designs of other

It must be clearly understood, however, that to refer to India as though it were a country inhabited by a backward race, is absurd. There are in India many races, many communities at various stages of culture and development.

The Indians who have tasted of modern culture are very largely cosmopolitanised, and Government by them would display all the cil essential characteristics of capitalist government to be found in every capitalist country to-day. There is every reason to anticipate that they would build up an army to de- representatives of the District Councils, reprefend the territory of India from foreign ag. gression in the approved capitalist style. Mr. Snowden's fear that if Britain were to release India, it would fall into the hands of one of her rivals, is, we believe, quite groundless.

One feels that Mr. Snowden is influenced by the fact that he is a member of the Govespecially, he is cautious and contradictory. District Councils,

Mr. Snowden has to admit, however-"There is no prospect that the mandates

will be exercised for the good of the people, and not, as heretofore, to earn dividends for white capital."

Obviously this must be so. The Capitalism which exploits the White worker at home cannot be expected to play the altruist towards the black worker abroad. Capitalism would not pay if it pursued the policy of conferring benefit on its subjects, instead of exploiting them, and capitalism must pay or disappear.

Mr. Snowden begs the question when he says that if British control is for the benefit of the natives only, and not for British advantage, it may be justified. Obviously British control cannot be justified on suca grounds. On the basis f things as they are, what does Mr. Snowden say?

His statements are contradictory, but on page 294, he makes the following declara-

"The right of Great Britain to maintain its sovereignty over a territory and people unwilling to accept that sovereignty cannot be admitted, and if the people of, say, India and Egypt, desire to assert their complete independence, we have no right to keep them under subjection by the power of the sword. We cannot justly deny to a people the right of self-determination, because the political domination of that country is of strategical military importance to the British Empire."

That declaration is in direct conflict with the statements of the abour Government in regard to India.

strument for world progress which has ever Empires are so incompatible with Socialism been created. This is the only real destiny that it is difficult to believe Mr. Snowden seriof the British people. . If pursued, this ously means to maintain the Dominions and nobler policy may atone for the wrongs the mandate system in his "New World, But Mr. Snowden's idea of Socialism partake very largely of the old order. His new world is surprisingly like the old world in many re-

> He would still retain the wage system, for instance, in his "New World Order."

Only Communism, with its healing virtue of production for use; its simple, utilitarian organisation of Society on the basis of production for use can solve the problem of the terest backward races.

Industry and the New World Order.

Let us turn, however, to Mr. Snowden's proposals for the basic organisation of the New World order.

Mr. Snowden proposes to retain Parliament in his Socialistic society and to maintain it much as it is. He would add a National Ec- election. onomic Council, which would be subordinate to Parliament and under its control. He fur-

Workshop Committees elected by the whole body of workers, representative of all grades. District Councils composed of representatives of the workshops and trades within the area, representatives of consumers, and a representative of the National economic coun-

National Economic Council, consisting of sentatives of the political State or Parlia-

ment and representatives of the consumers. Wages and rates of pay would be fixed by the National Economic Council. It would have semi-legislative powers in these matters, and in regulating factory conditions.

The concentration of factories and work ernment and may be called to account for shops in the most favourable places, and the what he says. Therefore on foreign affairs, elimination of owners would be done by the

The National Economic Council would c ordinate national production, estimate the vo community, purchase the raw materials and tees to the factories.

An Agricultural Committee would organis agricultural production and estimate require. ments in the same manner.

Half Way House.

It will be observed that Mr. Snowden I halted mid-way between Parliamentary Sc ial Democracy and a Communist industri organisation of society.

He has got so far as to declare that there must be democracy in industry but he fear it and desires to minimise its effects.

He declares it is undesirable that the ec onomic organisation should assume an importance equal to that of Parliament. "I p test," he says, "against the idea that hum life should be sacrificed to the production wealth." That is the case at present, we mu observe, as every-one knows.

Mr. Snowden continues: "It would be tatal thing if the democratic control of indus try led to the minds and efforts of all work men being too much devoted to the organis tion of production." He urges that the worker will leave the details of industrial legislation and administration to experts.

He believes there is a danger of developi a selfish class interest within the self-govern ing industrial group. He believes that:

" If the control of an industry were le entirely to those who are employed in it is very likely that a group interest wou be created which would be anti-social. Su uncontrolled groups would be under temptation to exploit the public for the own gain, and a conflict of interests l tween the different groups might easilarise. Such groups might become ver powerful and might be able to exercise political power which would be a great danger to the State. . .

'In any scheme of workers' control interests of the consumers or citizens have to be predominent."

All these fears are utterly opposed to own view and ta what be believe to be th spirit of communism.

We do not regard production as something to be shunned as too material, but as part the great glorious work of humanity, in whi all should take a living, vital enthusiastic

That Mr. Snowden recognised even in part the need for the self-management of indu try is, however, an advance.

It is interesting to observe that he advocate the Soviet, or workers' council, for industry though he has many times denounced it as undemocratic and condemned it on the scor that it is built upon a system of indirect

This condemnation springs from the rooted belief in authoritarian centralism.

The upholders of the strong state idea, which Mr. Snowden is still one, would make the workshop councils mere pawns directed by higher authorities. That has been one the features of Bolshevik rule in Russia which Mr. Snowden denounces.

Free autonomy and initiative at the point of production is, however, essential to the realisation of the workers' councils under con munism. The District Councils must be pure ly advisory centres for the collection and d tribution of information and for the co-ordination and supply of material, on a basis voluntary agreement in the general interest So with the National Council.

As to Parliament, the political State, must disappear, its functions will disappea: it is unnecessary to Communism.

Mr. Snowden agrees that the New Order must be world wide; therefore the armies an navies of the political State will be no more needed. Its foreign offices, which Mr. Snow.

a would democratise, by throwing its posts open to poor men by competitive examinaons will disappear.

Workshop Committee v. Trade Unions.

Mr. Snowden realises that the Trade Unions must give way to the workshop organisation. urely, but not for the general organisation of society.

Co-operatives.

We observe also that Mr. Snowden's view the same as ours in regard to co. den makes the same point clear. He sayserative societies. We have long contended hat these are planned on a basis of petty apitalism and will not continue in the New forld order in which buying and selling will

Mr. Snowden proposes that distribution hould be carried out by the existing municial bodies or something like them. He s naking a mistake there. He should link up istribution with his industrial bodies. Moreover, the municipal bodies are like Parament, instituted for such work.

Production for use, not profit.

ork. They will not require to be diluted because "it will be forced by the classes if The checks and balances which Mr. schemes of reform, involving the expropria-Snowden feels he requires to prevent the tion of the capitalist class." It is inlikely adustrial groups from exploiting the rest Mr. Snowden urges because the Labour Goverprise will have to be available in the landlords going to raise an army and fight

If some people are drawing salaried prizes and others are living at a bare subsistence level the New World order will reflect the evils of the Old World order.

Compensation for the Capitalist.

Moreover, Mr. Snowden would compensate ne capitalist and the landlord, and thereby erpetuate them, as parasites existing on rent interest and profit. He says-

'Nationalisation is not advocated as a method by which the rentier class could be mmediately abolished."

'Some people raise objection to nationalisation by compensation on the ground that a huge and intolerable public debt would be created. Such an objection of this can only be urged by those who are woefully ignorant of the methods by which joint stock companies are financied. The share public subscriptions in the form of shares, their turn might soon come.' is just as much a debt as wuld be the capital raised by the State for the acquisition of, say, the railways or the mines. The railway capital of the country is held by individual shareholders to whom the railway company is indebted. There is no real difference between the debt owing by a joint stock company to its shareholders and a debt which would be owing by the State on the bonds and shares it issued for the acquisition of a business concern. If the State acquired the railways, the mines, the great shipping lines, or an industrial bus-

iness like the Coats, or the Lever Combine, or the Shell Oil Company, there would be no increase of debt. The State would have assumed the position of the companies and would have accepted their responsibilities for the capital which had been subscribed by private individuals"

Compensating the Capitalist Perpetuates Capitalism.

Precisely so. That is our objection to buying out the capitalist. To do so perpetuates capitalism. It makes it necessary to preserve production and distribution for profit with We are glad to find so cautious a man agree wage slavery, class distinctions, for class diswith us in that. He thinks the craft unions tinctions are based on economic distinctions, Il remain for the perfection of the craft and all the characteristic feautres of capitalist

Foreign Investments.

In dealing with foreign relations Mr. Snow-

"A Labour and Socialist Government in Great Britain having a clear Parliamentary majority for pursuing a policy of socialism, but which respected the rights of toreign investors in this country, and waich recognised trading debts would not be likely to encounter the open hosin'ty of other

To "respect the rights of foreign investors" is to keep the capitalist system going.

Revlution or Evolution.

Mr. Snowden, of course, declares himself an The true workers' councils of Communism opponent of revolution. He discounts the ill consist only of those who are doing the view that "a bloody revolution is inevitable outsiders without knowledge of the work a Labour Government attempted large the community, the bonuses he suggests ernment would not attempt such reforms unor stimulating production and so on are less backed by a majority, in recover the civil eatures of the present system. Mr. Snow- service and forces of law and order would be den, of course, thinks they cannot be dis- under the Labour Government and "the pensed with, because he still proposes to privileged classes in GreatBritain have always produce for sale and to engage labour to shown a remarkable willingness to bow to the vork for wages. He even says that the inevitable." He asks-"Suppose the Labour ly salaried prizes now possible in private en- Government nationalised the land, are the ransition period. The question is if people for their privileges. "Are the small number of are to work on a wage basis and if commo- people affected by nationalising the mines and ities are to be bought and sold, how those railways going to raise an armed insurrection, salaried prizes can ever be brought to an he asks. Will the people whose income tax is so raised that only a small living wage is left "march to the barricades?"

"There is no reasonable ground to believe this," Mr. Snowden decides; but later in the book, he predicts this very thing will happen if there is any attempt to expropriate the capitalist.

Revolution Predicted if Capitalists not Compensated.

Mr. Snowden urges that the entire system of production cannot be confiscated at onc, of production cannot be confiscated at once, his argument, a very ineffective one, we of capital by mutual confidence, based not yet developed to the point of ripeness for upon patron and patronised, but based upon

"Partial confiscation," he says, "would precipitate a violent revolution, in which not only those who were being dispossessed would participate, but all the large property interests capital or a joint stock company, raised by because they would naturally expect that

> This, indeed, is the whole case of those who say we must recognise that vested interests will resist by every possible means the coming of the new order.

Socialism through Taxation.

Mr. Snowden's proposals for taxing capitalism gradually out of existence would, we think, be resisted just as he says partial confiscation would be resisted.

The capitalists will have the greater power of resistence if they are left in possession of the greater part of their great wealth both in land and industry and in finance, assuming as Mr. Snowden does, that the existing financial system will continue.

Mr. Snowden further urges that the organisation of capitalism must not be dislocated. ial democracy."-William Morris.

He declares that it is essential to maintain

it. He says— "The mere fear or threat of confiscation would have a disastrous effect upon production. Capitalists could not be expected

to continue to produce, to renew their plant, to improve their process if the spectre of confiscation were before them. It would be harmful, if not disastrous, to nationalisation to advocate a policy which would lower the efficiency of the indus-

tries it is proposed to acquire.' Mr. Snowden's plan of bleeding the capitalist to death by taxation would produce just the results he fears as any manufacturer or merchant can tell him. Capital is the life of capitalist enterprise. Without it one cannot do business. The smallest shopkeeper knows

It is most interesting to observe the contrast between Mr. Snowden's remarks on taxation in this book and the homily with which concluded his recent Budget statement. In the book he says—

Socialists . . . would deliberately tax rent, interest and profit in order to divert a part of the national product from individual use to social purpose.

"The instrument of taxation must be deliberately used for the purpose of effecting a better distribution of wealth. Such better distribution must be effected by the taxation to extinction of unearned in-

On the Budget Mr. Snowden said— "The Budget is vindictive against no class, and no interest. Though I have always held and declared that the State has the right to call upon the whole of the available resources of its citizens in case of national need, I have equally held and declared that the State has no right to pay anyone, unless it can show that the taxation is likely to be used more beneficially

and more economically." As we have observed Mr. Snowden's boo's is very contradictory and the remarks we have made in respect of his taxation plan, he, himself, expresses in the following sentences-

'A capital levy, if repeatedly imposed, would be self destructive. It would ultimately drain the resources from whch revenue must be derived. It would discourage saving and the accumulation of capital, and it would keep the commercial world in a state of uncertainty, would prevent the investment of capital in business, and would be minous to trade and industry.

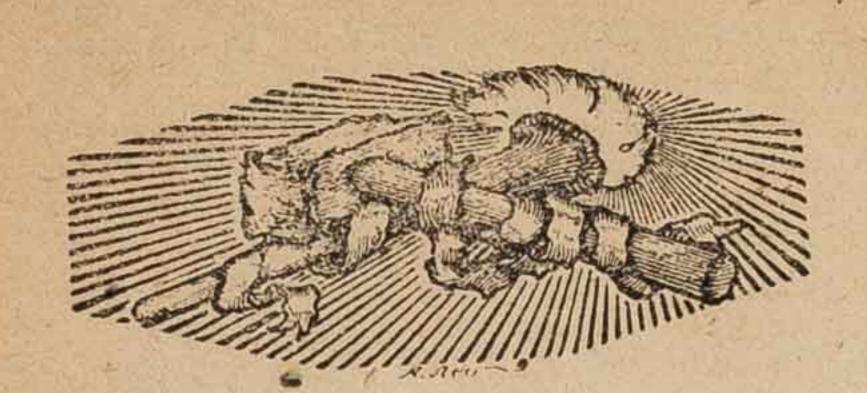

Ramsay MacDonald.

'We will try to change industry from a battleground of strikes to a co-operation and confidence between the worker and the owner control, based upon recognition of the fact that the man who writes poetry and preaches sermons, as well as the man who scrapes roads and lays the bricks, is contributing to the whole of the wealth of a moral society."-J. Ramsay MacDonald.

Or William Morris?

It is enough political economy for me to know that the idle class is rich and the working class is poor, and that the rich are rich because they rob the poor.

"That I know because I see it with my own eyes. I need read no books to convince me of it. And it does not matter a rap, it seems to me, whether the robbery is accomplished by what is termed surplus value, or by means of serfage, or open brigandage. The whole system is monstrous and intolerable, and what we Socialists have got to do is to work together for its complete overthrow, and for the establishment in its stead of a system of co-operation where there shall be no masters or slaves, but where everyone will live and work jollily together as neighbours and comrades for the equal good of all. That, in a nutshell, is my political economy and my soc-

Our View.

Moving Leftward

Labour Party Government is, of course, a weariness to the Communist, but in the intention of the electors, it is an

evolutionary stage beyond government by the confessedly pro-capitalist parties. Everywhere the direction is Leftward. In the German elections the Communists have gained substantially from the Social Democrats. The strength of the real Left Movement, which does not work through Parliament will develop as all the Parliamentary parties fail in

Volatile Mr. Garvin, in the "Observer voices a thought which is insistent in some quarters when he urges the Tories either to gine cleaner that we emphatically dissent coalesce with the Liberals or to place them from that opinion. in office. Parliamentary Government has indeed become farcical when it is seriously proposed that the smallest Party should be called on to form the Government.

Exit Poincare; France was upbraided on true, as Mr. Philip Snowden aptly observes Enter Renaudal, many hands but yesterday in his recent book, that Ministers are "large" superficial cres of the hour will fly to the tion. "The magnitude of the duties and opother extreme. We shall hear of the great erations of the Government Departments' advancement of France-for a little while. In- has, as Mr. Snowden says, made this inevitneed it is true, the trend of the popular mind able. Though the autocracy of one man is is Leftward in all countries. The Radical- thus rather a sham than a reality in most ocialists, the Socialists and the Communists things, the autocracy of the Department offi-(III. International) are the only parties in the cials is only a lesser iniquity. If Mr. Thomas French Elections which have not lost votes could be transformed by some obliging fairy It is true Poincare has gone; his visit to into a native of one of the Crown Colonies Chequers will not take place; we shall hear and could he still remember his foolishness or no more, for a time at least, of "M. Poincare to-day, the blush of shame would tinge his and I." Yet what faith can we place in those dusky cheek and his own most charitable exleaders of parties who will share the rever- planation of his recent utterance would be sion of Poincare's power? Briand, the old that he was then an egregious ass. renegade of an earlier Socialist movement, whose name and policies were coupled with those of Lloyd George in the making of the iniquitous Versailles peace. Herriot, some time regarded as having paficist tendencies. but a supporter of the Ruhr invasion, Renaudel, the jingo Social-Democrat, one of the men who bear most responsibility for leading the workers of Europe blindfold into the last war; one of the grossest of the jingoes; one of the loudest of the prophets of the truce of the workers with capitalism; one of those, who, like Barnes, Henderson, Clynes and Roberts in this country, entered a capitalist coalition government to impose on the workers military conscription, and as much industrial compulsion as they would tolerate. One of those who preached the Union sacre— been expected at least to attempt to make whilst the profiteers made harvest out of these children maintenance grants for educa- 7s. 3d.; A. enter a capitalist coalition government.

Last of all there is the French section of Vienna the Third International, with its leader Illness. Cachin. Cachin became a supporter of the Russian Revolution; but before that he had the Coalition with capitalism.

The true Left movement outside the Parliamentary parties of France is hardly heard of across the frontiers; but it will grow. The Leftward March has begun: It will hasten presently.

During the war the pro-war social Labour Parties of the world came to be described as Social Patriots because they adopted the prevailing attitude of the national capitalism and made it their own. Social Patriotism did not die with the war. The result is that solid international unity is impossible to the Labour Parties which are still swayed by opportunist leaders. Thus while the British Labour Party stands for Free Trade, the Irish Labour Party supports protection. The South African Lab. our Party has formed an Alliance with the Nationalists who are working to secure high tariffs to build up South African industries in . opposition to British. The only solution to all these rivalries is the ending of capitalism. Speed the day.

A fourth of the Mr. J. H. Thomas, the Globe ruled by Colonial Secretary, stated at Monmouth that he had been entrusted with the responsibility of one fourth of the globe, and one-fourth of the world's inhabitants were under his jurisdiction. The constitution that allowed that transformation to take place that allowed the engine cleaner of yesterday to be the Colonial Secretary of to-morrow was a Constitution to be proud of and zealously

It is not because Mr. Thomas was an en-

In our view, it is a monstrous iniquity that one-fourth the world's people should be under the jurisdiction of one man, subject to his inevitable ignorance of their desires and needs, subject to his will. Of course, it is as the blackest reaction left the servants of the permanent officials, both in the world. Now the in regard to general policy and administra

> Education or The Labour Government Unemployment has decided that children of 14 to 16 years of age shall be made eligible for unemployment tinsurance. Instead of being helped to continue their education they are to be handed over to the Ministry of Labour as industrial units; they will have to attend the Labour Exchange to sign on in proof f unemployment, and pressure will be brought to bear on them to accept the first emplo; ment that offers, however unsuitable it may

Surely a Labour Government might have £1; E. C. 1s.; H. Taylor, 2s. 41d.; A. B. to learn that Renaudel is again proposing to the herd of the unemployed.

Impoverished Austrias unfortunate people are amongst the most un. happy victims of the capitalist sys. tem to-day. Because of their ap.

been a prominent supported of the war and palling poverty they are an easy prey to tuberculosis. That disease affecting the larynx has grown so common in the Austrian of Trade in 1906. capital as to be called "Vienna illness." Food abundance for a starved population is the great need to stay the scourge. This is not forthcoming. The professors are busy devising methods of cure since the great essential prevention is not available. Professor Hajak and Dr. Wessely have constructed a carbon electric arc light, of which the carbons are impregnated with certain metallurgical chlorides of sodium. This is a substitute for the curative Swiss sunshine, to which the well-to do go for cure, when attacked by the dread

> A certain League of Nations pamphlet entitled " How the League saved Austria." The salvation provided by the League is, in deed of a mythic order, Austria, having been bied by war and stifled by blockade, was after wards dis-membered and surrounded by tariff walls, so that she ceased to be economically self-supporting, and was debarred from importing what she lacked, except on costly terms. She was then loaded with a heavy reparations burden and finally, under pretence of aid, was handed over to the exploitation of the international financiers. The Allied usurers may force Austria to balance her budget by imposing further harsh privations on her people, but Nature revolts against the iniquity and the physical resistance of the people is broken down. Vast, indeed, are the miseries which cry out for the ending of the capitalist system and not least those of un happy Austria

The Workers' The Railway Clerks' Assoc-Council System. iation conference has been discussing workers' control of industry. Its executive opposed the principle and procured a vote favur of the joint control of industry by the workers therein, and by the community. The idea of workers' control is moving onward and securing wider and wider circles of adherents. When it is fully understood, we shall see spring up the workshop councils which eventually will take over industry.

The Daily Herald says the Labour movement may have to refuse further support to Wembley because of the starvation wages paid to waitresses and lavatory at tendants. Obviously the Exhibition is a mere capitalist stunt. "The shop window of the Empire," as the Prince of Wales has called it, is not an mappropriate title.

Mr. MacDonald, speaking at Wembley, is reported by the "Daily Herald" as saying:

'Alacrity of mind, vigilance of intellect. hatred of revolution, and a warm welcome to evolution—that is the senius that is going to enable the British Empire to become

On reading such utterances we remise how fundamental and vast is the change of outlook which must be brought about in preparation for the new social order of mutual aid and well being for all.

Army Extension and Housing.

A new military camp is being built at Catterick. An order for 5,000,000 bricks for it has been placed at Darlington at 16s. per 1,000 above the local price. Consequently house building is held up.

Scottish Teachers' Superanuation.

In 1918 the Government of the day instituted a new, more generous, and non-contribution scheme for teachers' pensions. Three years later the Government forced the teachers to pay 5 per cent. of their salaries towards pension—the same thing happened in England and Scotland. The Act of 1922 making the teachers pay 5 per cent of their salaries now lapses. The Labour Government has extended it for England and on May 7th, the Scottish secretary proposed to extend it for Scotland till 1926. Incidentally he observed that the money the teachers are paying is not being set aside for their pensions, but used as an appropriation in aid of current expendi-

West Indies' Telegraph Bill.

The Government introduced a Bill to au-

can cable company. Apparently the money has already been spent. The Bill was prepared by the late Government. The present Government adopted the scheme. It was pointed out that cables are being superceded by wireless telegraphy and that the scheme is thus out of date.

It was not pointed out that it is in con-

Secondary Schools.

The Bill was read a third time and passed. Secondary schools must admit 20 per cent. of non-fee paying children from the elementary schools. The Board of Education announces permission to make it 40 per cent. but as the Board of Education does not provide the cash, the permit will be ignored as

Some Welsh local authorities have abolished the fees, however.

FROM THE PUBLISHERS

All books reviewed in our columns may be obtained from the Dreadnought bookshop. The Martyrdom of Man

(By Winwood Reade. Watts 2s. 6d.).

Winwood Reade, a nephew of Charles Reade, the famous novelist was born in 1838 and died at the age of 36. He was an African explorer, a free thinker and wrote several novels. His most serious work is the Martyr-

The work is divided into three parts. A world history first, entitled "War," deals with Egypt, Western Asia, the Persians, Greeks, Macedonians, Alexandria, the Phoenicians, Carthage and Rome, Roman Agrica, and the Arabs. The second part entitled "Religion" deals with "The natural history of Religion, the Israelites, the Jews, the prophets, the Mecca, character of Mahomet, Africa, Mahometans in Central Africa. The third part, "Liberty" passes through Ancient Europe, the German Invasion, the castle, the town, the In 1922-23 the Government of India and church, Venice, Arab Spain, the Portuguese periods of the earth," "Origin and early history of man," "Summary of universal history," "The future of the human race," "The religion of reason and love."

The character of the work may be gathered from the following extracts-

War.—"It is not probable that war will ever absolutely cease until science discovers some destroying force, so simple in its administration, so horrible in its effects, that all art, all gallantry, will be at an end, and battle will be massacres which the feelings of mankind will be unable to endure."

"A time will undoubtedly arrive when all men and women will be equal, and when the love of money, which is now the root of all industry, and which, therefore, is now the root of all good will cease to animate the human mind. But changes so prodigious can only be effected in prodigous periods of

"We teach that the soul is immortal; we teach that there is a Heaven in the ages far away; but not for us single corpuscles, not for us dots of animated jelly; but for the One of whom we are the elements, and who, though we perish, never dies, but grows from period to period and by the united efforts of Mr. Maxton (Lab.) pleased vainly that single molecules called men, or of those cell-Divine power which he will finally attain Our

Dreadnought" office.

A MEXICAN CO-OPERATIVE COLONY

(Association for Community Co-operation in Mexico and South America). P.O. Box 102, Times Square, New York, N.Y.

Our organization is founded upon the belief that there are innumerable people everywhere impatient for a better society. We believe this better society can be established now, without having to wait for the majority of mankind to reach the intellectual level required for this. We intend to build up Comhave a thoroughly practical plan by which to renewed vigour. embody our ideals in every-day life.

A difficulty that has proven to be the stumbling-block of many Communties in the past is the difference of apinion that inevitably arises among its members, and divides them intofactions that grow more and more hostile toward each other. We solve this problem by establishing one parent Community first, from which others can branch out with different economic structures. These will be run on Co-operative principles, and members can eventually settle themselves in that community which reflects best their personal

We have chosen Mexico as the most suitable place to erect our first Community, and for many reasons. Its close proximity to the United States, its very progressive government, its understanding and approval of our aims, its friendly offers of help, its valuable land offered us for practically nothing, and It declares that "Communism, strikes, lock- the unlimited opportunities for us to choose uts and all expressions of class war" are land that is fertile, with timber, water power and other natural resources; these and many other reasons point to Mexico as the most advantageous place to settle.

We are receiving inquiries from all over the U.S.A., and are urging friends to organindustrial troubles except for the workers ise groups in their own towns, so that we work together for the common good.

> We are endeavouring to develop a strong organization to support the first group of pioneers of Mexico. The dues are only ten cents a week, the Initiation Fee is fifty cents, which includes the first week's dues. We have lectures, open discussions and other social activities that add to the interest of the organization.
